

**New developments and case studies in rock mechanics
and rock engineering**

International Journal of Rock Mechanics and Mining Sciences

Editor-in-Chief: **R. W. Zimmerman**, *Imperial College, London, UK*

- fundamental rock behaviour
- *in situ* stress
- site investigation
- rock cutting and drilling
- underground excavations
- rock reinforcement and support
- dam engineering
- geothermal energy
- petroleum engineering
- radioactive waste disposal

CONTENTS

Articles

- | | | |
|---|-----|--|
| Y.-Y. Jiao, L. Song, X.-Z. Wang and A. Coffi Adoko | 19 | Improvement of the U-shaped steel sets for supporting the roadways in loose thick coal seam |
| S. Lambert, F. Bourrier and D. Toe | 26 | Improving three-dimensional rockfall trajectory simulation codes for assessing the efficiency of protective embankments |
| X. Zhu, Q. Xu, J. Zhou and M. Tang | 37 | Experimental study of infrasonic signal generation during rock fracture under uniaxial compression |
| Y. Lu, J. Tang, Z. Ge, B. Xia and Y. Liu | 47 | Hard rock drilling technique with abrasive water jet assistance |
| F. Dai and K.W. Xia | 57 | <i>Laboratory measurements of the rate dependence of the fracture toughness anisotropy of Barre granite</i> |
| N. Babanouri, S. Karimi Nasab and S. Sarafrazi | 66 | A hybrid particle swarm optimization and multi-layer perceptron algorithm for bivariate fractal analysis of rock fractures roughness |
| F. Faramarzi, H. Mansouri and M.A. Ebrahimi Farsangi | 82 | A rock engineering systems based model to predict rock fragmentation by blasting |
| A. Fakhimi and A. Tarokh | 95 | Process zone and size effect in fracture testing of rock |
| A.M. Ferrero, M. Migliazza, A. Segalini and D. Gulli | 103 | In situ stress measurements interpretations in large underground marble quarry by 3D modeling |
| F.P. Schumacher and E. Kim | 114 | Modeling the pipe umbrella roof support system in a Western US underground coal mine |
| D.A. Estay and L.E. Chiang | 125 | Discrete crack model for simulating rock comminution processes with the Discrete Element Method |
| J.-H. Wu, J.-H. Chen and C.-W. Lu | 148 | Investigation of the Hsien-du-Shan rock avalanche caused by typhoon Morakot in 2009 at Kaohsiung county, Taiwan |
| J. Zhang | 160 | Borehole stability analysis accounting for anisotropies in drilling to weak bedding planes |
| J.-p. Liu, X.-t. Feng, Y.-h. Li, S.-d. Xu and Y. Sheng | 171 | Studies on temporal and spatial variation of microseismic activities in a deep metal mine |
| J.P. Meyer and J.F. Labuz | 180 | Linear failure criteria with three principal stresses |
| C. Cao, J. Nemcik, N. Aziz and T. Ren | 188 | Analytical study of steel bolt profile and its influence on bolt load transfer |

continued from outside back cover

N. Iwata, R. Yoshinaka and T. Sasaki	196	Applicability of the seismic response analysis using multiple yield model for discontinuous rock
M. Petružálek, J. Vilhelm, V. Rudajev, T. Lokajíček and T. Svitek	208	Determination of the anisotropy of elastic waves monitored by a sparse sensor network
B. Zheng and D. Elsworth	217	Strength evolution in heterogeneous granular aggregates during chemo–mechanical compaction
L.F. Fan and L.N.Y. Wong	227	Stress wave transmission across a filled joint with different loading/unloading behavior
Q. Lin and J.F. Labuz	235	Fracture of sandstone characterized by digital image correlation
S.-W. Hao, F. Rong, L. Ming-Fu, H.-Y. Wang, M.-F. Xia, K. Fu-Jiu and Y.-L. Bai	253	Power-law singularity as a possible catastrophe warning observed in rock experiments
J. Connor Langford and M.S. Diederichs	263	Reliability based approach to tunnel lining design using a modified point estimate method
F. Yuan and V. Prakash	277	Plate impact experiments to investigate shock-induced inelasticity in Westerly granite
S.T. Yaméogo, R. Corthésy and M.H. Leite	288	Influence of local heterogeneity on Doorstopper stress measurements
S. Yong, P.K. Kaiser and S. Loew	301	Rock mass response ahead of an advancing face in faulted shale
B.A. Poulsen and B. Shen	312	Subsidence risk assessment of decommissioned bord-and-pillar collieries
E. Cantisani, C.A. Garzonio, M. Ricci and S. Vettori	321	Relationships between the petrographical, physical and mechanical properties of some Italian sandstones
M.T. Zandarin, E. Alonso and S. Olivella	333	A constitutive law for rock joints considering the effects of suction and roughness on strength parameters
A. Jafari and T. Babadagli	353	Relationship between percolation–fractal properties and permeability of 2-D fracture networks
B. Mishra and D. Nie	363	Experimental investigation of the effect of change in control modes on the post-failure behavior of coal and coal measures rock
L. Zhou and M.Z. Hou	370	A new numerical 3D-model for simulation of hydraulic fracturing in consideration of hydro-mechanical coupling effects
F. Vivanco and F. Melo	381	The effect of rock decompaction on the interaction of movement zones in underground mining
Z. Wang, C. Fang, Y. Chen and W. Cheng	389	A comparative study of delay time identification by vibration energy analysis in millisecond blasting
Q. Fang, D. Zhang, P. Zhou and L.N.Y. Wong	401	Ground reaction curves for deep circular tunnels considering the effect of ground reinforcement
Q. Jiang, X. Liu, W. Wei and C. Zhou	413	A new method for analyzing the stability of rock wedges
Q.B. Zhang and J. Zhao	423	Determination of mechanical properties and full-field strain measurements of rock material under dynamic loads
S. Senent, G. Mollon and R. Jimenez	440	Tunnel face stability in heavily fractured rock masses that follow the Hoek–Brown failure criterion
C. Pinto and J. Fonseca	452	Mechanical behavior of high strength granite for new prestressed stone structures
