CONTENTS

B. Reedlunn, S. Daly and J. Shaw	3009	Superelastic shape memory alloy cables: Part I – Isothermal tension experiments
B. Reedlunn, S. Daly and J. Shaw	3027	Superelastic shape memory alloy cables: Part II – Subcomponent isothermal responses
R. Mahnken, M. Wolff and C. Cheng	3045	A multi-mechanism model for cutting simulations combining visco-plastic asymmetry and phase transformation
M. Xiang and W. Guo	3067	Formulation of the stress fields in power law solids ahead of three-dimensional tensile cracks
L. Mentrasti, F. Cannella, M. Pupilli and J. S. Dai	3089	Large bending behavior of creased paperboard. I. Experimental investigations
L. Mentrasti, F. Cannella, M. Pupilli and J. S. Dai	3097	Large bending behavior of creased paperboard. II. Structural analysis
O. K. Panagouli and K. Iordanidou	3106	Dependence of friction coefficient on the resolution and fractal dimension of metallic fracture surfaces
V. A. Levin, K. M. Zingerman, A. V. Vershinin, E. I. Freiman and A. V. Yangirova	3119	Numerical analysis of the stress concentration near holes originating in previously loaded viscoelastic bodies at finite strains
G. Z. Voyiadjis and N. Mozaffari	3136	Nonlocal damage model using the phase field method: Theory and applications
L. L. Hu and T. X. Yu	3152	Mechanical behavior of hexagonal honeycombs under low-velocity impact – theory and simulations
S. Caddemi, I. Calì and F. Cannizzaro	3166	The influence of multiple cracks on tensile and compressive buckling of shear deformable beams
B. Nedjar	3184	Poromechanics approach for modeling closed-cell porous materials with soft matrices
V. A. Buryachenko	3190	General integral equations of thermoelasticity in micromechanics of composites with imperfectly bonded interfaces
M. A. Hasan, S. Cho, K. Remick, A. F. Vakakis, D. M. McFarland and W. M. Kriven	3207	Primary pulse transmission in coupled steel granular chains embedded in PDMS matrix: Experiment and modeling
M. Salviato, M. Zappalorto and M. Quaresimin	3225	Nanoparticle debonding strength: A comprehensive study on interfacial effects
J. Paiboon, D. V. Griffiths, J. Huang and G. A. Fenton	3233	Numerical analysis of effective elastic properties of geomaterials containing voids using 3D random fields and finite elements
J. K. Phadikar, T. A. Bogetti and A. M. Karlsson	3242	On the uniqueness and sensitivity of indentation testing of isotropic materials

S. Y. Yang and G. S. Dui	3254	Temperature analysis of one-dimensional NiTi shape memory alloys under different loading rates and boundary conditions
X. Chen	3266	Constitutive unsaturated hydro-mechanical model based on modified mixture theory with consideration of hydration swelling
G. Milani and A. Cecchi	3274	Compatible model for herringbone bond masonry: Linear elastic homogenization, failure surfaces and structural implementation
A. Pouya, M.-N. Vu, S. Ghabezloo and Z. Bendjeddou	3297	Effective permeability of cracked unsaturated porous materials
F. P. van der Meer and C. G. Dávila	3308	Cohesive modeling of transverse cracking in laminates under in-plane loading with a single layer of elements per ply
D. Weisz-Patrault, A. Ehrlacher and N. Legrand	3319	Evaluation of contact stress during rolling process, by three dimensional analytical inverse method
A. S. Shahsavari and R. C. Picu	3332	Size effect on mechanical behavior of random fiber networks
G. Y. Baghdasaryan, Z. N. Danoyan and M. A. Mikilyan	3339	Issues of dynamics of conductive plate in a longitudinal magnetic field
B. Paliwal and M. Cherkaoui	3346	An improved atomistic simulation based mixed-mode cohesive zone law considering non-planar crack growth
Y. P. Yuen and J. S. Kuang	3361	Fourier-based incremental homogenisation of coupled unilateral damage–plasticity model for masonry structures
F. Jin and X. Guo	3375	Mechanics of axisymmetric adhesive contact of rough surfaces involving power-law graded materials
L. Marin and A. Karageorghis	3387	The MFS for the Cauchy problem in two-dimensional steady-state linear thermoelasticity
M. Kanerva, J. Jokinen, E. Sarlin and O. Saarela	3399	Crack propagation under mode II dominance at stainless steel–epoxy interfaces with residual stresses and micro-scale roughness
S. Steffensen, N. D. Madsen and H. M. Jensen	3406	Numerical estimation of fracture toughness from indentation-induced circumferential cracking in thin films on ductile substrates
J. Kim, G. F. Dargush and Y.-K. Ju	3418	Extended framework of Hamilton’s principle for continuum dynamics
M. Kristoffersen, T. Børvik, I. Westermann, M. Langseth and O. S. Hopperstad	3430	Impact against X65 steel pipes – An experimental investigation
J.-F. Ganghoffer	3446	A kinematically and thermodynamically consistent volumetric growth model based on the stress-free configuration
Y. Gu, W. Chen and C. Zhang	3460	Stress analysis for thin multilayered coating systems using a sinh transformed boundary element method
J. H. Yuan, E. Pan and W. Q. Chen	3472	Line-integral representations for the elastic displacements, stresses and interaction energy of arbitrary dislocation loops in transversely isotropic bimetals
