FEATURE ARTICLES

Integrin Targeted Gold Nanoparticles Potentiate Cancer Radiation Sensitivity 4
Synthesizing and modifying gold nanorods to target cancer cells.
I-CHUN YEH, PEI-WEN WANG, HSIN-YI LIU, PING-CHING WU, JENN-REN HSIAO, AND DAR-BIN SHIEH

Surface Plasmon Resonance Sensing 16
Periodic metallic nanostructures for high-sensitivity biosensing applications.
KUANG-LI LEE AND PEI-KUEN WEI

Carbon Nanotube Alignment Using Dielectrophoresis 24
A design guideline for realizing future multiwalled carbon nanotube-based devices.
HUSEIN ROKADIA, MATTHEW GORDON, AND STEVE TUNG

Carbon Nanotube–Silicon Solar Cells 34
Improving performance for next-generation energy systems.
KEHANG CUI AND SHIGEO MARUYAMA
