INTERNATIONAL JOURNAL OF
**SOLIDS AND
STRUCTURES**

CONTENTS

W. Xu, H. Wang, X. Wu, X. Zhang, G. Bai and X. Huang	551	A novel method for residual strength prediction for sheets with multiple site damage: Methodology and experimental validation
X. Gao, F. Hao, Z. Huang and D. Fang	566	Mechanics of adhesive contact at the nanoscale: The effect of surface stress
R. F. Vieira, F. B. Virtuoso and E. B. R. Pereira	575	A higher order model for thin-walled structures with deformable cross-sections
L. Yuan and S. Kyriakides	599	Liner wrinkling and collapse of bi-material pipe under bending
M. Kamiński	612	Design sensitivity analysis for the homogenized elasticity tensor of a polymer filled with rubber particles
E. Lamacchia, A. Pirrera, I. V. Chenchiah and P. M. Weaver	622	Non-axisymmetric bending of thin annular plates due to circumferentially distributed moments
B. Röhrnbauer, G. Kress and E. Mazza	633	A physically based structural model for a textile prosthetic mesh
I. Guiamatsia and G. D. Nguyen	647	A thermodynamics-based cohesive model for interface debonding and friction
Y. Zhang, S. Zhang and J. Xia	660	Transient responses of porous media under moving surface impulses
H.-H. Yu and M. Diab	673	Boundary integral equations for 2D elasticity and its application in discrete dislocation dynamics simulation in finite body: 1. General theory
M. Diab and H.-H. Yu	680	Boundary integral equations for 2D elasticity and its application in discrete dislocation simulation in finite body: 2. Numerical implementation
A. D. Drozdov	690	Viscoplastic response of electrode particles in Li-ion batteries driven by insertion of lithium
M. Todt, R. D. Bitsche, M. A. Hartmann, F. D. Fischer and F. G. Rammerstorfer	706	Growth limit of carbon onions – A continuum mechanical study
S. Brisard, L. Dormieux and K. Sab	716	A variational form of the equivalent inclusion method for numerical homogenization
A. Lion, B. Dippel and C. Liebl	729	Thermomechanical material modelling based on a hybrid free energy density depending on pressure, isochoric deformation and temperature
Z. L. Kowalewski, T. Szymczak and J. Maciejewski	740	Material effects during monotonic-cyclic loading
C. Z. Katcoff and L. L. Graham-Brady	754	Modeling dynamic brittle behavior of materials with circular flaws or pores
R. Nedin, S. Nesterov and A. Vatulyan	767	On an inverse problem for inhomogeneous thermoelastic rod

(Continued on inside back cover)

E. Moaseri, M. Karimi, M. Maghrebi and M. Baniadam	774	Two-fold enhancement in tensile strength of carbon nanotube–carbon fiber hybrid epoxy composites through combination of electrophoretic deposition and alternating electric field
N. Zhang, C.-F. Gao and Q. Jiang	786	Solution of a flat elliptical crack in an electrostrictive solid
T. Richeton and S. Berbenni	794	From bicrystals to spherical inclusions: A superposition method to derive analytical expressions of stress fields in presence of plastic strain gradients
K. G. Rakvåg, T. Børvik and O. S. Hopperstad	808	A numerical study on the deformation and fracture modes of steel projectiles during Taylor bar impact tests
G.-P. Zéhil and H. P. Gavin	822	Rolling resistance of a rigid sphere with viscoelastic coatings
G. Hütter, L. Zymbell and M. Kuna	839	Size effects due to secondary voids during ductile crack propagation
M. Gei, S. Colonnelli and R. Springhetti	848	The role of electrostriction on the stability of dielectric elastomer actuators
O. Cazacu, B. Revil-Baudard, N. Chandola and D. Kondo	861	New analytical criterion for porous solids with Tresca matrix under axisymmetric loadings
A. Ortiz-Bernardin, R. Bustamante and K. R. Rajagopal	875	A numerical study of elastic bodies that are described by constitutive equations that exhibit limited strains
H.-D. Yong, Z. Jing and Y.-H. Zhou	886	Crack problem for superconducting strip with finite thickness
W. D. Yang, W. Zhang, X. Wang and G. Lu	894	Nonlinear delamination buckling and expansion of functionally graded laminated piezoelectric composite shells
W. Shi	904	Equivalence of the notch stress intensity factor, tip opening displacement and energy release rate for a sharp V-notch
F. Guo, L. Guo, H. Yu and L. Zhang	910	Thermal fracture analysis of nonhomogeneous piezoelectric materials using an interaction energy integral method
P. Phurkhao	922	Erratum to “Compressional waves in fluid-saturated porous solid containing a penny-shaped crack” [Int. J. Solids Struct. (2013) 4292–4304]
