

Review Paper

Bose–Hubbard Hamiltonian: Quantum chaos approach

Andrey R. Kolovsky

1630009

Research Papers

Additive analysis of nano silicon under the influence of neutron irradiation

Aydan Garibli, Elchin Huseynov, Adil Garibov, Ravan Mehdiyeva

1650040

Modeling and predicting the tensile strength of poly (lactic acid)/graphene nanocomposites by using support vector regression

W. D. Cheng, C. Z. Cai, Y. Luo, Y. H. Li, C. J. Zhao

1650052

Physical and optical properties of magnesium sulfoborate glasses doped Dy³⁺ ions

S. A. Dalhatu, Karim Deraman, R. Hussin

1650054

Structural, optical and high pressure electrical resistivity studies of pure NiO and Cu-doped NiO nanoparticles

M. Abila Marselin, N. Victor Jaya

1650056

Synchronization of complex networks coupled by periodically intermittent noise

Shuang Li, Huiyun Yan, Jiaorui Li

1650057

Electronic and spectroscopic properties of Ge nanocrystals using diamondoid structures: A density functional theory study

Mudar Ahmed Abdulsattar

1650058

About the diffusion mechanism in the silica liquid

N. T. T. Nhan, P. H. Kien, P. K. Hung, N. V. Hong, L. T. San

1650059

Anions (N,S) mono-doping and co-doping influences on electronic structures and optical properties of InNbO₄

Haifeng Shi, Changping Zhou, Chengliang Zhang, Enjia Ye

1650060

Quantum key distribution protocol using random bases

A. Meslouhi, H. Amellal, Y. Hassouni, M. El Baz, A. El Allati

1650061
