

Research Papers

Comparison of decoherence and Zeno dynamics from the context of weak measurement for a two-level atom traversing through squeezed vacuum

Samyadeb Bhattacharya

1650016

Acoustic emission study of deformation behavior of nacre

Shunfei Luo, Hongyun Luo, Zhiyuan Han

1650017

Vibrational, mechanical and thermodynamical properties of indium thiospinels $M\text{In}_2\text{S}_4$ ($M = \text{Cd}, \text{Zn}$ and Mg)

A. K. Kushwaha, R. Khenata, S. Bin Omran

1650018

Fast phase transition of water molecules in a defective carbon nanotube under an electric field

Xianwen Meng, Jiping Huang

1650019

Study of divalent elements (Mg, Sr and Ba)-doped LaMnO_3 nano-manganites

Shahid Mahmood Ramay, Asif Mahmood, Shahid Atiq, A. N. AlHazzaa

1650020

Exciton effects in strained armchair graphene nanoribbons

Yonglei Jia, Junlin Liu

1650021

Coherent states of Landau–Aharonov–Casher levels

J. Lemos de Melo, I. A. Pedrosa, C. Furtado

1650022

Link community detection based on line graphs with a novel link similarity measure

Guishen Wang, Lan Huang, Yan Wang, Wei Pang, Qin Ma

1650023

Entanglement formulation in the framework of electrically pumped laser cavity

Solomon Getahun

1650024

Frequency characteristics of defect states in a two-dimensional phononic crystal with slit structure

X. P. Wang, P. Jiang, T. N. Chen, K. P. Yu

1650025
