Society of Exploration Geophysicists
The international society of applied geophysics

VOL. 78, No. 5 | September-October 2013

EDITOR'S CORNER

This issue of **GEOPHYSICS**, *Tamas Nemeth, Editor*

1SO

TECHNICAL PAPERS

GEOPHYSICS LETTERS

Effect of noise in blending and deblending, *Guus Berkhout and Gerrit Blacquièrè* A35

On the use of a seismic sensor as a seismic source, *David F. Halliday, Taiwo Fawumi, Johan O. A. Robertsson, and Ed Kragh* A39

CASE HISTORIES

Application of the CSAMT method to groundwater exploration in a metropolitan environment, *Changmin Fu, Qingyun Di, and Zhiguo An* B201

Nonlinear diffusion-based interpretation of induced microseismicity: A Barnett Shale hydraulic fracturing case study, *Nicolas Hummel and Serge A. Shapiro* B211

Constraining depth to basement for mineral exploration using microtremor: A demonstration study from remote inland Australia, *Nicholas R. A. Smith, Anya M. Reading, Michael W. Asten, and Charles W. Funk* B227

Multifrequency full-waveform sonic logging in the screened interval of a large-diameter production well, *Majed Almalki, Brett Harris, and J. Christian Dupuis* B243

Thermoelectric self-potential and resistivity data localize the burning front of underground coal fires, *A. Revil, M. Karaoulis, S. Srivastava, and S. Byrdina* B259

Integrated geophysical investigation of the St. James Fault Complex: A case study, *Robert W. Jacob, Jeremy B. Byler, and Mary Beth Gray* B275

Challenges in geophysical mapping of glaciotectonic structures, *Anne-Sophie Høyer, Ingelise Møller, and Flemming Jørgensen* B287

Use of gravimetry in detailed geophysical prospection of potential geothermal energy exploitation sites: Case studies in the Czech Republic, *František Mantlík and Miloš Karous* B305

Integrated geophysical imaging of a concealed mineral deposit: A case study of the world-class Pebble porphyry deposit in southwestern Alaska, *Anjana K. Shah, Paul A. Bedrosian, Eric D. Anderson, Karen D. Kelley, and James Lang* B317

BOREHOLE GEOPHYSICS AND ROCK PROPERTIES

A transient-flow syringe air permeameter, *Stephen Brown and Martin Smith* D307

On the relationship between induced polarization and surface conductivity: Implications for petrophysical interpretation of electrical measurements, *Andreas Weller, Lee Slater, and Sven Nordsiek* D315

Modeling the pressure sensitivity of uncemented sediments using a modified grain contact theory: Incorporating grain relaxation and porosity effects, *Matthew Saul, David Lumley, and Jeffrey Shragge* D327

Quantifying uncertainties in attenuation estimation at methane-hydrate-bearing zones using sonic waveform logs, *Hiroyuki Suzuki and Jun Matsushima* D339

A physical basis for the Cole-Cole description of electrical conductivity of mineralized porous media, *Eirik G. Flekkøy* D355

Laboratory measurements of low- and high-frequency elastic moduli in Fontainebleau sandstone, *Emmanuel C. David, Jérôme Fortin, Alexandre Schubnel, Yves Guéguen, and Robert W. Zimmerman* D369

