On the edge energy of lipid membranes and the thermodynamic stability of pores

ARTICLES

Theoretical Methods and Algorithms

On the edge energy of lipid membranes and the thermodynamic stability of pores

H. Pera, J. M. Kleijn and F. A. M. Leermakers

J. Chem. Phys. 142, 034101 (2015)

The ab-initio density matrix renormalization group in practice

Roberto Olivares-Amaya, Weifeng Hu, Naoki Nakatani, Sandeep Sharma, Jun Yang and Garnet Kin-Lic Chan

J. Chem. Phys. 142, 034102 (2015)

Hybrid pathwise sensitivity methods for discrete stochastic models of chemical reaction systems

Elizabeth Skubak Wolf and David F. Anderson

J. Chem. Phys. 142, 034103 (2015)

Towards an exact theory of linear absorbance and circular dichroism of pigment-protein complexes: Importance of non-secular contributions

Thanh-Chung Dinh and Thomas Renger

J. Chem. Phys. 142, 034104 (2015)

Short-range stabilizing potential for computing energies and lifetimes of temporary anions with extrapolation methods

Thomas Sommerfeld and Masahiro Ehara

J. Chem. Phys. 142, 034105 (2015);

Sublinear scaling for time-dependent stochastic density functional theory

Yi Gao, Daniel Neuhauser, Roi Baer and Eran Rabani

J. Chem. Phys. 142, 034106 (2015);

Deviations from piecewise linearity in the solid-state limit with approximate density functionals

Vojtěch Vlček, Helen R. Eisenberg, Gerd Steinle-Neumann, Leor Kronik and Roi Baer

J. Chem. Phys. 142, 034107 (2015);

A finite-element visualization of quantum reactive scattering. II. Nonadiabaticity on coupled potential energy surfaces

Mick Warehime, Jacek Kłos and Millard H. Alexander

J. Chem. Phys. 142, 034108 (2015);

On the accuracy of coherent modified Redfield theory in simulating excitation energy transfer dynamics

Yu Chang and Yuan-Chung Cheng

J. Chem. Phys. 142, 034109 (2015);

Accuracy of maximum likelihood estimates of a two-state model in single-molecule FRET

Irina V. Gopich

J. Chem. Phys. 142, 034110 (2015);

Self-consistent continuum solvation for optical absorption of complex molecular systems in solution

Iurii Timrov, Oliviero Andreussi, Alessandro Biancardi, Nicola Marzari and Stefano Baroni
J. Chem. Phys. 142, 034111 (2015);

Stabilized quasi-Newton optimization of noisy potential energy surfaces

Bastian Schaefer, S. Alireza Ghasemi, Shantanu Roy and Stefan Goedecker
J. Chem. Phys. 142, 034112 (2015)

Fundamental aspects of recoupled pair bonds. I. Recoupled pair bonds in carbon and sulfur monofluoride

Thom H. Dunning Jr., Lu T. Xu and Tyler Y. Takeshita
J. Chem. Phys. 142, 034113 (2015);

Fundamental aspects of recoupled pair bonds. II. Recoupled pair bond dyads in carbon and sulfur difluoride

Thom H. Dunning Jr., Tyler Y. Takeshita and Lu T. Xu
J. Chem. Phys. 142, 034114 (2015);

Non-Markovian Quantum State Diffusion for temperature-dependent linear spectra of light harvesting aggregates

Gerhard Ritschel, Daniel Suess, Sebastian Möbius, Walter T. Strunz and Alexander Eisfeld
J. Chem. Phys. 142, 034115 (2015)

Two-component hybrid time-dependent density functional theory within the Tamm-Dancoff approximation

Michael Kühn and Florian Weigend
J. Chem. Phys. 142, 034116 (2015);

Arbitrary order permanent Cartesian multipolar electrostatic interactions

H. A. Boateng and I. T. Todorov
J. Chem. Phys. 142, 034117 (2015);

Adaptive hybrid simulations for multiscale stochastic reaction networks

Benjamin Hepp, Ankit Gupta and Mustafa Khammash
J. Chem. Phys. 142, 034118 (2015)

Molecular quantum mechanical gradients within the polarizable embedding approach—Application to the internal vibrational Stark shift of acetophenone

Nanna Holmgaard List, Maarten T. P. Beerepoot, Jógvan Magnus Haugaard Olsen, Bin Gao, Kenneth Ruud, Hans Jørgen Aagaard Jensen and Jacob Kongsted
J. Chem. Phys. 142, 034119 (2015)

Time-dependent non-equilibrium dielectric response in QM/continuum approaches

Feizhi Ding, David B. Lingerfelt, Benedetta Mennucci and Xiaosong Li
J. Chem. Phys. 142, 034120 (2015)

Atoms, Molecules, and Clusters

Low energy electron attachment to cyanamide (NH₂CN)

Katrin Tanzer, Andrzej Pelc, Stefan E. Huber, Z. Czupyt and Stephan Denifl
J. Chem. Phys. 142, 034301 (2015)

Theoretical reproduction of the Q-band absorption spectrum of free-base chlorin

Justyna Wójcik, Alicja Ratuszna, Jerzy Peszke and Roman Wrzalik
J. Chem. Phys. 142, 034302 (2015);

Theoretical investigation of stabilities and optical properties of Si₁₂C₁₂ clusters

Xiaofeng F. Duan and Larry W. Burggraf
J. Chem. Phys. 142, 034303 (2015);

