GEOPHYSICS®

Society of Exploration Geophysicists
The international society of applied geophysics

VOL. 79, No. 5 | September-October 2014

EDITOR'S CORNER

This issue of GEOPHYSICS, *Evert Slob, Editor* **1SO**

TECHNICAL PAPERS

GEOPHYSICS LETTERS

Frequency-domain acoustic-wave modeling with hybrid absorbing boundary conditions, *Roger M. Moreira, Marco A. Cetale Santos, Jorge L. Martins, Denis L. F. Silva, Raul B. V. Pessolani, Djalma M. S. Filho, and André Bulcão* **A39**

CASE HISTORIES

Hydrogeophysical investigations in the western and north-central Okavango Delta (Botswana) based on helicopter and ground-based transient electromagnetic data and electrical resistance tomography, *Philip Meier, Thomas Kalscheuer, Joel E. Podgorski, Lesego Kgotlhang, Alan G. Green, Stewart Greenhalgh, Lasse Rabenstein, Joseph Doetsch, Wolfgang Kinzelbach, Esben Auken, Peter Mikkelsen, Nikolaj Foged, Bashali Charles Jaba, Gomotsang Tshoso, and Onkgopotse Ntibinyane* **B201**

3D full tensor gradiometry and Falcon Systems data analysis for iron ore exploration: Baú Mine, Quadrilátero Ferrífero, Minas Gerais, Brazil, *Marco Antonio Braga, Issamu Endo, Henry Francisco Galbiatti, and Dionisio Uendro Carlos* **B213**

Application of seismic attributes and spectral decomposition for reservoir characterization of a complex fluvial system: Case study of the Carbonera Formation, Llanos foreland basin, Colombia, *Lucia Torrado, Paul Mann, and Janok Bhattacharya* **B221**

ANISOTROPY

Microseismic joint location and anisotropic velocity inversion for hydraulic fracturing in a tight Bakken reservoir, *Junlun Li, Chang Li, Scott A. Morton, Ted Dohmen, Keith Katahara, and M. Nafi Toksöz* **C111**

Fresnel volume and interface Fresnel zone for reflected and transmitted waves from a curved interface in anisotropic media, *Bjørn Ursin, Nathalie Favretto-Cristini, and Paul Cristini* **C123**

Modeling elastic anisotropy resulting from the application of triaxial stress, *Olivia Collet, Boris Gurevich, Mahyar Madadi, and Marina Pervukhina* **C135**

BOREHOLE GEOPHYSICS AND ROCK PROPERTIES

Diagnostics of seismic time-lapse effects of sandstones based on laboratory data, *Bernardo Moyano, Tor Arne Johansen, Remy Sverre Agersborg, and Kyle T. Spikes* **D275**

Pore-scale modeling of electrical resistivity and permeability in FIB-SEM images of organic mudrock, *Vahid Shabro, Shaina Kelly, Carlos Torres-Verdín, Kamy Sepehrnoori, and André Revil* **D289**

Electrical conductivity, induced polarization, and permeability of the Fontainebleau sandstone, *André Revil, Pauline Kessouri, and Carlos Torres-Verdín* **D301**

The effect of surface roughness and mixed-mode loading on the stiffness ratio κ_x/κ_z for fractures, *Min-Kwang Choi, Antonio Bobet, and Laura J. Pyrak-Nolte* **D319**

Fluid salinity, clay content, and permeability of rocks determined through complex resistivity partition fraction decomposition, *Alexandre Nunes Barreto and Carlos Alberto Dias* **D333**

ISSN 0016-8033 (print)
ISSN 1942-2156 (online)

Contents continued on inside front cover

GEOPHYSICS®

VOL. 79, No. 4 | July-August 2014

Continued from front cover

Measurements of elastic constants in anisotropic media, *Bradley C. Abell, Siyi Shao, and Laura J. Pyrak-Nolte* **D349**

1D radial inversion of multidetector logging-while-drilling Sigma measurements, *Edwin Ortega, Carlos Torres-Verdín, William E. Preeg, and Jeffrey Miles* **D363**

ELECTRICAL AND ELECTROMAGNETIC METHODS

Laboratory determination of the complex conductivity tensor of unconventional anisotropic shales, *William F. Woodruff, André Revil, and Carlos Torres-Verdín* **E183**

Multielevation calibration of frequency-domain electromagnetic data, *Burke J. Minsley, M. Andy Kass, Greg Hodges, and Bruce D. Smith* **E201**

Coseismic electromagnetic field due to the electrokinetic effect, *Naum I. Gershenzon, Gust Bambakidis, and Igor Ternovskiy* **E217**

Analytical solutions of EM fields due to a dipolar source inside an infinite casing, *Nestor H. Cuevas* **E231**

GRAVITY EXPLORATION METHODS

Automatic generation of 3D geophysical models using curvatures derived from airborne gravity gradient data, *Carlos Cevallos* **G49**

High-precision Fourier forward modeling of potential fields, *Leyuan Wu and Gang Tian* **G59**

Noise reduction procedures for gravity-gradiometer data, *Mark Pilkington and Pejman Shamsipour* **G69**

Fast gravity inversion of basement relief, *João B. C. Silva, Darcicléa F. Santos, and Karina P. Gomes* **G79**

INTERPRETATION METHODS

New method for estimating gas hydrate saturation in the Shenhu area, *Yajing Chen, Keh-Jim Dunn, Xuewei Liu, Manlin Du, and Xiong Lei* **IM11**

RESERVOIR GEOPHYSICS

Probabilistic lithofacies prediction from prestack seismic data in a heterogeneous carbonate reservoir, *Luanxiao Zhao, Jianhua Geng, Jiubing Cheng, De-hua Han, and Tonglou Guo* **M25**

