INTERNATIONAL JOURNAL OF MODERN PHYSICS B

Vol. 28, No. 11 (30 April 2014)

CONTENTS

Review Paper

- Polar optical phonon states and their degenerative behaviors of wurtzite ZnO/MgZnO coupling quantum dots
L. Zhang and J. J. Shi 1430005

Research Papers

- Mean escape time of ballistically transporting Brownian particles due to thermal noise
Z. W. Bai and P. Wang 1450063
- Band gap engineering by lanthanide doping in the photocatalyst LaOF: First-principles study
J.-P. Long, Z. Wan, X.-G. Yan, W.-Q. Huang, G.-F. Huang and P. Peng 1450069
- Phase separation in the Langmuir–Blodgett films of p-quaterphenyl mixed with two different matrices
J. Nath, A. Pal, S. Deb, B. K. Mishra and R. K. Nath 1450073
- Quantum solitons in the Fermi–Pasta–Ulam model
D.-J. Li and B. Tang 1450075
- Effect of pH on the holographic properties of Al₂O₃ nanoparticle dispersed acrylate photopolymer
Y.-X. Li, C.-L. Li and M.-J. Huang 1450076
- Diffusion and dissipation by linear momentum in spherical environment
W. Scheid, A. Isar and A. Sandulescu 1450077
- Investigation of the electron structure of ZnO by the GGA and mBJ calculations associated with the characterization techniques AES and EELS
A. Mokadem, M. Bouslama, O. Benhelal, A. Assali, M. Ghaffour,
Z. Chelahi Chikr, K. Boulououar and A. Boubaia 1450078
- Ab initio* study of structural, electronic, magnetic and optical properties of Ti-doped ZnTe and CdTe
M. El Amine Monir, H. Baltache, G. Murtaza, R. Khenata, S. Bin Omran,
Ş. Uğur, S. Benalia and D. Rached 1450080
