GEOPHYSICS®

Society of Exploration Geophysicists
The international society of applied geophysics

VOL. 79, No. 6 | November-December 2014

EDITOR'S CORNER

This issue of **GEOPHYSICS**, *Evert Slob, Editor*

IND

TECHNICAL PAPERS

GEOPHYSICS LETTERS

- Inversion of gravity data with isostatic constraints**, *Ahmed Salem, Chris Green, Matthew Stewart, and Davide De Lerma* A45
- Solid-phase bulk modulus and microinhomogeneity parameter from quasistatic compression experiments**, *Tobias M. Müller and Pratap N. Sahay* A51
- Moment and moment magnitude of seismic events located by stacking**, *Robert Cieplicki, Leo Eisner, and Mike Mueller* A57

CASE HISTORIES

- Self-potential monitoring for hydrologic investigations in urban covered-karst terrain**, *Peter B. Bumpus and Sarah E. Kruse* B231
- Time-lapse difference static correction using prestack crosscorrelations: 4D seismic image enhancement case from Ketzin**, *Peter Bergmann, Artem Kashubin, Monika Ivandic, Stefan Lüth, and Christopher Juhlin* B243

BOREHOLE GEOPHYSICS AND ROCK PROPERTIES

- Quadrature conductivity: A quantitative indicator of bacterial abundance in porous media**, *Chi Zhang, André Revil, Yoshiko Fujita, Junko Munakata-Marr, and George Redden* D363
- Fractal dimension of pore-space geometry of an Eocene sandstone formation**, *Zeyu Zhang and Andreas Weller* D377
- Estimating the influence of stress state on compaction behavior**, *Matt R. Hauser, Brent A. Couzens-Schultz, and Alvin W. Chan* D389
- Impact of change in pore-fill material on P-wave velocity**, *Nishank Saxena and Gary Mavko* D399
- A technique to eliminate the azimuth ambiguity in single-well imaging**, *Yi-de Zhang and Hengshan Hu* D409
- Seismic modeling of low-frequency "shadows" beneath gas reservoirs**, *Elmira Chabyshova and Gennady Goloshubin* D417
- Determining fractal dimension from nuclear magnetic resonance data in rocks with internal magnetic field gradients**, *Hugh Daigle, Andrew Johnson, and Brittney Thomas* D425
- The influence of grain shape and volume fraction of sheet silicates on elastic properties of aggregates: Biotite platelets in an isotropic matrix**, *Roman Vasin, Ricardo A. Lebensohn, Siegfried Matthies, Carlos N. Tomé, and Hans-Rudolf Wenk* D433

ELECTRICAL AND ELECTROMAGNETIC METHODS

- Footprint for frequency-domain airborne electromagnetic systems**, *Changchun Yin, Xin Huang, Yunhe Liu, and Jing Cai* E243
- A finite-element-based domain-decomposition approach for plane wave 3D electromagnetic modeling**, *Zhengyong Ren, Thomas Kalscheuer, Stewart Greenhalgh, and Hansruedi Maurer* E255
- 3D marine magnetotelluric modeling and inversion with the finite-difference time-domain method**, *Sébastien de la Kethulle de Ryhove and Rune Mittet* E269
- A finite-volume solution to the geophysical electromagnetic forward problem using unstructured grids**, *Hormoz Jahandari and Colin G. Farquharson* E287

