Features

- 32 Projecting the Evolution of Power Electronics**
Highlights from FEPPCON VIII
Ashok Bindra
- 45 Supercapacitors Improve the Performance of Linear Power-Management Circuits**
Unique new design options when capacitance jump from micro-farads to farads with a low equivalent series resistance
Nihal Kularatna
- 60 Some Effects of Weak Magnetic Fields on Biological Systems**
RF fields can change radical concentrations and cancer cell growth rates
Frank Barnes and Ben Greenebaum

On the cover

Our first feature article, "Projecting the Evolution of Power Electronics," presents highlights from the eighth International Workshop on the Future of Electronic Power Processing and Conversion (FEPPCON) held at the Grand Hotel Majestic in scenic Lago Maggiore, Verbania, Italy, in September 2015.
