CONTENTS

(Abstracted/Indexed in: *Curr. Contents/Eng. Technol. Appl. Sci. Curr. Contents/Phys. Chem. Earth Sci., Sci. Cit. Index, Phys. Abstr., ASCA*, Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®)

Full Length Articles

Application of MIVM for phase equilibrium of Sn-Pb-Sb system in vacuum distillation L. Kong, B. Yang, B. Xu, Y. Li, D. Liu and Y. Dai (Kunming, PR China).....	1-5
Prediction of vapour-liquid coexistence data of Phenylacetylcarbinol M. Harini, J. Adhikari (Mumbai, India) and K.Y. Rani (Hyderabad, India)	6-14
Uncertainty analysis applied to thermodynamic models and process design-2. Binary mixtures S. Hajipour, M.A. Satyro and M.W. Foley (Calgary, Canada).....	15-30
Simultaneous correlation of infinite dilution activity coefficient, vapor-liquid, and liquid-liquid equilibrium data with F-SAC L.F.K. Possani, G.B. Flôres, P.B. Staudt and R. de P. Soares (Porto Alegre, Brazil)	31-41
Phase diagram of novel recycling aqueous two-phase systems composed of two pH-response polymers: Experiment and modeling B. Yan and X. Cao (Shanghai, China).....	42-47
Liquid-liquid extraction of toluene from <i>n</i> -heptane by {[emim][TCM] + [emim][DCA]} binary ionic liquid mixtures M. Larriba, P. Navarro, J. García and F. Rodríguez (Madrid, Spain)	48-54
Liquid-liquid equilibria of ionic liquid 1-(2-methoxyethyl)-3-methylimidazolium bromide + potassium carbonate, potassium phosphate, dipotassium phosphate + water aqueous two-phase systems C. Sheng, J. Han, Y. Wang, B. Chen, Y. Liu, G. Zhang, Y. Yan and X. Zhao (Zhenjiang, China)	55-61
Isobaric vapor-liquid equilibrium for binary system of cinnamaldehyde + benzaldehyde at 10, 20 and 30 kPa H. Li, M. Han, X. Gao and X. Li (Tianjin, China)	62-66
Asphaltene precipitation of titration data modeling through committee machine with stochastically optimized fuzzy logic and optimized neural network M. Asoodeh (Birjand, Iran), A. Gholami (Abadan, Iran) and P. Bagheripour (Birjand, Iran)	67-74
A modified Patel-Teja cubic equation of state. Part II: Parameters for polar substances and its mixtures L.A. Forero G. and J.A. Velásquez J. (Medellín, Colombia).....	75-87
Estimation of viscosity of binary mixtures of ionic liquids and solvents using an artificial neural network based on the structure groups of the ionic liquid M.-R. Fatehi, S. Raeissi and D. Mowla (Shiraz, Iran).....	88-94
The effect of electrolyte and temperature on adsorption properties of esterquats M. Rojewska and K. Prochaska (Poznań, Poland)	95-103
