SPECIAL TOPIC: ADVANCES IN DENSITY FUNCTIONAL THEORY

Preface: Special Topic on Advances in Density Functional Theory (1 page) Weitao Yang	18A101
Editorial	
Editorial: Reflections on fifty years of density functional theory (1 page) Walter Kohn and C. David Sherrill	18A201
Perspective	
Perspective: Fifty years of density-functional theory in chemical physics (18 pages) Axel D. Becke	18A301
Articles	
Random-phase approximation correlation energies from Lanczos chains and an optimal basis set: Theory and applications to the benzene dimer (8 pages) Dario Rocca	18A501
Introducing constricted variational density functional theory in its relaxed self-consistent formulation (RSCF-CV-DFT) as an alternative to adiabatic time dependent density functional theory for studies of charge transfer transitions (11 pages) Mykhaylo Krykunov, Mike Seth, and Tom Ziegler	18A502
Analytic energy gradients for constrained DFT-configuration interaction (14 pages) Benjamin Kaduk, Takashi Tsuchimochi, and Troy Van Voorhis	18A503
Metallophilic interactions from dispersion-corrected density-functional theory (11 pages) Alberto Otero-de-la-Roza, Joel D. Mallory, and Erin R. Johnson	18A504
Exact exchange plane-wave-pseudopotential calculations for slabs (14 pages) Eberhard Engel	18A505
Molecular properties of excited electronic state: Formalism, implementation, and applications of analytical second energy derivatives within the framework of the time-dependent density functional theory/molecular mechanics (16 pages) Qiao Zeng, Jie Liu, and WanZhen Liang	18A506
Accurate and systematically improvable density functional theory embedding for correlated wavefunctions (9 pages) Jason D. Goodpaster, Taylor A. Barnes, Frederick R. Manby, and Thomas F. Miller III	18A507
Long-range correlation energy calculated from coupled atomic response functions (14 pages) Alberto Ambrosetti, Anthony M. Reilly, Robert A. DiStasio, Jr., and Alexandre Tkatchenko	18A508
Towards a systematic way to correct density functional approximations (5 pages) Andreas Savin	18A509

A self-interaction-free local hybrid functional: Accurate binding energies vis-à-vis accurate ionization potentials from Kohn-Sham eigenvalues (14 pages) Tobias Schmidt, Eli Kraisler, Adi Makmal, Leeor Kronik, and Stephan Kümmel	18A510
Exchange-correlation energy from pairing matrix fluctuation and the particle-particle random phase approximation (11 pages) Helen van Aggelen, Yang Yang, and Weitao Yang	18A511
Construction of a parameter-free doubly hybrid density functional from adiabatic connection (15 pages) Neil Qiang Su and Xin Xu	18A512
Self-interaction corrections in density functional theory (13 pages) Takao Tsuneda and Kimihiko Hirao	18A513
Ensemble density variational methods with self- and ghost-interaction-corrected functionals (7 pages) Ewa Pastorzak and Katarzyna Pernal	18A514
Kinetic and interaction components of the exact time-dependent correlation potential (12 pages) Kai Luo, Johanna I. Fuks, Ernesto D. Sandoval, Peter Elliott, and Neepa T. Maitra	18A515
How important is self-consistency for the dDsC density dependent dispersion correction? (11 pages) Éric Brémond, Nikolay Golubev, Stephan N. Steinmann, and Clémence Corminboeuf	18A516
Response calculations based on an independent particle system with the exact one-particle density matrix: Polarizabilities (9 pages) K. J. H. Giesbertz, O. V. Gritsenko, and E. J. Baerends	18A517
Differentiable but exact formulation of density-functional theory (13 pages) Simen Kvaal, Ulf Ekström, Andrew M. Teale, and Trygve Helgaker	18A518
The one-electron oxidation of a dithiolate molecule: The importance of chemical intuition (6 pages) Eric A. C. Bushnell, Thomas D. Burns, and Russell J. Boyd	18A519
Evaluation of model exchange-correlation kernels in the adiabatic connection fluctuation-dissipation theorem for inhomogeneous systems (8 pages) Deyu Lu	18A520
Thermally-assisted-occupation density functional theory with generalized-gradient approximations (10 pages) Jeng-Da Chai	18A521
Linear-response time-dependent density-functional theory with pairing fields (10 pages) Degao Peng, Helen van Aggelen, Yang Yang, and Weitao Yang	18A522
Nonlinear response time-dependent density functional theory combined with the effective fragment potential method (10 pages) Federico Zahariev and Mark S. Gordon	18A523
Uniform electron gases. II. The generalized local density approximation in one dimension (11 pages) Pierre-François Loos, Caleb J. Ball, and Peter M. W. Gill	18A524
Current density partitioning in time-dependent current density functional theory (8 pages) Martín A. Mosquera and Adam Wasserman	18A525
Ultra-nonlocality in density functional theory for photo-emission spectroscopy (11 pages) A.-M. Uimonen, G. Stefanucci, and R. van Leeuwen	18A526
Exploring the limit of accuracy for density functionals based on the generalized gradient approximation: Local, global hybrid, and range-separated hybrid functionals with and without dispersion corrections (15 pages) Narbe Mardirossian and Martin Head-Gordon	18A527
Ions in solution: Density corrected density functional theory (DC-DFT) (10 pages) Min-Cheol Kim, Eunji Sim, and Kieron Burke	18A528

