INTERNATIONAL JOURNAL OF MODERN PHYSICS B

Vol. 28, No. 16 (30 June 2014)

CONTENTS

Review Paper

Skeleton graph expansion of critical exponents in “cultural revolution” years B. Hao	1430008
---	---------

Research Papers

Numerical predictions of performance of the proton exchange membrane fuel cell with baffle(s)-blocked flow field designs E. Afshari and N. B. Houreh	1450097
--	---------

Low temperature specific heat anomaly in electron doped $R_{2-x}Ce_xCuO_4$ superconductors S. P. Mohapatra and G. C. Rout	1450098
---	---------

Properties analyses for the heterogeneous nonmotorized vehicle traffic based on cellular automaton model H. Jiang, G. Ren, L. Zheng, J. Chen and Z. Huang	1450099
---	---------

Magnetoelectric effect in radially polarized disk–ring composites R. Zhang, G. Wu and N. Zhang	1450100
---	---------

In_2O_3 -ZnO heterostructure development in electrical and photoluminescence properties of In_2O_3 1-D nanostructures M. Shariati and V. Ghafouri	1450101
---	---------

Structural and electrical properties of zirconium doped yttrium oxide nanostructures A. Bahari, M. Ebrahimzadeh and R. Gholipur	1450102
--	---------

Vibrational resonance in a discrete neuronal model with time delay C. J. Wang, K. Yang and S. Qu	1450103
---	---------

Lamb wave band gaps in a homogeneous plate with inclined cylindrical dots W. Chen and P. Wang	1450113
--	---------
