INTERNATIONAL JOURNAL OF MODERN PHYSICS B

Vol. 28, No. 25 (10 October 2014)

CONTENTS

Review Paper

Magnetism in rare-earth alloys M. Gulacsi	1430016
--	---------

Research Papers

Structural, optical and magnetic properties of Co-doped ZnO nanoparticles prepared via a wet chemical route J. Iqbal, R. A. Janjua and T. Jan	1450158
Synthesis, characterization and magnetic properties of nanocrystalline $Ni_{1-x}Zn_xFe_2O_4$ spinels via coprecipitation precursor M. H. Maklad, N. M. Shash and H. K. Abdelsalam	1450165
Structural stability of WS_2 under high pressure N. Bandaru, R. S. Kumar, J. Baker, O. Tschauner, T. Hartmann, Y. Zhao and R. Venkat	1450168
Corresponding states correlation for temperature dependent surface tension of normal saturated liquids H. Yi and J. Tian	1450169
Effect of oxygen vacancy on the improved photocatalytic activity of Cr-doped TiO_2 M. Khan, J. Li, W. Cao, B. Mansoor and F. Rehman	1450170
Analysis of structures and melting properties of the 19-atom Ni-Co clusters S.-W. Ren, J.-W. Sun and Y.-Z. Hao	1450171
Semiclassical tight-binding dynamics in rapidly oscillating fields plus a static arbitrary potential L. A. Martínez, D. Sanjinés and J.-P. Gallinar	1450173
Laser enhanced RKKY interaction in nanorings P. Feng and C. Yin	1450174
