CONTENTS

- V. A. Lubarda 1 Circular loads on the surface of a half-space: Displacement and stress discontinuities under the load
- A. B. Zhang and B. L. Wang 15 An opportunistic analysis of the interface crack based on the modified interface dislocation method
- K. Koohestani 21 A hybrid method for efficient solution of geometrically nonlinear structures
- S. Schnabl and I. Planinc 30 Exact buckling loads of two-layer composite Reissner's columns with interlayer slip and uplift
- T. Hui and C. Oskay 38 A nonlocal homogenization model for wave dispersion in dissipative composite materials
- C. Fang, A. Kumar and S. Mukherjee 49 Finite element analysis of single-walled carbon nanotubes based on a rod model including in-plane cross-sectional deformation
- E. Paraskevopoulos and S. Natsiavas 57 A new look into the kinematics and dynamics of finite rigid body rotations using Lie group theory
- J. Réthoré, Muhibullah, T. Elguedj, M. Coret, P. Chaudet and A. Combescure 73 Robust identification of elasto-plastic constitutive law parameters from digital images using 3D kinematics
- J. R. Cho, H. W. Lee, W. B. Jeong, K. M. Jeong and K. W. Kim 86 Numerical estimation of rolling resistance and temperature distribution of 3-D periodic patterned tire
- J. Karnesky, J. Damazo, K. Chow-Yee, A. Rusinek and J. E. Shepherd 97 Plastic deformation due to reflected detonation
- S. R. Rickaby and N. H. Scott 111 A cyclic stress softening model for the Mullins effect
- M. Bruggi and A. Taliercio 121 Topology optimization of the fiber-reinforcement retrofitting existing structures
- B. Beausir and C. Fressengeas 137 Disclination densities from EBSD orientation mapping
- R. A. M. Silveira, C. L. Nogueira and P. B. Gonçalves 147 A numerical approach for equilibrium and stability analysis of slender arches and rings under contact constraints
- J. H. Yuan, W. Q. Chen and E. Pan 160 Line-integral representations of the displacement and stress fields due to an arbitrary Volterra dislocation loop in a transversely isotropic elastic full space

CONTENTS—continued from outside back cover

P. Yan, C. P. Jiang and F. Song	176	Unified series solution for the anti-plane effective magnetoelastic moduli of three-phase fiber composites
H. Lekesiz, N. Katsube, S. I. Rokhlin and R. R. Seghi	186	The stress intensity factors for a periodic array of interacting coplanar penny-shaped cracks
C. Y. Dong and G. L. Zhang	201	Boundary element analysis of three dimensional nanoscale inhomogeneities
N. Hasebe and M. Sato	209	Stress analysis of quasi-orthotropic elastic plane
C. J. Shen, T. X. Yu and G. Lu	217	Double shock mode in graded cellular rod under impact
L.-Y. Zhang, Y. Li, Y.-P. Cao and X.-Q. Feng	234	A unified solution for self-equilibrium and super-stability of rhombic truncated regular polyhedral tensegrities
A. J. Beveridge, M. A. Wheel and D. H. Nash	246	The micropolar elastic behaviour of model macroscopically heterogeneous materials
M. Jirásek, O. Rokoš and J. Zeman	256	Localization analysis of variationally based gradient plasticity model
C.-W. Liu and J.-S. Chen	270	Effect of friction on the planar elastica constrained inside a circular channel with clearance
