

THE HOLOCENE

an interdisciplinary journal
focusing on recent
environmental change

VOLUME 23, NUMBER 11, 2013

Editor: John A Matthews

Contents

Research papers

- Quantitative reconstruction of mid- to late-Holocene climate in NE China from peat cellulose stable oxygen and carbon isotope records and mechanistic models 1507
Shi-Yong Yu
- A palynological contribution to the environmental archaeology of a Mediterranean mountain wetland (North West Apennines, Italy) 1517
Maria A Guido, Bruna I Menozzi, Cristina Bellini, Sandra Placereani and Carlo Montanari
- Forest disturbance, arboriculture and the adoption of rice in the Kelabit Highlands of Sarawak, Malaysian Borneo 1528
Samantha E Jones, Chris O Hunt, Huw Barton, Carol J Lentfer and Paula J Reimer
- Evidence of moist niches in the Bolivian Andes during the mid-Holocene arid period 1547
Marie-Pierre Ledru, Vincent Jomelli, Laurent Bremond, Teresa Ortuño, Pablo Cruz, Ilhem Bentaleb, Florence Sylvestre, Adèle Kuentz, Stephan Beck, Céline Martin, Christine Paillès and Sandrine Subitani
- Human-landscape interactions in the Bologna area (northern Italy) during the mid-late Holocene, with focus on the Roman period 1560
Luigi Bruno, Alessandro Amorosi, Renata Curina, Paolo Severi and Remo Bitelli
- High-resolution palynology, climate change and human impact on a late Holocene peat bog on Haida Gwaii, British Columbia, Canada 1572
Matthew JW Huntley, Rolf W Mathewes and William Shotyk
- Palaeoenvironmental implications of the prehistorical catastrophes in relation to the Lajia Ruins within the Guanting Basin along the Upper Yellow River, China 1584
Chun Chang Huang, Jiangli Pang, Yali Zhou, Hongxia Su, Yuzhu Zhang and Longsheng Wang
- Postglacial spatiotemporal peatland initiation and lateral expansion dynamics in North America and northern Europe 1596
Meri Ruppel, Minna Väiliranta, Tarmo Virtanen and Atte Korhola
- Late Weichselian and Holocene sedimentary palaeoenvironment and glacial activity in the high-arctic van Keulenfjorden, Spitsbergen 1607
Philipp Kempf, Matthias Forwick, Jan Sverre Laberg and Tore O Vorren
- Ecosystem service provision sets the pace for pre-Hispanic societal development in the central Andes 1619
William D Gosling and Joseph J Williams
- Determining the long-term changes in biodiversity and provisioning services along a transect from Central Europe to the Mediterranean 1625
Daniele Colombaroli and Willy Tinner
- Research review**
- Nutrient cycling in the palaeorecord: Fluxes from terrestrial to aquatic ecosystems 1635
Kendra K McLaughlan, Joseph J Williams and Daniel R Engstrom
- Research report**
- Phytolith evidence for the extent and nature of prehistoric Californian grasslands 1644
Rand R Evett and James W Bartolome
- Forum article**
- The effect of calibration data set selection on quantitative palaeoclimatic reconstructions 1650
J Sakari Salonen, Heikki Seppä and H John B Birks
- Holocene book review**
- The Oxford Handbook of Wetland Archaeology 1655
