

Reviews

Revisiting on-shell renormalization conditions in theories with flavor mixing

W. Grimus, M. Lösschner

1630038

Saturation in inclusive production beyond leading logarithm accuracy

Anna M. Staśto, David Zaslavsky

1630039

A new look at Newton–Cartan gravity

E. A. Bergshoeff, J. Rosseel

1630040

Research Papers

Numerical analysis of Coleman–de Luccia tunneling

Yuhei Goto, Kazumi Okuyama

1650131

Understanding the masses and mixings of one-zero textures in 3+1 scenario

Newton Nath, Monojit Ghosh, Shivani Gupta

1650132

Constraining the existence of magnetic monopoles by Dirac-dual electric charge renormalization effect under the Planck scale limit

Yanbin Deng, Changyu Huang, Yong-Chang Huang

1650133

Topological string theory revisited I: The stage

Bei Jia

1650135

Transverse momentum distribution of primary charged particles in the p –Pb interactions using HIJING 1.0

U. Tabassam, Y. Ali, M. Suleymanov, A. S. Bhatti, J. B. Butt, M. S. Amjad

1650136

Antiself-dual Yang–Mills, modified Faddeevs–Jackiw formalism and hidden BRS invariance

Saurabh Gupta, Raju Roychowdhury

1650138

Scalar isovector resonance photoproduction through the final state meson–meson interactions

Łukasz Bibrzycki, Robert Kamiński

1650139
