MAGAZINE

## Intelligent Systems Enhance Our Lives

CREATING NEW MARKETS FOR INDUSTRY  
FUELING SUSTAINABILITY  
GROUND VEHICLE ELECTRIFICATION IN THE U.S. ARMY  
FLYING CARS

IEEE

## FEATURES

### 2 Public-Private Partnerships

Creating new markets for industry, encouraging social engagement, and improving quality of life.  
Howard Bandler

### 11 Fueling Sustainability

The exponential impact of empowering off-grid communities.

Robin Podmore, Ray Larsen, Henry Louie, Nathan Johnson, and Shammya Saha

### 18 Front Lines Against the Darkness

Enhancing the resilience of the electricity grid through microgrid facilities.

Amin Gholami, Farrokh Aminifar, and Mohammad Shahidehpour

### 25 Enabling Smart Grid Cosimulation Studies

Rapid design and development of the technologies and controls.

Timothy M. Hansen, Rahul Kadavil, Bryan Palmintier, Siddharth Suryanarayanan, Anthony A. Maciejewski, Howard Jay Siegel, Edwin K.P. Chong, and Elaine Hale

### 33 Toward Ground Vehicle Electrification in the U.S. Army

An overview of recent activities.

M. Abul Masrur

### 46 Flying Cars

Challenges and propulsion strategies.

Kaushik Rajashekara, Qingchun Wang, and Kouki Matsuse

**MISSION STATEMENT:** *IEEE Electrification Magazine* is dedicated to disseminating information on all matters related to microgrids onboard electric vehicles, ships, trains, planes, and off-grid applications. Microgrids refer to an electric network in a car, a ship, a plane, or an electric train, which has a limited number of sources and multiple loads. Off-grid applications include small-scale electricity supply in areas away from high-voltage power networks. Feature articles focus on advanced concepts, technologies, and practices associated with all aspects of electrification in the transportation and off-grid sectors from a technical perspective in synergy with nontechnical areas such as business, environmental, and social concerns.

*IEEE Electrification Magazine* (ISSN 2325-5987) (IEMEEM) is published quarterly by the Institute of Electrical and Electronics Engineers, Inc. Headquarters: 3 Park Avenue, 17th Floor, New York, NY 10016-5997 USA. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. IEEE Operations Center (for orders, subscriptions, address changes): 445 Hoes Lane, Piscataway, NJ 08854 USA. Telephone: +1 732 981 0060, +1 800 678 4333. Individual copies: IEEE members US\$20.00 (first copy only), nonmembers US\$123.00 per copy. Subscription rates: Society members included with membership dues. Subscription rates available upon request. Copyright and reprint permissions: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy beyond the limits of U.S. Copyright law for the private use of patrons 1) those post-1977 articles that carry a code at the bottom of the first page, provided the per-copy fee indicated in the code is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923 USA; 2) pre-1978 articles without fee. For other copying, reprint, or republication permission, write Copyrights and Permissions Department, IEEE Operations Center, 445 Hoes Lane, Piscataway, NJ 08854 USA.