Estimation of pressure-saturation changes for unconsolidated reservoir rocks with high VP/VS ratio, *Tuhin Bhakta and Martin Landrø* **M35**

SEISMIC INVERSION

Comparison of multifrequency selection strategies for simultaneous-source full-waveform inversion, *Amsalu Y. Anagaw and Mauricio D. Sacchi* **R165**

An algorithm adapting encoded simultaneous-source full-waveform inversion to marine-streamer acquisition data, *Woohyun Son, Sukjoon Pyun, Changsoo Shin, and Han-Joon Kim* **R183**

Laplace-Fourier-domain elastic full-waveform inversion using time-domain modeling, *Hyunggu Jun, Youngseo Kim, Jungkyun Shin, Changsoo Shin, and Dong-Joo Min* **R195**

Dynamic time warping — An improved method for 4D and tomography time shift estimation? *Jon Marius Venstad* **R209**

Bayesian inversion for effective pore-fluid bulk modulus based on fluid-matrix decoupled amplitude variation with offset approximation, *Xingyao Yin and Shixin Zhang* **R221**

GEOPHYSICS®

VOL. 79, No. 4 | July-August 2014

Continued from front cover

SEISMIC MIGRATION

Symplectic scheme and the Poynting vector in reverse-time migration, *Edvaldo S. Araujo, Reynam C. Pestana, and Adriano W. G. dos Santos* S163

3D PS-wave imaging with elastic reverse-time migration, *Qizhen Du, Xufei Gong, Mingqiang Zhang, Yitong Zhu, and Gang Fang* S173

Reducing the computer memory requirement for 3D reverse-time migration with a boundary-wavefield extrapolation method, *Sirui Tan and Lianjie Huang* S185

Least-squares reverse-time migration with a wavefield-separation imaging condition and updated source wavefields, *Sirui Tan and Lianjie Huang* S195

Generalized internal multiple imaging, *M. A. H. Zuberi and Tariq Alkhalifah* S207

Migration of primaries and multiples using an imaging condition for amplitude-normalized separated wavefields, *Alba Ordoñez, Walter Söllner, Tilman Klüver, and Leiv J. Gelius* S217

Curvatures and inhomogeneities: An improved common-reflection-surface approach, *Benjamin Schwarz, Claudia Vanelle, Dirk Gajewski, and Boris Kashtan* S231

SEISMIC MODELING AND WAVE PROPAGATION

Computationally efficient three-dimensional acoustic finite-difference frequency-domain seismic modeling in vertical transversely isotropic media with sparse direct solver, *Stephane Operto, Romain Brossier, Laure Combe, Ludovic Métivier, Alessandra Ribodetti, and Jean Virieux* T257

Seismic modeling by optimizing regularized staggered-grid finite-difference operators using a time-space-domain dispersion-relationship-preserving method, *Yanfei Wang, Wenquan Liang, Zuhair Nashed, Xiao Li, Guanghe Liang, and Changchun Yang* T277

SEISMIC VELOCITY/STATICS

Signal and traveltime parameter estimation using singular value decomposition, *Bjørn Ursin, Michelângelo G. Silva, and Milton J. Porsani* U1

SIGNAL PROCESSING

Sparse multichannel blind deconvolution, *Nasser Kazemi and Mauricio D. Sacchi* V143

Phase retrieval through regularization for seismic problems, *Ali Gholami* V153

2D and 3D prestack seismic data regularization using an accelerated sparse time-invariant Radon transform, *Ying-Qiang Zhang and Wen-Kai Lu* V165

Iterative deblending of simultaneous-source seismic data using seislet-domain shaping regularization, *Yangkang Chen, Sergey Fomel, and Jingwei Hu* V179

Multidimensional interpolation using a model-constrained minimum weighted norm interpolation, *Stephen K. Chiu* V191

TUTORIALS AND EXPOSITORY DISCUSSIONS

Review on improved seismic imaging with closure phase, *Gerard Schuster, Yunsong Huang, Sherif M. Hanafy, Min Zhou, Jianhua Yu, Ola Alhagan, and Wei Dai* W11

The value of spatial information for determining well placement: A geothermal example, *Whitney J. Trainor-Guitton, G. Michael Hoversten, Abelardo Ramirez, Jeffery Roberts, Egill Juliusson, Kerry Key, and Robert Mellors* W27

Федеральное государственное бюджетное учреждение науки Центральная научная библиотека Уральского отделения Российской академии наук (ЦНБ УрО РАН)

SPECIAL SECTION: ATTENUATION

Attenuation: Advances in analysis and estimation — Introduction, *Baishali Roy, Laurence Lines, Mike Batzle, and Jyoti Behura* **WBi**

Prediction of seismic wave dispersion and attenuation from ultrasonic velocity measurements, *Fuyong Yan, De-hua Han, Qiuliang Yao, and Luanxiao Zhao* **WB1**

Laboratory measurements of seismic attenuation in sandstone: Strain versus fluid saturation effects, *Nicola Tisato and Beatriz Quintal* **WB9**

Sensitivity of S-wave attenuation to the connectivity of fractures in fluid-saturated rocks, *Beatriz Quintal, Ralf Jänicke, J. Germán Rubino, Holger Steeb, and Klaus Holliger* **WB15**

Point-source radiation in attenuative anisotropic media, *Bharath Shekar and Ilya Tsvankin* **WB25**

Quantifying the effect of capillarity on attenuation and dispersion in patchy-saturated rocks, *Qiaomu Qi, Tobias M. Müller, Boris Gurevich, Sofia Lopes, Maxim Lebedev, and Eva Caspari* **WB35**

Kirchhoff modeling for attenuative anisotropic media using Gaussian beams, *Bharath Shekar and Ilya Tsvankin* **WB51**
