INTERNATIONAL JOURNAL OF MODERN PHYSICS B

Vol. 28, No. 15 (20 June 2014)

CONTENTS

Review Paper

Hall viscosity, topological states and effective theories C. Hoyos	1430007
---	---------

Research Papers

Microstructure and nonohmic properties of $\text{SnO}_2\text{-Ta}_2\text{O}_5\text{-TiO}_2$ varistor system doped with CuO Z. Peng, R. Gao, F. Jiang, J. He and X. Fu	1450085
New statistical lattice model with double honeycomb symmetry S. Naji, A. Belhaj, H. Labrim, M. Bhihi, A. Benyoussef and A. El Kenz	1450086
Alloying-related trends in thermal properties of ternary TiN-based nitrides S. Huang, R.-Z. Li, S.-T. Qi, B. Chen and J. Shen	1450087
A temperature dependent study on charge dynamics in organic molecular device: Effect of shallow traps on space charge limited behavior A. K. Mukherjee and A. K. Kavala	1450088
Quantum state transfer through a thermal spin channel X. Q. Su, A. M. Wang and G. H. Yang	1450090
Microwave dielectric properties of $\text{Ba}_4\text{LaTi}_{0.3}\text{Sn}_{0.7}\text{Nb}_3\text{O}_{15}$ ceramic A. Manan and I. Hussain	1450092
Bending vibration band structure of phononic crystal beam by modified transfer matrix method Z.-Q. Ni, Y. Zhang, L.-H. Jiang and L. Han	1450093
Influence of repulsion zone in the directional alignment of self-propelled particles D. Cambui	1450094
Erratum Casimir torque on two rotating plates X. Chen	1492002
