I-69/jac

VOLUME 10 | ISSUE 3

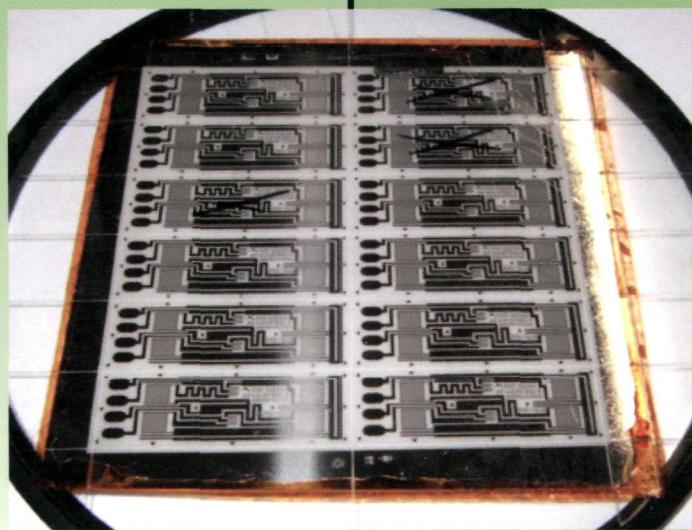

MAY/JUNE 2013

International Journal of

Applied Ceramic TECHNOLOGY

Topical Focus

Ceramic Interconnect and Ceramic
Microsystems Technologies

WILEY

| | |

TOPICAL SECTION: CERAMIC INTERCONNECT AND CERAMIC MICROSYSTEMS TECHNOLOGIES

GUEST EDITOR: DONALD PLUMLEE

| | |
|---|-----|
| Preliminary Model and Technology of Piezoelectric Low Temperature Co-fired Ceramic (LTCC) Uniaxial Accelerometer.... | 395 |
| <i>D. Jurkow, A. Dąbrowski, L. Golonka, and T. Zawada</i> | |
| Design and Fabrication of Transparent and Gas-Tight Optical Windows in Low-Temperature Co-Fired Ceramics | 405 |
| <i>T. Welker, T. Geiling, H. Bartsch, and J. Müller</i> | |
| Low-Temperature Co-Fired Ceramic Substrates for High-Performance Strain Gauges | 413 |
| <i>B. Brandt, M. Gemeinert, T. Rabe, and J. Bolte</i> | |
| Application of Thin-Film Manufacturing Technologies to Solid Oxide Fuel Cells and Gas Separation Membranes..... | 421 |
| <i>N. H. Menzler, F. Han, T. van Gestel, W. Schafbauer, F. Schulze-Küppers, S. Baumann, S. Uhlenbruck, W. A. Meulenberg, L. Blum, and H. P. Buchkremer</i> | |
| Low-Temperature Sintered NTC Thermistor Ceramics for Thick-Film Temperature Sensors | 428 |
| <i>T. Reimann, J. Töpfer, S. Barth, H. Bartsch, and J. Müller</i> | |
| Manufacturing and Characterization of a Deformable Membrane with Integrated Temperature Sensors and Heating Structures in Low Temperature Co-fired Ceramics | 435 |
| <i>N. Gutzeit, J. Müller, C. Reinlein, and S. Gebhardt</i> | |
| Low-Temperature Co-Fired Ceramics System for Light Absorbance Measurement | 443 |
| <i>M. J. Czok, P. I. Bembnowicz, and L. J. Golonka</i> | |
| The Effect of Phase Composition on the Mechanical Properties of LTCC Material | 449 |
| <i>K. Makarovć, A. Benčan, M. Hrovat, J. Holc, B. Malic, M. Kosec, R. Bermejo, and I. Kraleva</i> | |
| Characterization of the Fabrication Process of Rolled LTCC Structures | 458 |
| <i>K. Parrish, M. Yates, D. Reis, D. Plumlee, and J. Taff</i> | |
| Creation of Titania Artificial Interfaces with Geometric Patterns by Using Microstereolithography and Aqueous Solution Techniques..... | 468 |
| <i>S. Kirihara, S. Tasaki, and Y. Itakura</i> | |

GENERAL SECTION

| | |
|--|-----|
| Evaluation of Compacted Cementitious Composites for Porous Bearings | 474 |
| <i>T. H. Panzera, A. L. Christoforo, J. C. Campos Rubio, C. R. Bowen, P. H. Ribeiro Borges, and L. J. Silva</i> | |
| Laser Machining and Functional Applications of Glass-Ceramic Materials..... | 484 |
| <i>D. Sola and J. I. Peña</i> | |
| Silver Co-Firable Li ₂ ZnTi ₃ O ₈ Microwave Dielectric Ceramics with LZB Glass Additive and TiO ₂ Dopant | 492 |
| <i>G. Chen, M. Hou, Y. Bao, C. Yuan, C. Zhou, and H. Xu</i> | |
| Effect of Polyacrylic Acid Addition on Rheology of SiC-Al ₂ O ₃ -ZrO ₂ (3Y) Mixed Suspensions | 502 |
| <i>N. Zhang, B. Liang, X. Cui, H. Kan, H. Liu, and X. Zhao</i> | |
| Development of Electrical Discharge Machinable ZTA Ceramics with 24 vol% of TiC, TiN, TiCN, TiB ₂ and WC as Electrically Conductive Phase | 509 |
| <i>R. Landfried, F. Kern, R. Gadou, W. Burger, and W. Leonhardt</i> | |
| Influence of Phenolic Resin Impregnation on the Properties of Reaction-Bonded Silicon Carbide | 519 |
| <i>Z. Luo, D. Jiang, J. Zhang, Q. Lin, Z. Chen, and Z. Huang</i> | |
| Phase Evolution of Ti _{1-x} SiC ₂ Annealing in Vacuum at Elevated Temperatures..... | 527 |
| <i>J. Zeng, S. Ren, and J. Lu</i> | |
| Variations in Tantalum Carbide Microstructures with Changing Carbon Content | 540 |
| <i>R. A. Morris, B. Wang, G. B. Thompson, and D. Butts</i> | |
| Crystallographic Evaluation of Sodium Zirconium Phosphate as a Host Structure for Immobilization of Cesium and Strontium | 552 |
| <i>A. Bohre and O. Prakash Shrivastava</i> | |
