CONTENTS

N. Nigamaa and S. J. Subramanian	295	Identification of orthotropic elastic constants using the Eigenfunction Virtual Fields Method
P. G. Massouros, P. V. Bayly and G. M. Genin	305	Strain localization in an oscillating Maxwell viscoelastic cylinder
J. Olives	314	Green's formula and singularity at a triple contact line. Example of finite-displacement solution
A. Dutta and S. A. Tekalur	325	Crack tortuosity in the nacreous layer – Topological dependence and biomimetic design guideline
H. Yu, L. Wu and H. Li	336	A domain-independent interaction integral for magneto-electro-elastic materials
H. Feng, Q. H. Fang, Y. W. Liu and C. P. Chen	352	Nanoscale rotational deformation effect on dislocation emission from an elliptically blunted crack tip in nanocrystalline materials
J. Dirrenberger, S. Forest and D. Jeulin	359	Towards gigantic RVE sizes for 3D stochastic fibrous networks
E. Pucci and G. Saccomandi	377	On the use of universal relations in the modeling of transversely isotropic materials
H. Hoang-Duc and G. Bonnet	381	A series solution for the effective properties of incompressible viscoelastic media
S. Ghosh, V. Sundararaghavan and A. M. Waas	392	Construction of multi-dimensional isotropic kernels for nonlocal elasticity based on phonon dispersion data
J. He, D. Zeng, X. Zhu, Z. Cedric Xia and S. Li	402	Effect of nonlinear strain paths on forming limits under isotropic and anisotropic hardening
A. H. Taheri, B. Hassani and N. Z. Moghaddam	416	Thermo-elastic optimization of material distribution of functionally graded structures by an isogeometrical approach
G. Tamadapu and A. DasGupta	430	Finite inflation of a hyperelastic toroidal membrane over a cylindrical rim
L. Kucherov and M. Ryvkin	440	Fracture toughness of open-cell Kelvin foam
G. Soni, R. Singh, M. Mitra and B. G. Falzon	449	Modelling matrix damage and fibre–matrix interfacial decohesion in composite laminates via a multi-fibre multi-layer representative volume element (M^2RVE)
H. Dong, J. Wang and M. B. Rubin	462	Cosserat interphase models for elasticity with application to the interphase bonding a spherical inclusion to an infinite matrix
S. Liao, Z. Zheng and J. Yu	478	On the local nature of the strain field calculation method for measuring heterogeneous deformation of cellular materials
R. Haj-Ali, H. Zemer, R. El-Hajjar and J. Aboudi	491	Piezoresistive fiber-reinforced composites: A coupled nonlinear micromechanical–microelectrical modeling approach
