

THE HOLOCENE

an interdisciplinary journal
focusing on recent
environmental change

VOLUME 23, NUMBER 6, 2013

Editor: John A Matthews

Contents

Research papers

- A 950 yr temperature reconstruction from Duckhole Lake, southern Tasmania, Australia 771
KM Saunders, M Grosjean and DA Hodgson
- Holocene lake-level fluctuations in Lakes Keilambete and Gnotuk, southwestern Victoria, Australia 784
Daniel Wilkins, Chris Gouramanis, Patrick De Deckker, L Keith Fifield and Jon Olley
- Holocene development and geomorphic processes at Omnsbreen, southern Norway: Evidence for glacier-permafrost interactions 796
Karianne S Lilleøren, Ole Humlum, Atle Nesje and Bernd Etzelmüller
- Shieling activity in the Norse Eastern Settlement: Palaeoenvironment of the 'Mountain Farm', Vatnahverfi, Greenland 810
Paul M Ledger, Kevin J Edwards and J Edward Schofield
- 800 years of vegetation change, fire and human settlement in the Sierra Nevada of California, USA 823
R Scott Anderson and Roger D Stillick Jr
- Phytolith evidence of mid-Holocene Capsian subsistence economies in North Africa 833
Julie Shipp, Arlene Rosen and David Lubell
- Replicated stalagmite-inferred centennial- to decadal-scale monsoon precipitation variability in southwest China since the mid Holocene 841
Xiuyang Jiang, Yaoqi He, Chuan-Chou Shen, Zhizhong Li and Ke Lin
- Influence of the Kuroshio Current intrusion on Holocene environmental transformation in the South China Sea 850
Jianguo Liu, Tiegang Li, Rong Xiang, Muhong Chen, Wen Yan, Zhong Chen and Fang Liu
- Fluctuations of sediment accumulation rates in front of an Arctic delta in Greenland 860
Jørn Bjarke Torp Pedersen, Aart Kroon, Bjarne Holm Jakobsen, Sebastian H Mernild, Thorbjørn Joest Andersen and Camilla Snowman Andresen
- Biodiversity variability across elevations in the Carpathians: Parallel change with landscape openness and land use 869
Angelica Feurdean, Catherine L Parr, Ioan Tanțău, Sorina Fărcaș, Elena Marinova and Ioana Perșoiu

Research reports

- Holocene climate variability reflected in diatom-derived sea surface temperature records from the subpolar North Atlantic 882
Katie R Miller and Mark R Chapman
- Mollusks as indicators of historical changes in an estuarine-lagoonal system (Cananéia-Iguape, SE Brazil) 888
Sergio Martínez, Michel M Mahiques and Leticia Burone

Research review

- Grass páramo as hunter-gatherer landscape 898
Stuart White

Holocene book review

- Drought: Past Problems and Future Scenarios 916

Impact factor 2.595
