PAPERS	
Parametric Dictionary Learning for Sparsity-Based TWRI in Multipath Environments	532
Modeling of Target Motion Constrained on Straight Line	548
Noncooperative Registration for Multistatic Passive Radars	563
Instantaneous Doppler Signature Extraction from within a Spectrogram Image of a VHF Band	576
Piecewise LFM Waveform for MIMO Radar	590
Polarimetric Detection and Range Estimation of a Point-Like Target	603
Target Location and Height Estimation via Multipath Signal and 2D Array for Sky-Wave Over-the-Horizon Radar	617
Open Set Recognition for Automatic Target Classification With Rejection	632
Motion-Parameter Estimation for Precession-With-Nutation Space Targets Based on Wideband Radar Measurements ..	643
Fast Imaging Method for Security Systems using Ultrawideband Radar	658
Fast Adaptive Guidance Against Highly Maneuvering Targets	671
Design of a Tolerant Flight Control System in Response to Multiple Actuator Control Signal Faults Induced by Cosmic Rays	681
Radar Phase Noise Modeling and Effects-Part I: MTI Filters	698
Radar Phase Noise Modeling and Effects-Part II: Pulse Doppler Processors and Sidelobe Blankers	712
Fault Detection and Exclusion Using Solution Separation and Chi-Squared ARAIM	726
Target TOA Association With the Hough Transform in UWB Radars	743
Micro-Doppler Interference Removal via Histogram Analysis in Time-Frequency Domain	755
GPS-Based Onboard Real-Time Orbit Determination for LEO Satellites Using Consider Kalman Filter	769
Fuzzy Control for Neighboring Extremals in Midcourse Rocket Guidance	778
Holism-Based Features for Target Classification in Focused and Complex-Valued Synthetic Aperture Radar Imagery	786
Jointly Optimal Design for MIMO Radar Frequency-Hopping Waveforms Using Game Theory	809
Platform Skin Return and Multiple-Element Linear Retrodirective Cross-Eye Jamming	821
Antispoofing RAIM for Dual-Recursion Particle Filter of GNSS Calculation	836
Global Attitude/Position Estimation Using Landmark and Biased Velocity Measurements	852
The Modified Feature Subsets Ensemble Applied for the Mach Number Prediction in Wind Tunnel	863
Cross-Eye Gain in Multiloop Retrodirective Cross-Eye Jamming	875
Onboard Fuzzy Logic Approach to Active Fire Detection in Brazilian Amazon Forest	883
Autonomous Ship Deck Landing of a Quadrotor Using Invariant Ellipsoid Method	891
Dual Smoothing DOA Estimation of Two-Channel FMCW Radar	904
Low Latency Digital Beamforming Radar Using Aperture Coding	918
Fast, Simultaneous Optimization of Power Amplifier Input Power and Load Impedance for Power-Added Efficiency and Adjacent-Channel Power Ratio Using the Power Smith Tube	928
CORRESPONDENCE	
Force and Moment Blending Control for Fast Response of Agile Dual Missiles	938
Optimality of Augmented Ideal Proportional Navigation for Maneuvering Target Interception	948
Controllability of Spacecraft Using Only Magnetic Torques	954
K-Clutter plus Noise Parameter Estimation Using Fractional Positive and Negative Moments	961
Technical Areas and Editors	968
