

Review Article

The production of proton-rich isotopes beyond iron: The γ -process in stars

Marco Pignatari, Kathrin Göbel, René Reifarth, Claudia Travaglio

1630003

Research Articles

Study of $^{242-248}\text{Cm}$ isotopes in the projected shell model framework

Saiqa Sadiq, Rani Devi, S. K. Khosa

1650024

A combined model for pseudo-rapidity distributions in Cu–Cu collisions at BNL-RHIC energies

Z. J. Jiang, J. Wang, Y. Huang

1650025

Adiabatic and coupled channels calculations for near barrier fusion of $^{16}\text{O}+^{238}\text{U}$ using realistic nucleon–nucleon interaction

M. Ismail, W. M. Seif, M. M. Botros

1650026

Vacuum fluctuation inside a star and their consequences for neutron stars, a simple model

G. Caspar, I. Rodríguez, P. O. Hess, W. Greiner

1650027

Thermal two-neutron separation energy in the case of Erbium isotopes

H. Kadi, N. Benhamouda

1650028

Bohr Hamiltonian with time-dependent potential

L. Naderi, H. Hassanabadi, H. Sobhani

1650029

Breaking of Cooper pairs in ^{108}Pd

A. Rahmatinejad, T. Kakavand, R. Razavi

1650030

Effect of the energy spectrum and angular momentum of pre-scission neutrons on the prediction of fission fragment angular anisotropy by the models

Saeed Soheyli, Marzieh Varasteh Khanlari

1650031
