FLUID PHASE EQUILIBRIA

CONTENTS

(Abstracted/Index in: *Curr. Contents/Eng. Technol. Appl. Sci. Curr. Contents/Phys. Chem. Earth Sci., Sci. Cit. Index, Phys. Abstr., ASCA*, Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®)

Full Length Articles

Micellization properties and related thermodynamic parameters of aqueous sodium dodecyl sulfate and sodium dodecyl sulfonate solutions in the presence of 1-propanol S. Shirzad and R. Sadeghi (Sanandaj, Iran)	1-8
Experimental and modeling studies on the viscosity of (diesel oil + water + anti-agglomerant) system at high pressures K.-L. Yan (Beijing, China and Qingdao, China), K. Guo, C.-Y. Sun, S.-S. Niu, B. Liu, D.-J. Shen, J. Chen, R.-Q. Zhong, G.-J. Chen and Q.-P. Li (Beijing, China)	9-15
Vapor-liquid and liquid-liquid equilibrium calculations in mixtures containing non-ionic glycol ether surfactant using PHSC equation of state A. Khoshima and M.R. Dehghani (Narmak, Iran)	16-26
Solubility of DL-malic acid in water, ethanol and in mixtures of ethanol + water Y. Yuan, Y. Leng, H. Shao, C. Huang and K. Shan (Changzhou, China)	27-32
Isobaric vapor-liquid equilibrium for the binary systems of 1-butanol + methoxy(methoxymethoxy)methane, and 1-butanol + 2,4,6,8-tetraoxanonane at 101.3 kPa Y. Song, J.Q. Li, H. Zhang, X. Li, J. Ding, X. Sun and Y. Lin (Qingdao City, China)	33-37
Measurements and correlation at different temperatures of liquid-liquid equilibria of 2-butanol or 2-methyl-2-butanol + 1,2,3-propanetriol + water ternary systems A. Cháfer, J. de la Torre, E. Lladosa and J.B. Montón (Burjassot, Valencia, Spain)	38-44
Modeling and measurement of CO ₂ solubility in salty aqueous solutions and application in the Erdos Basin L. Wang, Z. Shen (Beijing, China), L. Hu (Baoding, China) and Q. Yu (Beijing, China)	45-55
III. Study of critical and maximum temperatures of coexistence of liquid and gas phase in hydrocarbons binary mixtures of aromatic hydrocarbons with alkanes and cycloalkanes S.V. Vostrikov, T.N. Nesterova, I.A. Nesterov, S.E. Sosin and A.G. Nazmudinov (Samara, Russia)	56-75
Highly accurate liquid-liquid interfacial tension measurement by a convenient capillary apparatus M.H. Ghatee and H. Ghazipour (Shiraz, Iran)	76-81
