COVER

This month's front cover features the WeldCheck eddy current flaw detector. Designed and manufactured in the UK by the ETher NDE team, and fitted with industry-standard 12-way Lemo and co-axial Lemo 00 connectors, the WeldCheck is able to use absolute, bridge and reflection probes, without the need for adaptors.

Featuring a daylight-readable 5.7" colour LCD full screen, the operator has excellent signal presentation, and with the built-in 'flip' function the WeldCheck suits left- or right-handed users equally.

With a minimum of 8.5 hours' battery life (100 kHz weld probe at maximum brightness), a tough aluminium/MgSi0.5 alloy powder-coated outer case and a mass of just 1.1 kg, the WeldCheck is the obvious choice when facing a long day of EC NDT. *ETher NDE would like to thank Oilfield Testing Services, Great Yarmouth, and model-for-the-day Sean Shepherd (Level 3 Rope Access Supervisor) for their help with shooting this month's cover image.*

December 2013

Comment, by *Dr T Holroyd* 650

NEWSDESK: The UK's future leaders in engineering honoured; OmniScan rental fleet supports growth of advanced NDT 652

OBITUARY: Professor R Grimberg 656

SPECIAL FEATURE: ACOUSTIC EMISSION

Influence of increased injection pressure load on the captured acoustic emission signals and dimensional accuracies of polypropylene test specimens, by *D Kusić, R Svečko, T Kek, A Hančič and J Grum* 659

An experimental investigation of rolling contact fatigue of steels using acoustic emission method, by *L Nohál, F Hort, J Dvořáček and P Mazal* 665

Intelligent leak level recognition of gas pipeline valve using wavelet packet energy and support vector machine model, by *HaiFeng Zhang, ZhenLin Li, ZhongLi Ji and ZhiQiang Bi* 670

FEATURES

Planar array 3D electrical capacitance tomography, by *Z Ye, R Banasiak and M Soleimani* 675

Hot-spot stress determination of tubular arch bridge joints using strain gauges, by *D Stael, H De Backer and P Van Bogaert* 681