(Continued)

A divide-conquer-recombine algorithmic paradigm for large spatiotemporal quantum molecular dynamics simulations (14 pages) Fuyuki Shimojo, Shinnosuke Hattori, Rajiv K. Kalia, Manaschai Kunaseth, Weiwei Mou, Aiichiro Nakano, Ken-ichi Nomura, Satoshi Ohmura, Pankaj Rajak, Kohei Shimamura, and Priya Vashishta	18A529
Embedding potentials for excited states of embedded species (7 pages) Tomasz A. Wesolowski	18A530
Enhanced von Weizsäcker Wang-Govind-Carter kinetic energy density functional for semiconductors (14 pages) Ilgyou Shin and Emily A. Carter	18A531
Energy density functionals from the strong-coupling limit applied to the anions of the He isoelectronic series (11 pages) André Mirtschink, C. J. Umrigar, John D. Morgan III, and Paola Gori-Giorgi	18A532
Gedanken densities and exact constraints in density functional theory (8 pages) John P. Perdew, Adrienn Ruzsinszky, Jianwei Sun, and Kieron Burke	18A533
Increasing the applicability of density functional theory. IV. Consequences of ionization-potential improved exchange-correlation potentials (11 pages) Prakash Verma and Rodney J. Bartlett	18A534
Hierarchy of model Kohn–Sham potentials for orbital-dependent functionals: A practical alternative to the optimized effective potential method (10 pages) Sviataslau V. Kohut, Ilya G. Ryabinkin, and Viktor N. Staroverov	18A535
Using the electron localization function to correct for confinement physics in semi-local density functional theory (9 pages) Feng Hao, Rickard Armiento, and Ann E. Mattsson	18A536
Tight constraints on the exchange-correlation potentials of degenerate states (4 pages) Paul W. Ayers and Mel Levy	18A537
Kinetic and electron-electron energies for convex sums of ground state densities with degeneracies and fractional electron number (7 pages) Mel Levy, James S. M. Anderson, Farnaz Heidar Zadeh, and Paul W. Ayers	18A538
van der Waals density functionals built upon the electron-gas tradition: Facing the challenge of competing interactions (12 pages) Kristian Berland, Calvin A. Arter, Valentino R. Cooper, Kyuho Lee, Bengt I. Lundqvist, Elsebeth Schröder, T. Thonhauser, and Per Hyldgaard	18A539
Fundamental gaps with approximate density functionals: The derivative discontinuity revealed from ensemble considerations (10 pages) Eli Kraisler and Leor Kronik	18A540
Excitations and benchmark ensemble density functional theory for two electrons (13 pages) Aurora Pribram-Jones, Zeng-hui Yang, John R. Trail, Kieron Burke, Richard J. Needs, and Carsten A. Ullrich	18A541
Dispersion-correcting potentials can significantly improve the bond dissociation enthalpies and noncovalent binding energies predicted by density-functional theory (13 pages) Gino A. DiLabio and Mohammad Koleini	18A542
