INTERNATIONAL JOURNAL OF HEAT AND MASS TRANSFER

ABSTRACTED/INDEXED IN: *Applied Mechanics Reviews, Applied Science & Technology Abstracts, Applied Science and Technology Index, Cambridge Scientific Abstracts, Chemical Abstracts, Chemical Engineering Abstracts, Current Contents/Engineering, Computing & Technology, Current Contents/SciSearch Database, Current Contents/Social & Behavioral Sciences, Current Technology Index, Engineering Index, INSPEC, MSCI, Mechanics, PASCAL/CNRS, Petroleum Abstracts, Research Alert, TCEA, Zentralblatt MATH. Also covered in the abstract and citation database SciVerse Scopus®. Full text available on SciVerse ScienceDirect®*

Volume 62 *July 2013*

CONTENTS

In Memoriam

O. G. PENYAZKOV, N. V. PAVLYUKEVICH, K. V. DOBREGO and V. A. BORODULYA, ON BEHALF OF HIS FRIENDS and COLLEAGUES — 1 — In memoriam of Professor Oleg G. Martynenko (1936–2012)

Original Research

C. J. HO and J. Y. GAO — 2 — An experimental study on melting heat transfer of paraffin dispersed with Al_2O_3 nanoparticles in a vertical enclosure

J. SERRANO-ARELLANO, J. XAMÁN and G. ÁLVAREZ — 9 — Optimum ventilation based on the ventilation effectiveness for temperature and CO_2 distribution in ventilated cavities

A. A. MINEA — 22 — Effect of microtube length on heat transfer enhancement of an water/Al_2O_3 nanofluid at high Reynolds numbers

K. A. WOODBURY and J. V. BECK — 31 — Estimation metrics and optimal regularization in a Tikhonov digital filter for the inverse heat conduction problem

S. W. CHANG and C. Y. LIN — 40 — Thermal performance of rotating two-phase thermosyphon disc

T. FANG and W. JING — 55 — Closed-form analytical solutions of flow and heat transfer for an unsteady rear stagnation-point flow

Z. DING and Q. LIU — 63 — Linear instability analysis of thermocapillary convection in a bilayer system

K. V. POLETKIN and V. KULISH — 73 — Phenomenological model of heat transfer in hard-disk air bearing based on nonlocal behavior in air molecular gas

A. HAJI-SHEIKH, F. DE MONTE and J. V. BECK — 78 — Temperature solutions in thin films using thermal wave Green's function solution equation

T.-W. TSAI and Y.-M. LEE — 87 — Analysis of microscale heat transfer and ultrafast thermoelasticity in a multi-layered metal film with nonlinear thermal boundary resistance

S. JUN, S. SINHA-RAY and A. L. YARIN — 99 — Pool boiling on nano-textured surfaces

S. MANCIN, C. ZILIO, A. DIANI and L. ROSSETTO — 112 — Air forced convection through metal foams: Experimental results and modeling

Y. ZOU and P. S. HRNJAK — 124 — Experiment and visualization on R134a upward flow in the vertical header of microchannel heat exchanger and its effect on distribution

S. B. RUTIN, A. A. SMOTRITSKIY, A. A. STAROSTIN, Y. S. OKULOVSKY and P. V. SKRIPOV — 135 — Heat transfer under high-power heating of liquids. 1. Experiment and inverse algorithm

I.-C. CHU, H. C. NO and C.-H. SONG — 142 — Visualization of boiling structure and critical heat flux phenomenon for a narrow heating surface in a horizontal pool of saturated water

D. B. RODRIGUES, P. J. S. PEREIRA, P. LIMÃO-VIEIRA, P. R. STAUFFER and P. F. MACCARINI — 153 — Study of the one dimensional and transient bioheat transfer equation: Multi-layer solution development and applications
