THE MAGAZINE FOR HIGH-TECH INNOVATORS

July/August 2016, Vol. 35 No. 4

Getting Smart About Manufacturing

In this issue

- Smart assembly for soft bioelectronics
- LEGO-like microassembly
- Complex and intelligent systems
- SMART foundry 2020

IEEE potentials

THE MAGAZINE FOR HIGH-TECH INNOVATORS

July/August 2016
Vol. 35 No. 4

THEME: SMART MANUFACTURING

- 7** **Advanced/smart manufacturing:
From nanoscale to megascale**
Sharad Sinha
- 9** **Smart assembly for soft bioelectronics**
Chi Hwan Lee
- 14** **LEGO-like microassembly
using reversible dry adhesion**
Seok Kim
- 18** **An overview of 3-D printing in the manufacturing,
aerospace, and automotive industries**
Choon Wee Joel Lim, Kim Quy Le, Qingyang Lu,
and Chee How Wong
- 23** **Complex and intelligent systems in manufacturing**
Siwei Jiang, Chi Xu, Abhishek Gupta, Liang Feng,
Yew-Soon Ong, Allan Nengsheng Zhang, and Puay Siew Tan
- 29** **SMART foundry 2020**
B. Ravi
- 33** **Exposure optimization in scanning laser lithography**
Andrew J. Fleming, Adrian G. Wills, and Ben S. Routley

FEATURES

- 40** **Wireless sensor devices in sports performance**
By Róisín Howard
- 43** **Homebuilt: A glove-operated robot**
By Gaurav Gautam

ON THE COVER: Make way for the rise of smart manufacturing.

HANDSHAKE: ©ISTOCKPHOTO/WHANWHANAI.

DEPARTMENTS & COLUMNS

- 3** editorial
4 the way ahead
5 gamesman solutions
47 blue notes
48 gamesman problems

MISSION STATEMENT: *IEEE Potentials* is the magazine dedicated to undergraduate and graduate students and young professionals. *IEEE Potentials* explores career strategies, the latest in research, and important technical developments. Through its articles, it also relates theories to practical applications, highlights technology's global impact, and generates international forums that foster the sharing of diverse ideas about the profession.