GEOPHYSICS®

VOL. 78, No. 5 | September-October 2013

Continued from front cover

- Mechanical properties of shale-gas reservoir rocks — Part 1: Static and dynamic elastic properties and anisotropy**, *Hiroki Sone and Mark D. Zoback* **D381**
- Mechanical properties of shale-gas reservoir rocks — Part 2: Ductile creep, brittle strength, and their relation to the elastic modulus**, *Hiroki Sone and Mark D. Zoback* **D393**
- ELECTRICAL AND ELECTROMAGNETIC METHODS**
- Using spatial derivatives of electromagnetic data to map lateral conductance variations in thin-sheet models: Applications over mine tailings ponds**, *Michal Kolaj and Richard Smith* **E225**
- Robust processing of noisy land-based controlled-source electromagnetic data**, *Rita Streich, Michael Becken, and Oliver Ritter* **E237**
- Detection of a perfect conductor with an airborne electromagnetic system: The Gemini Field Test**, *Adam Smiarowski and James Macnae* **E249**
- Sensitivity of the spectral induced polarization method to microbial enhanced oil recovery processes**, *Jeffrey Heenan, Abigail Porter, Dimitrios Ntarlagiannis, Lily Y. Young, Dale D. Werkema, and Lee D. Slater* **E261**
- ENGINEERING AND ENVIRONMENTAL GEOPHYSICS**
- Self-potential signals generated by the corrosion of buried metallic objects with application to contaminant plumes**, *J. B. Rittgers, A. Revil, M. Karaoulis, M. A. Mooney, L. D. Slater, and E. A. Atekwana* **EN65**
- GRAVITY EXPLORATION METHODS**
- Moho depth and sediment thickness estimation beneath the Red Sea derived from satellite and terrestrial gravity data**, *Ahmed Salem, Chris Green, Simon Campbell, J. Derek Fairhead, Lorenzo Cascone, and Lee Moorhead* **G89**
- GROUND-PENETRATING RADAR**
- Effects of magnetite on high-frequency ground-penetrating radar**, *Remke L. Van Dam, Jan M. H. Hendrickx, Nigel J. Cassidy, Ryan E. North, Mine Dogan, and Brian Borchers* **H1**
- MAGNETIC EXPLORATION METHODS**
- Combination of horizontal gradient ratio and Euler methods for the interpretation of potential field data**, *Guoqing Ma* **J53**
- Efficient 3D inversion of magnetic data via octree-mesh discretization, space-filling curves, and wavelets**, *Kristofer Davis and Yaoguo Li* **J61**
- An improved and stable downward continuation of potential field data: The truncated Taylor series iterative downward continuation method**, *HengLei Zhang, Dhananjay Ravat, and XiangYun Hu* **J75**
- PASSIVE SEISMIC METHODS**
- A seismic passive imaging step beyond SPAC and ReMi**, *Francesco Mulargia and Silvia Castellaro* **KS63**
- Locating microseismic sources using migration-based deconvolution**, *Jakob B. U. Haldorsen, Nicholas J. Brooks, and Mathieu Milenkovic* **KS73**
- POROELASTICITY**
- Biot constitutive relation and porosity perturbation equation**, *Pratap N. Sahay* **L57**
- Implications of pore microgeometry heterogeneity for the movement and chemical reactivity of CO₂ in carbonates**, *Stéphanie Vialle, Jack Dvorkin, and Gary Mavko* **L69**

GEOPHYSICS®

VOL. 78, No. 5 | September-October 2013

Embedded-bound method for estimating the change in bulk modulus under either fluid or solid substitution, Gary Mavko and Nishank Saxena L87

RESERVOIR GEOPHYSICS

Surface-consistent matching filters for time-lapse seismic processing, Mahdi H. Almutlaq and Gary F. Margrave M29

SEISMIC ATTRIBUTES AND PATTERN RECOGNITION

Wavelet spectral probe for seismic structure interpretation and fracture characterization: A workflow with case studies, Dengliang Gao O57

SEISMIC INTERFEROMETRY

Virtual Real Source: Source signature estimation using seismic interferometry, Jyoti Behura and Roel Snieder Q57

SEISMIC INVERSION

Sinkhole detection using 2D full seismic waveform tomography, Khiem T. Tran, Michael McVay, Michael Faraone, and David Horhota R175

High-resolution prestack seismic inversion using a hybrid FISTA least-squares strategy, Daniel O. Pérez, Danilo R. Velis, and Mauricio D. Sacchi R185

Multisource waveform inversion of marine streamer data using normalized wavefield, Yunseok Choi and Tariq Alkhalifah R197

Temporal windowing and inverse transform of the wavefield in the Laplace-Fourier domain, Sangmin Kwak, Hyunggu Jun, Wansoo Ha, and Changsoo Shin R207

