SPECIAL ISSUE ON CUTTING EDGE OF COMPUTER SIMULATION OF SOLIDIFICATION,
CASTING AND REFINING

CONTENTS

- 253 Preface to the special issue on "cutting edge of computer simulation of solidification, casting and refining"
K. NAKAJIMA
- 254 Numerical simulation for optimizing temperature gradients during single crystal casting process
A. A. INOZEMTSEV, A. S. DUBROVSKAYA, K. A. DONGAUZER and N. A. TRUFANOV
- 259 Closed chain simulations of a cast aluminium component - incorporating casting process simulation and local material characterization into stress-strain simulations
J. OLOFSSON and I. L. SVENSSON
- 266 Simulation of horizontal centrifugal casting: Mold filling and solidification
J. BOHACEK, A. KHARICHA, A. LUDWIG and M. WU
- 275 Water analog experimental method for the diffusion and distribution of alloy elements in liquid steel during ingot filling process
J. KANG, C. DONG, X. HAO, G. NIE, H. SHEN and B. LIU
- 281 Ultrasonic treatment of the 304 stainless steel melt
J. KANG, X. ZHANG, Y. HU, J. MA, Y. HU and T. HUANG
- 288 Undercooling, cooling curves and nodule count for near-eutectic thin-walled ductile iron castings
W. KAPTURKIEWICZ, A. BURBELKO and M. GÓRNY
- 294 Mathematical modeling and microstructure analysis of Al-Mg-Sc-Zr alloy strips produced by Horizontal Single Belt Casting (HSBC)
S. GE, M. CELIKIN, M. ISAC and R. I. L. GUTHRIE
- 304 Numerical investigation of unsteady molten steel flow and inclusion behavior in the tundish in the ladle change period
K. TAKAHASHI, M. ANDO and T. ISHII
- 311 Modeling of a thermo-electromagneto-hydrodynamic problem in continuous casting tundish with channel type induction heating
Q. WANG, B. LI and F. TSUKIHASHI
- 321 Effect of coil design on the temperature and velocity fields during solidification in electromagnetic stirring processes
G. POOLE and N. EL-KADDAH
- 328 Real-time heat transfer model based on variable non-uniform grid for dynamic control of continuous casting billets
J. YANG, Z. XIE, Z. JI and H. MENG
- 336 Thermo-mechanical modeling in continuous slab casting mould and its application
D. ZHANG, S. LEI, S. ZENG and H. SHEN
- 342 Recent developments of a numerical model for continuous casting of steel: Model theory, setup and comparison to physical modelling with liquid metal
P. E. RAMIREZ LOPEZ, P. N. JALALI, J. BJÖRKVALL, U. SJÖSTRÖM and C. NILSSON
- 351 Two-phase modeling of macrosegregation in a 231 t steel ingot
W. TU, H. SHEN and B. LIU
- 356 Macrosegregation and its formation mechanism in steel ingot with designed local thermal control (Note)
X. MA and D. LI
- 359 Simulation of the center-line segregation generated by the formation of bridging
T. MURAO, T. KAJITANI, H. YAMAMURA, K. ANZAI, K. OIKAWA and T. SAWADA
- 366 Evaluation of permeability for columnar dendritic structures by three-dimensional numerical flow analysis
Y. NATSUME, D. TAKAHASHI, K. KAWASHIMA, E. TANIGAWA and K. OHSASA
- 374 Partial equilibrium prediction of solidification and carbide precipitation in Ti-added high Cr cast irons
H. ZHANG, Q. LIU, H. SHIBATA, Q. WANG, P. JÖNSSON, J. HE and K. NAKAJIMA
- 384 Cellular automaton modeling of microporosity formation during solidification of aluminum alloys
M. ZHU, Z. LI, D. AN, Q. ZHANG and T. DAI
- 392 Coupled Cellular Automaton (CA) – Finite Element (FE) modeling of directional solidification of Al-3.5 wt% Ni alloy: A comparison with X-ray synchrotron observations
D. R. LIU, G. REINHART, N. MANGELINCK-NOEL, C.-A. GANDIN, H. NGUYEN-THI and B. BILLIA
- 401 3D coupled Cellular Automaton (CA)–Finite Element (FE) modeling for solidification grain structures in Gas Tungsten Arc Welding (GTAW)
S. CHEN, G. GUILLEMOT and C.-A. GANDIN
- 408 Numerical simulation of microstructure evolution of heavy steel casting in casting and heat treatment processes
B. SU, Z. HAN, Y. ZHAO, B. SHEN, E. XU, S. HUANG and B. LIU

(Continued on inside backcover)

- 415 Three-dimensional cellular automaton model for the prediction of microsegregation in solidification grain structures
Y. NATSUME and K. OHSASA
- 422 Modeling of ferrite-austenite phase transformation using a cellular automaton model
D. AN, S. PAN, L. HUANG, T. DAI, B. KRAKAUER and M. ZHU
- 430 Growth of secondary dendrite arms of Fe–C alloy during transient directional solidification by phase-field method
Y. XIE, H. DONG and J. DANTZIG
- 437 Phase-field modeling and simulations of dendrite growth (Review)
T. TAKAKI
- 445 Quantitative phase-field simulation of dendritic equiaxed growth and comparison with in situ observation on Al – 4 wt.% Cu alloy by means of synchrotron X-ray radiography
Y. CHEN, D. Z. LI, B. BILLIA, H. NGUYEN-THI, X. B. QI and N. M. XIAO
- 452 Multiscale hot-working simulations using multi-phase-field and finite element dynamic recrystallization model
C. YOSHIMOTO and T. TAKAKI
- 460 Determination of the columnar to equiaxed transition in hypoeutectic lamellar cast iron
P. SVIDRÓ and A. DIÓSZEGI
- 466 Mechanism of the peritectic phase transition in Fe–C and Fe–Ni alloys under conditions close to chemical and thermal equilibrium
S. GRIESSER, C. BERNHARD and R. DIPPENAAR
- 474 Erratum

**A-3 Abstracts of the papers published in Tetsu-to-Hagané Vol. 100 (2014), No. 2
Program of ISIJ 167th Meeting**

ISIJ International Web site, <https://www.isij.or.jp/journal/isijinternational/?lang=english>

Price of ISIJ International

Vol. 54 (2014), Nos. 1 to 12 for Overseas

Price: Regular issue @¥4,000	Special issue @¥6,000	Airmail Service :
Annual subscription fee (additional subscription for members): ¥5,000/year	Free of seamail charge	Overseas & Non-Members Asia ¥8,000/year Other Areas ¥10,500/year

ISIJ International Vol. 54 (2014), No. 2 (February)
