

ON THE COVER: The images shown on the cover were taken from papers in this issue: (top left) Solutions of the isoactivity equations for the CCl_4 (1) + 2-propanol (2) + H_2O (3) system (see DOI: 10.1021/je500204v). (top right) Cell potential residuals for a Pt, H_2 | H_2SO_4 | PbSO_4 , Pb cell as a function of temperature and molality of the aqueous H_2SO_4 solution (see DOI: 10.1021/je4011147). (bottom left) Solubility of calcium-L-lactate pentahydrate (CLLP) in the CLLP (A) + ethanol (B) + water (C) system as a function of temperature and the initial mole fraction of ethanol in the ethanol/water solvent mixture (see DOI: 10.1021/je500416k). (bottom right) Direct-current conductivities of DMSO + KI electrolyte mixtures with different KI mole fractions (x) at different temperatures (see DOI: 10.1021/je4010678).
