

IEEE TRANSACTIONS ON MAGNETICS

A PUBLICATION OF THE IEEE MAGNETICS SOCIETY

MARCH 2013

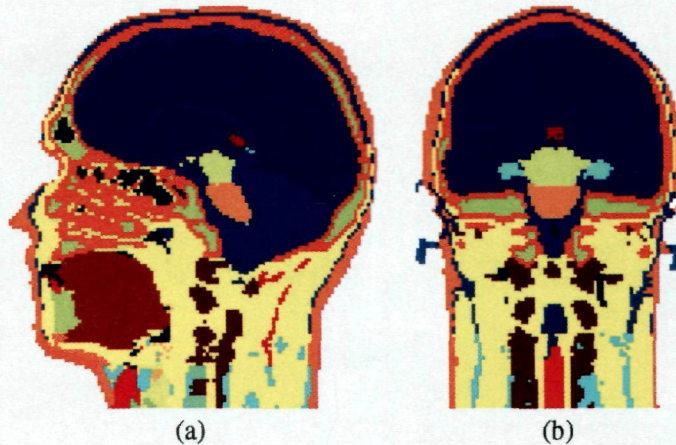

VOLUME 49

NUMBER 3

IEMGAQ

(ISSN 0018-9464)

PART II OF TWO PARTS

Finite model of the head in the (a) sagittal and (b) coronal plane. Each color corresponds to a different tissue. From the paper "The Effect of Coil Modeling on the Predicted Induced Electric Field Distribution During TMS" by N. J. Tachas, K. G. Efthimiadis, and T. Samaras, on page 1096.

PAPERS

- 1072 **A Consistency Condition for the Vector Potential in Multiply-Connected Domains**
C. L. Epstein, Z. Gimbutas, L. Greengard, A. Klöckner, and M. O'Neil
- 1077 **Magnetic Domain Structure in Coupled Rectangular Nanostructures**
J. Jelli, K. M. Lebecki, S. Hankemeier, R. Frömter, H. P. Oepen, and U. Nowak
- 1082 **High Bandwidth Control Design and Implementation for a Dual-Stage Actuation System With a Microthermal Actuator**
T. Gao, C. Du, C. P. Tan, Z. He, J. Yang, and L. Xie
- 1088 **Active Control of Flow-Induced Vibrations on Slider in Hard Disk Drives by Suppressing Pressure Fluctuations With Virtual Sensing**
H. Min, X. Huang, and Q. Zhang
- 1096 **The Effect of Coil Modeling on the Predicted Induced Electric Field Distribution During TMS**
N. J. Tachas, K. G. Efthimiadis, and T. Samaras
- 1101 **A Fast Analysis Technique for Electromagnetic Interaction of High-Frequency AC Current-Carrying Wires With Arbitrary-Shape Cracks in Ferrous Metals**
T. Heidari, H. Seidfaraji, S. H. H. Sadeghi, and R. Moini
- 1108 **Field Distributions Around a Rectangular Crack in a Metallic Half-Space Excited by Long Current-Carrying Wires With Arbitrary Frequency**
M. H. Ostovarzadeh, S. H. H. Sadeghi, R. Moini, and W. H. A. Schilders
- 1119 **Decoupling the Influence of Permeability and Conductivity in Pulsed Eddy-Current Measurements**
I. D. Adewale and G. Y. Tian

(Contents Continued on Page 1070)

- 1128 **Simulation of Magnetic Field Abnormalities Caused by Stress Concentrations**
L. Zhong, L. Li, and X. Chen
- 1135 **Analytical Solutions for the Self- and Mutual Inductances of Concentric Coplanar Disk Coils**
J. T. Conway
- 1143 **An Experimental-Computational Technique for Evaluating Magnetic Field Distributions Around Unknown Sources**
W. Wang, O. Bottauscio, M. Chiampi, D. Giordano, and L. Zilberti
- 1149 **Structure Properties of the YFe₁₁Mo Intermetallic Compound**
D. Nunes, A. P. Gonçalves, J. T. M. De Hosson, and P. A. Carvalho
- 1153 **Simulating the Trapped *B* Field in Bulk Superconductors Using a Mutual Inductance Coupling Technique**
K. R. Davey, R. Weinstein, D. Parks, and R. Sawh
- 1159 **Utilizing Materials With Controllable Curie Temperatures for Magnetic Actuation Purposes**
D. Eriksen, C. R. H. Bahl, A. Smith, and N. Pryds
- 1163 **Microwave Power Absorption Characteristics of Ferrites**
Z. Peng, J.-Y. Hwang, and M. Andriese
- 1167 **Magnetostatic Interaction Investigation of CoFe Alloy Nanowires by First-Order Reversal-Curve Diagrams**
M. Almasi Kashi, A. Ramazani, and A. S. Esmacily
- 1172 **Mn-Zn Ferrite Round Cable EMI Suppressor With Deep Grooves and a Secondary Short Circuit for Different Frequency Ranges**
M. D. Luković, M. V. Nikolic, N. V. Blaž, L. D. Živanov, O. S. Aleksić, and L. S. Lukić
- 1178 **Lumped-Parameter Thermal Model for Axial Flux Permanent Magnet Machines**
N. Rostami, M. R. Feyzi, J. Pyrhönen, A. Parviainen, and M. Niemelä
- 1185 **Demagnetization Fault Diagnosis in Surface Mounted Permanent Magnet Synchronous Motors**
B. M. Ebrahimi and J. Faiz
- 1193 **Armature-Reaction Magnetic Field Analysis for Interior Permanent Magnet Motor Based on Winding Function Theory**
Q. Li, T. Fan, and X. Wen
- 1202 **Average Torque Separation in Permanent Magnet Synchronous Machines Using Frozen Permeability**
W. Q. Chu and Z. Q. Zhu

- 1211 **Investigation of Torque Ripples in Permanent Magnet Synchronous Machines With Skewing**
W. Q. Chu and Z. Q. Zhu
- 1221 **Dynamic Factor Models of a Thrust Magnetic Bearing With Permanent Magnet Bias and Subsidiary Air Gap**
B. Han, S. Zheng, and X. Hu
- 1231 **Investigation of a Novel Radial Magnetic-Field-Modulated Brushless Double-Rotor Machine Used for HEVs**
P. Zheng, J. Bai, C. Tong, Y. Sui, Z. Song, and Q. Zhao
- 1242 **Bidirectional Cross-Linking Transverse Flux Permanent Magnet Synchronous Motor**
G. Yang, D. Cheng, H. Zhang, and B. Kou
- 1249 **Improvement of Self-Inductance Calculations for Circular Coils of Rectangular Cross Section**
Y. Luo and B. Chen
- 1256 **Comparison of Synchronous Motors With Different Permanent Magnet and Winding Types**
P. Sekerák, V. Hrabovcová, J. Pyrhönen, S. Kalamen, P. Rafajdus, and M. Onufer
- 1264 **Opportunities and Precautions in Measurement of Power Loss in Electrical Steel Laminations Using the Initial Rate of Rise of Temperature Method**
H. Hamzehbahmani, A. J. Moses, and F. J. Anayi

COMMUNICATION

- 1274 **An Electromagnetic Localization and Orientation Method Based on Rotating Magnetic Dipole**
S. Song, C. Hu, B. Li, X. Li, and M. Q.-H. Meng
