High Temperatures-High Pressures

Volume 43, Number 4, 2014

- Application of the corresponding states principle for density predictions based on melting point constants** 253
M. KIANI, N. AZIZI, R. BEHJATMANESH-ARDAKANI AND M. M. ALAVIANMEHR
- Size and shape dependent thermoelastic properties of nanomaterials** 267
GEETA SHARMA AND MUNISH KUMAR
- The bending strength of bulk polycrystalline alumina from room temperature to melting point** 285
TIANBAO CHENG, WEIGUO LI, QINGMING LI, HAIBO KOU AND DAINING FANG
- Molecular dynamics simulation for the Soret effect of air near the critical point** 297
SEIJI FUJIWARA, SEIICHI TANAKA AND KANJI KUNIMINE
- Thermal performance of a single phase natural circulation mini loop working with nanofluid** 311
ALPASLAN TURGUT AND SERKAN DOGANAY
- DC and AC scanning thermal microscopy using micro-thermoelectric probe** 321
ALEXIA BONTEMPI, LAURENT THIERY, DAMIEN TEYSSIEUX, DANICK BRIAND AND PASCAL VAIRAC

ISSN: 0018-1544 • HTHP 43(4) 253-332 (2014)