SEISMIC MODELING AND WAVE PROPAGATION

Iterative solution of 3D acoustic wave equation with perfectly matched layer boundary condition and multigrid preconditioner, Guangdong Pan and Aria Abubakar T133

Prestack wavefield approximations, Tariq Alkhalifah T141

Sensitivity of compaction-induced multicomponent seismic time shifts to variations in reservoir properties, Steven Shawn Smith and Ilya Tsvankin T151

SEISMIC VELOCITY/STATICS

High-resolution coherency functionals for velocity analysis: An application for subbasalt seismic exploration, Andrea Tognarelli, Eusebio Stucchi, Alessia Ravasio, and Alfredo Mazzotti U53

Illumination compensation for image-domain wavefield tomography, Tongning Yang, Jeffrey Shragge, and Paul Sava U65

SIGNAL PROCESSING

Omnidirectional plane-wave destruction, Zhonghuan Chen, Sergey Fomel, and Wenkai Lu V171

Three-dimensional irregular seismic data reconstruction via low-rank matrix completion, Jianwei Ma V181

Improved wavefield reconstruction from randomized sampling via weighted one-norm minimization, Hassan Mansour, Felix J. Herrmann, and Özgür Yilmaz V193

Seismic data analysis by adaptive sparse time-frequency decomposition, Hamid Sattari, Ali Gholami, and Hamid R. Siahkoobi V207

Lossless compression method for acoustic waveform data based on wavelet transform and bit-recombination mark coding, Ming Cai, Wenxiao Qiao, Xiaodong Ju, Xiaohua Che, and Yuhong Zhao V219

GEOPHYSICS®

VOL. 78, No. 5 | September-October 2013

TUTORIALS AND EXPOSITORY DISCUSSIONS

Wiener estimation of the Green's function, *Anton Ziolkowski* W31

SPECIAL SECTION — SEISMIC ANISOTROPY

Seismic anisotropy in oil and gas exploration and development — Introduction,
Dirk Gajewski, Claudia Vanelle, Andrey Bakulin, and Abdulfattah Al-Dajani WC1

TECHNICAL PAPERS

Low-frequency layer-induced anisotropy, *A. Stovas, Y. Roganov, K. Duffaut, and A. J. Carter* WC3

Diffraction travelttime approximation for general anisotropic media, *Sergius Dell, Anna Pronevich, Boris Kashtan, and Dirk Gajewski* WC15

Seismic velocity changes caused by an overburden stress, *Valeri Korneev and Stanislav Glubokovskikh* WC25

True-amplitude Kirchhoff depth migration in anisotropic media: The travelttime-based approach, *Claudia Vanelle and Dirk Gajewski* WC33

Acoustic anisotropic wavefields through perturbation theory, *Tariq Alkhalifah* WC41

Multiparameter TTI tomography of P-wave reflection and VSP data, *Xiaoxiang Wang and Ilya Tsvankin* WC51

Two-point paraxial travelttime formula for inhomogeneous isotropic and anisotropic media: Tests of accuracy, *Umair bin Waheed, Ivan Pšenčík, Vlastislav Červený, Einar Iversen, and Tariq Alkhalifah* WC65

Moveout approximations for P- and SV-waves in VTI media, *Véronique Farra and Ivan Pšenčík* WC81

Reliability of the slowness and slowness-polarization methods for anisotropy estimation in VTI media from 3C walkaway VSP data, *Mehdi Asgharzadeh, Andrej Bóna, Roman Pevzner, Milovan Urosevic, and Boris Gurevich* WC93

Diffraction travelttime approximation for TI media with an inhomogeneous background, *Umair bin Waheed, Tariq Alkhalifah, and Alexey Stovas* WC103

Full-waveform inversion of multicomponent data for horizontally layered VTI media, *Nishant Kamath and Ilya Tsvankin* WC113

Joint migration velocity analysis of PP- and PS-waves for VTI media, *Pengfei Cai and Ilya Tsvankin* WC123

Fluid dependence of anisotropy parameters in weakly anisotropic porous media, *Olivia Collet and Boris Gurevich* WC137
