# GEOLOGY

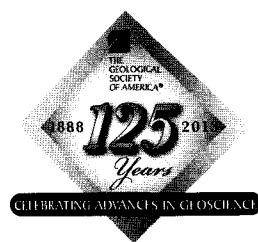

ISSN 0091-7613

FEBRUARY 2013 • VOL. 41 NO. 2 • P. 97-288

## INSIDE:

- ▶ Finding a Way Around the Ordovician Globe, p. 107
- ▶ Isotopes Analyzed! The Rest is History, p. 135
- ▶ Diagnosing a Buggy System, p. 215
- ▶ All Quiet on the Northwestern Front, p. 235
- ▶ A Gnawing Problem in Paleontology, p. 275

- 99 Banded iron formation to iron ore: A record of the evolution of Earth environments?**  
K.A. Evans, T.C. McCuaig, D. Leach, T. Angerer, and S.G. Hagemann
- 103 Lipid taphonomy in the Proterozoic and the effect of microbial mats on biomarker preservation**  
Maria M. Pawlowska, Nicholas J. Butterfield, and Jochen J. Brocks
- 107 Precisely locating the Ordovician equator in Laurentia**  
Jisuo Jin, David A.T. Harper, L. Robin M. Cocks, Phil J.A. McCausland, Christian M.Ø. Rasmussen, and Peter M. Sheehan
- 111 Deciphering high-pressure metamorphism in collisional context using microprobe mapping methods: Application to the Stak eclogitic massif (northwest Himalaya)**  
Pierre Lanari, Nicolas Riel, Stéphane Guillot, Olivier Vidal, Stéphane Schwartz, Arnaud Pêcher, and Keiko H. Hattori
- 115 Recovering the composition of melt and the fluid regime at the onset of crustal anatexis and S-type granite formation**  
Omar Bartoli, Bernardo Cesare, Stefano Poli, Robert J. Bodnar, Antonio Acosta-Vigil, Maria Luce Frezzotti, and Sandro Meli
- 119 Determining gypsum growth temperatures using monophasic fluid inclusions—Application to the giant gypsum crystals of Naica, Mexico**  
Yves Krüger, Juan Manuel García-Ruiz, Àngels Canals, Dominik Martí, Martin Frenz, and Alexander E.S. Van Driessche
- 123 Biomarkers reveal the role of photic zone euxinia in exceptional fossil preservation: An organic geochemical perspective**  
Ines Melendez, Kliti Grice, Kate Trinajstić, Mojgan Ladjavardi, Paul Greenwood, and Katharine Thompson
- 127 Lipid biomarkers record fundamental changes in the microbial community structure of tropical seas during the Late Ordovician Hirnantian glaciation**  
Megan Rohrsen, Gordon D. Love, Woodward Fischer, Seth Finnegan, and David A. Fike
- 131 Variable history of Quaternary ice-sheet advance across the Beaufort Sea margin, Arctic Ocean**  
C.L. Batchelor, J.A. Dowdeswell, and J.T. Pietras
- 135 Copper, lead, and silver isotopes solve a major economic conundrum of Tudor and early Stuart Europe**  
Anne-Marie Desauty and Francis Albarede
- 139 Shear heating during distributed fracturing and pulverization of rocks**  
Yehuda Ben-Zion and Charles G. Sammis
- 142 ADDENDUM: Shear heating during distributed fracturing and pulverization of rocks**  
Yehuda Ben-Zion and Charles G. Sammis
- 143 Small-scale turbidity currents in a big submarine canyon**  
