A PUBLICATION OF THE IEEE MAGNETICS SOCIETY

MAY 2016

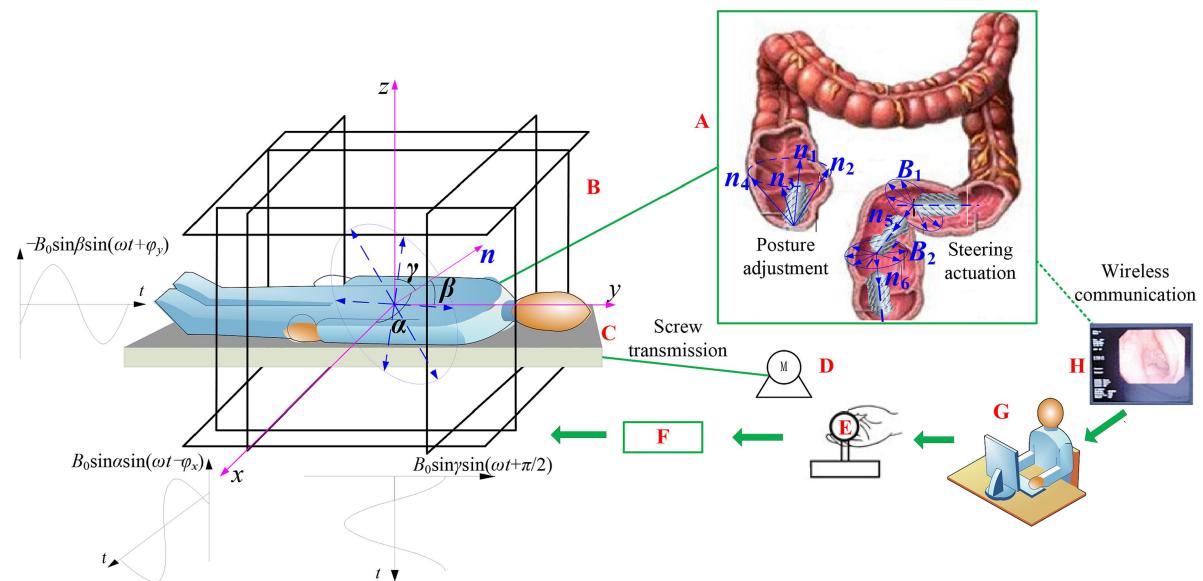

VOLUME 52

NUMBER 5

IEMGAQ

(ISSN 0018-9464)

PART II OF TWO PARTS

**Application scenario of the petal-shaped capsule robot platform and the universal magnetic vector actuation system. From the paper, “Magnitude and Orientation Error Correction of a Superimposed Spatial Universal Rotating Magnetic Vector,” by Y. Zhang *et al.*, Art. no. 5100309.**

## PAPERS

### *Magnetic Materials*

- 2002904 **Magnetic Properties and Interfacial Anisotropies of Pt/Co/AlO<sub>x</sub> Perpendicularly Magnetized Thin Films**  
R. Mansell, A. Mizrahi, A. Benguivin, and R. P. Cowburn
- 2100404 **Enhanced Temperature Stability of Coercivity in Sintered Permanent Magnet by Substitution of Ce for Didymium**  
C. Yan, S. Guo, L. Chen, R. Chen, J. Liu, D. Lee, and A. Yan
- 2600105 **The Morphological Properties of Heterostructured Fe<sub>3</sub>O<sub>4</sub>/ZnO Film by Aqueous Solution Process**  
J. S. Hong, K. Katsumata, and N. Matsushita
- 2800206 **Significantly Altered Macroscopic Magnetic Properties and Terahertz Magnetic Resonance of Gadolinium Orthoferrite by Titanium Addition**  
X. Fu, X. Zeng, J. Zhou, and T. J. Cui

### *Magnetic Recording and Information Storage Devices and Technologies*

- 3500114 **Design Architecture of a 2-D Separable Iterative Soft-Output Viterbi Detector**  
S. Datta and S. Garani Srinivasa

### *Applied Magnetism and Phenomena*

- 4000910 **Complete Set of Partial Differential Equations for Direct Localization of a Magnetic Dipole**  
Y. Higuchi, T. Nara, and S. Ando

### *Biomagnetics*

- 5100309 **Magnitude and Orientation Error Correction of a Superimposed Spatial Universal Rotating Magnetic Vector**  
Y. Zhang, Z. Su, M. Chi, Y. Huang, and D. Wang
- 5100411 **Size Optimization of a Magnetic System for Drug Delivery With Capsule Robots**  
F. Munoz, G. Alici, W. Li, and M. Sitti

### *Magnetic Measurements and Instrumentation*

- 6000304 **Reverse Magnetomechanical Effect Measurement in Magnetooptical Films at Nonmagnetic Substrate Bending Deformation**  
I. V. Linchevskyi
- 6201216 **Understanding the Magnetic Polarizability Tensor**  
P. D. Ledger and W. R. B. Lionheart
- 6201310 **Lorentz Force Evaluation With Differential Evolution**  
J. Mengelkamp, D. Lattner, J. Haueisen, M. Carlstedt, K. Weise, H. Brauer, M. Ziolkowski, and R. Eichardt
- 

---

***Computation and Numerical Methods***

- 7003911 **Augmented Quasi-Static Partial Element Equivalent Circuit Models for Transient Analysis of Lossy and Dispersive Magnetic Materials**  
D. Romano and G. Antonini
- 7004011 **Modeling and Analysis of Electromagnetism in Magnetic Forming Processes**  
J. R. Alves Zapata and F. Bay
- 7004112 **Analysis of Magnetic Field of Thin-Wall Air Induction Coil of Arbitrary Cross Section With the Help of Scalar Magnetic Potential**  
J. Kracek, V. Pankrac, and M. Mazanek
- 7403008 **Magnetic Flux Concentration Effects in Cantilever Magnetoelectric Sensors**  
J. L. Gugat, J. Schmalz, M. C. Krantz, and M. Gerken

***Electromagnetism and Electromagnetic Devices***

- 8103013 **Slotted Permanent-Magnet Machines: General Analytical Model of Magnetic Fields, Torque, Eddy Currents, and Permanent-Magnet Power Losses Including the Diffusion Effect**  
P.-D. Pfister, X. Yin, and Y. Fang
- 8103116 **Experimental Optimal Design of Slotless Brushless PM Machines Based on 2-D Analytical Model**  
K. Kazerooni, A. Rahideh, and J. Aghaei
- 8103208 **Design Optimization on Conductor Placement in the Slot of Permanent Magnet Machines to Restrict Turn-Turn Short-Circuit Fault Current**  
P. Arumugam
- 8201808 **3-D Analytical Model of Helical Winding PM Machines Including Rotor Eddy Currents**  
S. Jumayev, J. J. H. Paulides, K. O. Boynov, J. Pyrhönen, and E. A. Lomonova
- 8201908 **Comparison of Flux-Switching PM Motors With Different Winding Configurations Using Magnetic Gearing Principle**  
Y. Du, F. Xiao, W. Hua, X. Zhu, M. Cheng, L. Quan, and K. T. Chau

---

**COMMENTS AND CORRECTIONS**

- 9700401 **Correction to “Alternative Formulations of the Fields Constitutive Relations for the Efficiency of the Time Domain Analysis of Magnetized Ferrites”**  
A. Benouatas
