High Temperatures-High Pressures

Volume 42, Number 4, 2013

Special Issue

**Kinetic Effects in Thermophysical Property
Measurements and Process Simulation**

Guest Editor

Wolfgang Hohenauer

Editorial WOLFGANG HOHENAUER	257
Kinetic modelling of thermal de-binding and sintering of pure Cu, Fe12Cu and W8Ni2Cu WOLFGANG HOHENAUER, DANIEL LAGER AND IJAZ UL MOHSIN	259
Initial kinetic parameters for the model-based kinetic method ELENA MOUKHINA	287
The kinetic field – a versatile tool for prediction and analysis of heating processes FRIEDRICH RAETHER	303
Improvement of thermo-physical data of pure Cu, Fe12Cu and W8Ni2Cu during and after sintering using kinetic modelling WOLFGANG HOHENAUER, DANIEL LAGER AND IJAZ UL MOHSIN	321
Comparative study of the sintering kinetic of alumina by kinetic field of response, master curve and thermokinetic ROLAND NEHER, TIM GESTRICH, JENS KLIMKE AND MATHIAS HERRMANN	349
Kinetic study of crystallization titanium substituted barium hexaferrite in a glassy matrix of the system BaO-Fe₂O₃-TiO₂-B₂O₃ P. QUIROZ AND B. HALBEDEL	367
Thermokinetic study of the reduction process of a CuO/ZnAl₂O₄ catalyst ANDREY TARASOV, STEFANIE KÜHL, JULIA SCHUMANN AND MALTE BEHRENS	377

ISSN: 0018-1544 • HTHP 42(4) 257-386 (2013)