J.P. Xu, James P. Barry, and Charles K. Paull
- 147 Inferring sites of subglacial erosion using the Pb isotopic composition of ice-rafted feldspar: Examples from the Weddell Sea, Antarctica**  
M.J. Flowerdew, S. Tyrrell, and V.L. Peck
- 151 Lacustrine stable isotope record of precipitation changes in Nicaragua during the Little Ice Age and Medieval Climate Anomaly**  
Nathan D. Stansell, Byron A. Steinman, Mark B. Abbott, Michael Rubinov, and Manuel Roman-Lacayo
- 155 Provenance of North Atlantic ice-rafted debris during the last deglaciation—A new application of U-Pb rutile and zircon geochronology**  
David Small, Randall R. Parrish, William E.N. Austin, Peter A. Cawood, and Vincent Rinterknecht
- 159 Accelerated subglacial erosion in response to stick-slip motion**  
L.K. Zoet, R.B. Alley, S. Anandkrishnan, and K. Christianson
- 163 Direct dating of gold by radiogenic helium: Testing the method on gold from Diamantina, Minas Gerais, Brazil**  
Alexandre Raphael Cabral, Otto Eugster, Michael Brauns, Bernd Lehmann, Delia Rösel, Thomas Zack, Francisco Robério de Abreu, Ernst Pernicka, and Matthias Barth
- 167 Water mass denitrification during the latest Permian extinction in the Sverdrup Basin, Arctic Canada**  
Jochen Knies, Stephen E. Grasby, Benoit Beauchamp, and Carsten J. Schubert
- 171 Marine diversity in the geological record and its relationship to surviving bedrock area, lithofacies diversity, and original marine shelf area**  
Andrew B. Smith and Roger B.J. Benson
- 175 Recurrent Early Triassic ocean anoxia**  
S.E. Grasby, B. Beauchamp, A. Embry, and H. Sanei
- 179 Rapid Pliocene uplift of Timor**  
N. Nguyen, B. Duffy, J. Shulmeister, and M. Quigley
- 183 Influence of the Galápagos hotspot on the East Pacific Rise during Miocene superfast spreading**  
J. Geldmacher, T.W. Höfig, F. Hauff, K. Hoernle, D. Garbe-Schönberg, and D.S. Wilson
- 187 Eocene extension in Idaho generated massive sediment floods into the Franciscan trench and into the Tye, Great Valley, and Green River basins**  
Trevor A. Dumitru, W.G. Ernst, James E. Wright, Joseph L. Wooden, Ray E. Wells, Lucian P. Farmer, Adam J.R. Kent, and Stephan A. Graham
- 191 Earliest chitinozoans discovered in the Cambrian Duyun fauna of China**  
Cen Shen, Richard J. Aldridge, Mark Williams, Thijs R.A. Vandenbroucke, and Xi-guang Zhang
- 195 Slope and climate variability control of erosion in the Andes of central Chile**  
S. Carretier, V. Regard, R. Vassallo, G. Aguilar, J. Martinod, R. Riquelme, E. Pepin, R. Charrier, G. Hérail, M. Farias, J-L. Guyot, G. Vargas, and C. Lagane
- 199 Drainage capture and discharge variations driven by glaciation in the Southern Alps, New Zealand**  
Ann V. Rowan, Mitchell A. Plummer, Simon H. Brocklehurst, Merren A. Jones, and David M. Schultz

