## EDITOR'S CORNER

This issue of **GEOPHYSICS**

IMA

## TECHNICAL PAPERS

### GEOPHYSICS LETTERS

- Cable arrangement to reduce electromagnetic coupling effects in spectral-induced polarization studies**, Myriam Schmutz, Ahmad Ghorbani, Pierre Vaudelet, and Amélie Blondel A1
- Ultrasonic leaky flexural waves in multilayered media: Cement bond detection for cased wellbores**, Xiao He, Hao Chen, and Xiuming Wang A7

### CASE HISTORIES

- Combination of seismic reflection and constrained resistivity inversion with an application to 4D imaging of the CO<sub>2</sub> storage site, Ketzin, Germany**, P. Bergmann, M. Ivandic, B. Norden, C. Rücker, D. Kiessling, S. Lüth, C. Schmidt-Hattenberger, and C. Juhlin B37
- Time-lapse walkaway vertical seismic profile monitoring for CO<sub>2</sub> injection at the SACROC enhanced oil recovery field: A case study**, Di Yang, Alison Malcolm, Michael Fehler, and Lianjie Huang B51
- Three-dimensional distribution of igneous rocks near the Pebble porphyry Cu-Au-Mo deposit in southwestern Alaska: Constraints from regional-scale aeromagnetic data**, Eric D. Anderson, Wei Zhou, Yaoguo Li, Murray W. Hitzman, Thomas Monecke, James R. Lang, and Karen D. Kelley B63
- Time-lapse seismic modeling for CO<sub>2</sub> sequestration at the Dickman Oilfield, Kansas**, Jintan Li, Christopher Liner, and Robert Stewart B81
- High-resolution 3D reflection seismic investigation over a quick-clay landslide scar in southwest Sweden**, Emil Lundberg, Alireza Malehmir, Christopher Juhlin, Mehrdad Bastani, and Magnus Andersson B97
- Coal seismic surveying over near-surface basalts: Experience from Central Queensland, Australia**, Binzhong Zhou, Peter Hatherly, Troy Peters, and Weijia Sun B109

### ANISOTROPY

- Azimuthally dependent anisotropic velocity model update**, Zvi Koren and Igor Ravve C27

### BOREHOLE GEOPHYSICS AND ROCK PROPERTIES

- Microresistivity borehole image inpainting**, Said Assous, Peter Elkington, and James Whetton D31
- Pyrolysis-induced P-wave velocity anisotropy in organic-rich shales**, Adam M. Allan, Tiziana Vanorio, and Jeremy E. P. Dahl D41
- Theory of CBM AVO: I. Characteristics of anomaly and why it is so**, Xin-Ping Chen, Quanming Huo, Jiandong Lin, Yang Wang, Fenjin Sun, Wuzhong Li, and Guizhong Li D55
- Power spectral density of the heterogeneous fracture compliance from scattered elastic wavefields**, Shohei Minato and Ranajit Ghose D67
- Simulated electrical conductivity response of clogging mechanisms for managed aquifer recharge**, A. Rowan Cockett and Adam Pidlisecky D81
- Quantitative analysis of neutron-capture gamma-ray energy spectra using direct demodulation**, Wu Wensheng, Niu Wei, and Luo Li D91
- Frequency-domain simulation of logging-while-drilling borehole sonic waveforms**, Pawel J. Matuszy and Carlos Torres-Verdin D99

