

## **Reviews**

### **Aharonov–Bohm types of phases in Maxwell and Yang–Mills field theories**

*Bruce H. J. McKellar*

1630004

### **Review of QCD, quark–gluon plasma, heavy quark hybrids, and heavy quark state production in pp–pp and AA–AA collisions**

*Leonard S. Kisslinger, Debasish Das*

1630010

## **Research Papers**

### **Magnetic field corrections to the repulsive Casimir effect at finite temperature**

*Andrea Erdas*

1650018

### **Optimal configurations of the Deep Underground Neutrino Experiment**

*Vernon Barger, Atri Bhattacharya, Animesh Chatterjee, Raj Gandhi, Danny Marfatia, Mehedi Masud*

1650020

### **Asymmetric dark matter and the scalar-tensor model**

*Shun-Zhi Wang, Hoernisa Iminniyaz, Mamatrishat Mamat*

1650021

### **Canonical description of T-duality for fundamental string and D1-brane and double Wick rotation**

*Josef Klusoň*

1650022

### **Counting of oscillatory modes of valence quarks forming $qq\text{--}\bar{q}\bar{q}$ mesons**

*Sonia Kabana, Peter Minkowski*

1650023

### **Schwinger–Dyson approach and its application to generate a light composite scalar**

*A. Doff, A. A. Natale*

1650024

### **The chiral phase transition and the role of vacuum fluctuations**

*Rashid Khan, Jens O. Andersen, Lars T. Kyllingstad, Majid Khan*

1650025

**Relativistic scalar particle subject to a confining potential and Lorentz symmetry breaking effects in the cosmic string space–time**

*H. Belich, K. Bakke*

1650026

**A generalized model for the classical relativistic spinning particle**

*Mahdi Hajihashemi, Ahmad Shirzad*

1650027