# GEOLOGY

FEBRUARY 2013 | VOLUME 41 | NUMBER 2

(continued)

- 203 Seismic reflection imaging of ultradeep roots beneath the eastern Aleutian island arc**  
Andrew J. Calvert and Susan E. McGeary
- 207 Explosive eruptions triggered by rockfalls at Kīlauea volcano, Hawai'i**  
Tim R. Orr, Weston A. Thelen, Matthew R. Patrick, Donald A. Swanson, and David C. Wilson
- 211 Reappraisal of the relationship between the northern Nevada rift and Miocene extension in the northern Basin and Range Province**  
Joseph P. Colgan
- 215 A microbial driver of chemical weathering in glaciated systems**  
Scott N. Montross, Mark Skidmore, Martyn Tranter, Anna-Liisa Kivimäki, and R. John Parkes
- 219 An extensive and dynamic ice sheet on the West Greenland shelf during the last glacial cycle**  
C. Ó Cofaigh, J.A. Dowdeswell, A.E. Jennings, K.A. Hogan, A. Kilfeather, J.F. Hiemstra, R. Noormets, J. Evans, D.J. McCarthy, J.T. Andrews, J.M. Lloyd, and M. Moros
- 223 Detrital zircon as a proxy for tracking the magmatic arc system: The California arc example**  
A.P. Barth, J.L. Wooden, C.E. Jacobson, and R.C. Economos
- 227 A detection of Milankovitch frequencies in global volcanic activity**  
Steffen Kutterolf, Marion Jegen, Jerry X. Mitrovica, Tom Kwasnitschka, Armin Freundt, and Peter J. Huybers
- 231 Extreme persistence of cratonic lithosphere in the southwest Pacific: Paleoproterozoic Os isotopic signatures in Zealandia**  
Alex J. McCoy-West, Vickie C. Bennett, Igor S. Puchtel, and Richard J. Walker
- 235 Aseismic plate boundary in the Indo-Burmese wedge, northwest Sunda Arc**  
Vineet K. Gahalaut, Bhaskar Kundu, Sunil Singh Laishram, Joshi Catherine, Arun Kumar, M. Devchandra Singh, R.P. Tiwari, R.K. Chadha, S.K. Samanta, A. Ambikapathy, P. Mahesh, Amit Bansal, and M. Narsaihan
- 239 Sequence stratigraphy and the resolution of the fossil record**  
Daniele Scarponi, Darrell Kaufman, Alessandro Amorosi, and Michał Kowalewski
- 243 Direct observations of degassing-induced crystallization in basalts**  
L. Jane Applegarth, Hugh Tuffen, Mike R. James, Harry Pinkerton, and Katharine V. Cashman
- 247 Very little water is necessary to make a dry solid silicate system wet**  
Ralf Milke, Gregor Neusser, Kornelia Kolzer, and Bernd Wunder
- 251 Explosive subglacial rhyolitic eruptions in Iceland are fuelled by high magmatic H<sub>2</sub>O and closed-system degassing**  
Jacqueline Owen, Hugh Tuffen, and David W. McGarvie
- 255 Jurassic accretionary complex and ophiolite from northeast Turkey: No evidence for the Cimmerian continental ribbon**  
Gültekin Topuz, Gönenc Göçmengil, Yann Rolland, Ö. Faruk Çelik, Thomas Zack, and Axel K. Schmitt
- 259 Refining paleoaltimetry reconstructions of the Sierra Nevada, California, using air parcel trajectories**  
Alex R. Lechler and Joseph Galewsky
- 263 Anthropogenic lead as a tracer of rock varnish growth: Implications for rates of formation**  
Michael N. Spilde, Leslie A. Melim, Diana E. Northup, and Penelope J. Boston
- 267 Small-mammal diversity in Spain during the late Pleistocene to early Holocene: Climate, landscape, and human impact**  
Juan Manuel López-García, Hugues-Alexandre Blain, Juan Ignacio Morales, Carlos Lorenzo, Sandra Bañuls-Cardona, and Gloria Cuenca-Bescós
- 271 Discovery of ultrahigh-temperature metamorphism in the Acadian orogen, Connecticut, USA**  
Jay J. Ague, James O. Eckert, Jr., Xu Chu, Ethan F. Baxter, and C. Page Chamberlain
- 275 Ecological effects of the Paleozoic-Modern faunal transition: Comparing predation on Paleozoic brachiopods and molluscs**  
Lindsey R. Leighton, Amelinda E. Webb, and Jennifer A. Sawyer
- 279 Diverse Sr isotope signatures preserved in mid-oceanic-ridge basalt plagioclase**  
Amy E. Lange, Roger L. Nielsen, Frank J. Tepley III, and Adam J.R. Kent
- 283 Thick evaporites and early rifting in the Guaymas Basin, Gulf of California**  
Nathaniel C. Miller and Daniel Lizarralde
- 287 RESEARCH FOCUS: Exceptional preservation of microbial lipids in Paleozoic to Mesoproterozoic sediments**  
Lorenz Schwark