# GEOPHYSICS®

VOL. 79, No. 2 | March-April 2014

*Continued from front cover*

<b>Rock-physics modeling guided by depositional and burial history in low-to-intermediate-porosity sandstones, Per Avseth, Tor Arne Johansen, Aiman Bakhorji, and Husam M. Mustafa</b>	D115
<b>Probabilistic approach to rock physics modeling, Dario Grana</b>	D123
<b>ELECTRICAL AND ELECTROMAGNETIC METHODS</b>	
<b>Anomalous phases in TE-mode magnetotellurics, Robert L. Parker</b>	E75
<b>Estimation of seafloor electromagnetic receiver orientation, Lutz Mütschard, Ketil Hokstad, and Bjørn Ursin</b>	E81
<b>The magnetotelluric transverse electric mode as a natural filter for static effects: Application to the COPROD2 and COPROD2S2 data sets, Enrique Gómez-Treviño, Francisco J. Esparza, Yunuhen Muñoz, and Armando Calderón</b>	E91
<b>3D inversion and resolution analysis of land-based CSEM data from the Ketzin CO<sub>2</sub> storage formation, Alexander V. Grayver, Rita Streich, and Oliver Ritter</b>	E101
<b>ENGINEERING AND ENVIRONMENTAL GEOPHYSICS</b>	
<b>Advancement and validation of surface nuclear magnetic resonance spin-echo measurements of T<sub>2</sub>, Elliot Grunewald, Rosemary Knight, and David Walsh</b>	EN15
<b>GRAVITY EXPLORATION METHODS</b>	
<b>Mapping crustal thickness using marine gravity data: Methods and uncertainties, Yongliang Bai, Simon E. Williams, R. Dietmar Müller, Zhan Liu, and Maral Hosseinpour</b>	G27
<b>MAGNETIC EXPLORATION METHODS</b>	
<b>Inversion of magnetic anomaly on rugged observation surface in the presence of strong remanent magnetization, Shu-Ling Li and Yaoguo Li</b>	J11
<b>A method to determine optimal grid parameters based on characteristic analysis of discrete data distribution, Changli Yao, Chen Zhang, Yuanman Zheng, and Yongmao Xie</b>	J21
<b>PASSIVE SEISMIC METHODS</b>	
<b>Full-waveform based microseismic source mechanism studies in the Barnett Shale: Linking microseismicity to reservoir geomechanics, Fuxian Song, Norm R. Warpinski, and M. Nafi Toksöz</b>	KS13
<b>POROELASTICITY</b>	
<b>Numerical modeling and laboratory measurements of seismic attenuation in partially saturated, rock, Maria Kuteynikova, Nicola Tisato, Ralf Jänicke, and Beatriz Quintal</b>	L13
<b>SEISMIC DATA ACQUISITION</b>	
<b>An alternative method for modeling close-range interactions between air guns, Daniel Barker and Martin Landrø</b>	P1
<b>SEISMIC INVERSION</b>	
<b>2D frequency-domain elastic full-waveform inversion using time-domain modeling and a multistep-length gradient approach, Kun Xu and George A. McMechan</b>	R41
<b>From tomography to full-waveform inversion with a single objective function, Tariq Alkhalifah and Yunseok Choi</b>	R55
<b>Elastic full-waveform inversion application using multicomponent measurements of seismic data collection, Denes Vigh, Kun Jiao, Dave Watts, and Dong Sun</b>	R63
<b>Velocity estimation via registration-guided least-squares inversion, Hyungsu Baek, Henri Calandra, and Laurent Demanet</b>	R79
<b>SEISMIC MIGRATION</b>	
<b>Diffraction imaging using shot and opening-angle gathers: A prestack time migration approach, Jianfeng Zhang and Jiangjie Zhang</b>	S23

VOL. 79, No. 2 | March-April 2014

*Continued from front cover*

<b>Linearized wave-equation migration velocity analysis by image warping</b> , <i>Francesco Perrone, Paul Sava, Clara Andreoletti, and Nicola Bienati</i>	S35
<b>Closing the performance gap between an iterative frequency-domain solver and an explicit time-domain scheme for 3D migration on parallel architectures</b> , <i>H. Knibbe, W. A. Mulder, C. W. Oosterlee, and C. Vuik</i>	S47
<b>Seismic reflector imaging using internal multiples with Marchenko-type equations</b> , <i>Evert Slob, Kees Wapenaar, Filippo Broggin, and Roel Snieder</i>	S63
<b>SEISMIC MODELING AND WAVE PROPAGATION</b>	
<b>Dispersion analysis of an average-derivative optimal scheme for Laplace-domain scalar wave equation</b> , <i>Jing-Bo Chen</i>	T37
<b>Shear-wave radiation, reception, and reciprocity of a borehole dipole source: With application to modeling of shear-wave reflection survey</b> , <i>Xiao-Ming Tang, Jing-ji Cao, and Zhou-tuo Wei</i>	T43
<b>The optimized expansion based low-rank method for wavefield extrapolation</b> , <i>Zedong Wu and Tariq Alkhalifah</i>	T51
<b>Multiscale modeling of acoustic wave propagation in 2D media</b> , <i>Richard L. Gibson, Kai Gao, Eric Chung, and Yalchin Efendiev</i>	T61
<b>Numerical modeling of 3D zero-offset laboratory data by a discretized Kirchhoff integral method</b> , <i>Anastasiya Tantsereva, Bjørn Ursin, Nathalie Favretto-Cristini, Paul Cristini, and Arkady M. Aizenberg</i>	T77
<b>A comparative study of finite element and spectral element methods in seismic wavefield modeling</b> , <i>Youshan Liu, Jiwen Teng, Haiqiang Lan, Xiang Si, and Xueying Ma</i>	T91
<b>SIGNAL PROCESSING</b>	
<b>High-order sparse Radon transform for AVO-preserving data reconstruction</b> , <i>Yaru Xue, Jitao Ma, and Xiaohong Chen</i>	V13
<b>Automatic source localization of diffracted seismic noise in shallow water</b> , <i>Wenkai Lu, Zhang Yingqiang, and Zhen Boran</i>	V23
<b>Blind deconvolution of multichannel recordings by linearized inversion in the spectral domain</b> , <i>Michael Behm and Bharath Shekar</i>	V33
<b>TUTORIALS AND EXPOSITORY DISCUSSIONS</b>	
<b>What is the depth of investigation of a resistivity measurement?</b> , <i>Enrique Gómez-Treviño and Francisco J. Esparza</i>	W1