GEOFYSICS®

VOL. 79, No. 6 | November-December 2014

Continued from front cover

- Three-dimensional modeling of IP effects in time-domain electromagnetic data**, *David Marchant, Eldad Haber, and Douglas W. Oldenburg* E303
- Fast multimodel finite-difference controlled-source electromagnetic simulations based on a Schur complement approach**, *Piyooosh Jaysaval, Daniil Shantsev, and Sébastien de la Kethulle de Ryhove* E315
- Imparting a phase during excitation for improved resolution in surface nuclear magnetic resonance**, *Denys Grombacher, Jan O. Walbrecker, and Rosemary Knight* E329
- On the electromagnetic response of a resistive cylinder buried in a conductive host**, *Andrei Swidinsky* E341
- Spectral induced polarization of clay-sand mixtures: Experiments and modeling**, *Gonca Okay, Phillipe Leroy, Ahmad Ghorbani, Phillipe Cosenza, Christian Camerlynck, Justo Cabrera, Nicolas Florsch, and André Revil* E353
- ENGINEERING AND ENVIRONMENTAL GEOPHYSICS**
- Electrochemical spectral induced polarization modeling of artificial sulfide-sand mixtures**, *Edmundo Placencia-Gómez and Lee D. Slater* EN91
- Full-wavefield inversion of surface waves for mapping embedded low-velocity zones in permafrost**, *Shan Dou and Jonathan B. Ajo-Franklin* EN107
- Self-potential signals from pumping tests in laboratory experiments**, *Suzan S. Vasconcelos, Carlos A. Mendonça, and Nilton Silva* EN125
- GEOPHYSICAL SOFTWARE AND ALGORITHMS**
- Combined modeling and smooth inversion of gravity data from a faulted basement relief**, *Williams A. Lima and João B. C. Silva* F1
- MAGNETIC EXPLORATION METHODS**
- On the estimation of the structural index from low-pass filtered magnetic data**, *Giovanni Florio, Maurizio Fedi, and Roman Pašteka* J67
- Using an equivalent source with positivity for low-latitude reduction to the pole without striation**, *Yaoguo Li, Misac Nabighian, and Douglas W. Oldenburg* J81
- MINING GEOPHYSICS**
- Magnetic field analysis of Morro do Leme nickel deposit**, *Vinicius Hector Abud Louro, Marta Silvia Maria Mantovani, and Vanessa Biondo Ribeiro* K1
- PASSIVE SEISMIC METHODS**
- The potential of imaging subsurface heterogeneities by natural local earthquakes**, *Yohei Nishitsuji, Issei Doi, and Deyan Draganov* KS43
- Joint location of microseismic events in the presence of velocity uncertainty**, *Oleg V. Poliannikov, Michael Prange, Alison E. Malcolm, and Hugues Djikpesse* KS51
- Picking versus stacking in a modern microearthquake location: Comparison of results from a surface passive seismic monitoring array in Oklahoma**, *Jeremy D. Pesicek, Duncan Child, Brad Artman, and Konrad Ciešlik* KS61
- POROELASTICITY**
- Frequency-dependent attenuation and elasticity in unconsolidated earth materials: Effect of damping**, *Yunqing Hu, Hernán A. Makse, John J. Valenza, and David L. Johnson* L41
- SEISMIC DATA ACQUISITION**
- Systematic simulation of multicomponent receiver coupling to the seafloor using rheological models**, *Marcus Landschulze, Rolf Mjælde, and Karin Landschulze* P9
- Azimuth-dependent ocean bottom cable receiver coupling to the seafloor**, *Marcus Landschulze and Rolf Mjælde* P21

GEOFYSICS®

VOL. 79, No. 6 | November-December 2014

Continued from front cover

SEISMIC INVERSION

- Stochastic inversion of seismic PP and PS data for reservoir parameter estimation, *Jinsong Chen and Michael E. Glinsky* R233
- The role of attenuation in 2D full-waveform inversion of shallow-seismic body and Rayleigh waves, *Lisa Groos, Martin Schäfer, Thomas Forbriger, and Thomas Bohlen* R247

SEISMIC MIGRATION

- Acquisition aperture correction in the angle domain toward true-reflection reverse time migration, *Rui Yan, Huimin Guan, Xiao-Bi Xie, and Ru-Shan Wu* S241
- Attenuation compensation for least-squares reverse time migration using the viscoacoustic-wave equation, *Gaurav Dutta and Gerard T. Schuster* S251
- Reverse time migration of multiples: Eliminating migration artifacts in angle domain common image gathers, *Yibo Wang, Yikang Zheng, Lele Zhang, Xu Chang, and Zhenxing Yao* S263
- Amplitude-preserving reverse time migration: From reflectivity to velocity and impedance inversion, *Yu Zhang, Andrew Ratcliffe, Graham Roberts, and Lian Duan* S271

SEISMIC MODELING AND WAVE PROPAGATION

- Wave equation processing using finite-difference propagators, Part 1: Wavefield dissection and imaging of marine multicomponent seismic data, *Lasse Amundsen and Johan O. A. Robertsson* T287
- Wave equation processing using finite-difference propagators, Part 2: Deghosting of marine hydrophone seismic data, *Johan O. A. Robertsson and Lasse Amundsen* T301
- Application of unsplit convolutional perfectly matched layer for scalar arbitrarily wide-angle wave equation, *Hanming Chen, Hui Zhou, and Yanqi Li* T313
- Small-scale physical modeling of seismic-wave propagation using unconsolidated granular media, *Ludovic Bodet, Amine Dhemaied, Roland Martin, Régis Mourgues, Fayçal Rejiba, and Vincent Tournat* T323
- Accurate simulations of pure quasi-P-waves in complex anisotropic media, *Sheng Xu and Hongbo Zhou* T341
- An improved optimal nearly analytical discretized method for 2D scalar wave equation in heterogeneous media based on the modified nearly analytical discrete operator, *Yushu Chen, Guojie Song, Zhihui Xue, Hao Jing, Haohuan Fu, and Guangwen Yang* T349
- Solving the 3D acoustic wave equation on generalized structured meshes: A finite-difference time-domain approach, *Jeffrey Shragge* T363

SEISMIC VELOCITY/STATICS

- Horizon-based semiautomated nonhyperbolic velocity analysis, *Bo Zhang, Tao Zhao, Jie Qi, and Kurt J. Marfurt* U15

SIGNAL PROCESSING

- Estimating VP/VS ratios using smooth dynamic image warping, *Stefan Compton and Dave Hale* V201
- Wavelet balancing for residual moveouts, *William S. Harlan* V217
