**COVER**

This month's front cover shows GE's DXR250C-W wireless detector being used at a large offshore installation in the North Sea. Multiple applications are inspected, from corrosion to weld.

With an 8" by 8" imager, the DXR250C-W detector was developed specifically for industrial inspection applications and is designed to withstand the harshest of industrial environments. It is quickly deployed in some of the most challenging field conditions and provides easy access to otherwise hard-to-reach areas (with courtesy of ConocoPhillips).
