INTERNATIONAL JOURNAL OF MODERN PHYSICS B

Vol. 28, No. 27 (30 October 2014)

CONTENTS

Review Paper

Development of nonlinear optical materials promoted by density functional theory simulations

X. Jiang, L. Kang, S. Luo, P. Gong, M.-H. Lee and Z. Lin 1430018

Research Papers

Electronic structure, elastic and thermal properties of semiconductor GaX (X = N, P, As, Sb) with zinc blende from first-principles calculation

B. Luo, X. Wu and G. Li 1450183

Magnetic properties of small ruthenium clusters in fullerene cage — A DFT study

S. Srivastava and A. Pahuja 1450184

Influence of magnetic field and Rashba spin-orbit coupling on strong-coupling magnetopolarons in quantum disks

W. Xin, C. Han and Eerdunchaolu 1450185

Comparison of magnetoelastic properties between the $\langle 110 \rangle$ oriented Tb_xDy_{1-x}Fe_{1.95} polycrystalline alloys with different Tb/Dy composition ratio under magnetomechanical loading

P. Zhao, Y.-H. Zhou and Z.-Z. Lin 1450187

Magneto-biexciton in a group III-V diluted magnetic quantum dot

D. Lalitha, A. J. Peter and C. W. Lee 1450188

Plasmon dispersions in ultrathin metallic films

R.-L. Wu, Y.-J. Long, H.-J. Xue, Y. Yu and H.-F. Hu 1450189

An approach to decrease dimensions of field-effect transistors without *p-n*-junctions

E. L. Pankratov and E. A. Bulaeva 1450190

Raman spectroscopy, X-ray diffraction and electrical properties of fullerene-based poly (methylmethacrylate) polymers

S. Singh, A. Dwivedi, R. K. Shukla and M. Kamal 1450191

Erratum

Magnetism in rare-earth alloys

M. Gulacsi 1492006