Systematic theoretical investigation of the zero-field splitting in Gd(III) complexes: Wave function and density functional approaches

Shehryar Khan, Aleksandra Kubica-Misztal, Danuta Kruk, Jozef Kowalewski and Michael Odelius
J. Chem. Phys. 142, 034304 (2015)

Second virial coefficient of a generalized Lennard-Jones potential

Alfredo González-Calderón and Adrián Rocha-Ichante

J. Chem. Phys. 142, 034305 (2015);

Hartree-Fock calculation of the differential photoionization cross sections of small Li clusters

S. A. Galitskiy, A. N. Artemyev, K. Jänkälä, B. M. Lagutin and Ph. V. Demekhin

J. Chem. Phys. 142, 034306 (2015);

Tetrel, chalcogen, and CH₂O hydrogen bonds in complexes pairing carbonyl-containing molecules with 1, 2, and 3 molecules of CO₂

Luis M. Azofra and Steve Scheiner

J. Chem. Phys. 142, 034307 (2015);

Theoretical study on the ground state of the polar alkali-metal-barium molecules: Potential energy curve and permanent dipole moment

Dezhi Gou, Xiaoyu Kuang, Yufeng Gao and Dongming Huo

J. Chem. Phys. 142, 034308 (2015);

Differential and integral cross sections in OH(X) + Xe collisions

Gautam Sarma, Ashim Kumar Saha, J. J. ter Meulen, David H. Parker and Sarantos Marinakis

J. Chem. Phys. 142, 034309 (2015)

Optical absorption spectra of palladium doped gold cluster cations

Vladimir E. Kaydashev, Ewald Janssens and Peter Lievens

J. Chem. Phys. 142, 034310 (2015)

Interaction of the NO 3p π (C 2 Π) Rydberg state with RG (RG = Ne, Kr, and Xe): Potential energy surfaces and spectroscopy

Olga V. Ershova, Jacek Kłos, Nicholas A. Besley and Timothy G. Wright

J. Chem. Phys. 142, 034311 (2015);

Liquids, Glasses, and Crystals

Isobaric first-principles molecular dynamics of liquid water with nonlocal van der Waals interactions

Giacomo Miceli, Stefano de Gironcoli and Alfredo Pasquarello

J. Chem. Phys. 142, 034501 (2015);

Effects of the surroundings and conformerisation of n-dodecane molecules on evaporation/condensation processes

Vladimir M. Gun'ko, Rasoul Nasiri and Sergei S. Sazhin

J. Chem. Phys. 142, 034502 (2015);

Change of translational-rotational coupling in liquids revealed by field-cycling 1H NMR

R. Meier, E. Schneider and E. A. Rössler

J. Chem. Phys. 142, 034503 (2015)

Range effect on percolation threshold and structural properties for short-range attractive spheres

Jiachen Wei, Limei Xu and Fan Song

J. Chem. Phys. 142, 034504 (2015);

Density relaxation and particle motion characteristics in a non-ionic deep eutectic solvent (acetamide + urea): Time-resolved fluorescence measurements and all-atom molecular dynamics simulations

Anuradha Das, Suman Das and Ranjit Biswas

J. Chem. Phys. 142, 034505 (2015);

Surfaces, Interfaces, and Materials

Space- and time-dependent quantum dynamics of spatially indirect excitons in semiconductor heterostructures

Federico Grasselli, Andrea Bertoni and Guido Goldoni

J. Chem. Phys. 142, 034701 (2015);

Pressure-induced transformations of onion-like carbon nanospheres up to 48 GPa

Weiwei Zhang, Mingguang Yao, Xianhong Fan, Shijia Zhao, Shuanglong Chen, Chen Gong, Ye Yuan, Ran Liu and Bingbing Liu

J. Chem. Phys. 142, 034702 (2015);

Effect of the hydroaffinity and topology of pore walls on the structure and dynamics of confined water

Michael F. Harrach, Felix Klameth, Barbara Drossel and Michael Vogel

J. Chem. Phys. 142, 034703 (2015);

Wetting behavior of nonpolar nanotubes in simple dipolar liquids for varying nanotube diameter and solute-solvent interactions

Malay Kumar Rana and Amalendu Chandra

J. Chem. Phys. 142, 034704 (2015);

Adhesion of nanoparticles to polymer brushes studied with the ghost tweezers method

Jianli Cheng, Aleksey Vishnyakov and Alexander V. Neimark

J. Chem. Phys. 142, 034705 (2015);

Local order of liquid water at metallic electrode surfaces

Luana S. Pedroza, Adrien Poissier and M.-V. Fernández-Serra

J. Chem. Phys. 142, 034706 (2015);

Effect of gold subsurface layer on the surface activity and segregation in Pt/Au/Pt₃M (where M = 3d transition metals) alloy catalyst from first-principles

Chang-Eun Kim, Dong-Hee Lim, Jong Hyun Jang, Hyoung Juhn Kim, Sung Pil Yoon, Jonghee Han, Suk Woo Nam, Seong-Ahn Hong, Aloysius Soon and Hyung Chul Ham

J. Chem. Phys. 142, 034707 (2015);

Wetting of prototypical one- and two-dimensional systems: Thermodynamics and density functional theory

Petr Yatsyshin, Nikos Savva and Serafim Kalliadas

J. Chem. Phys. 142, 034708 (2015);

Polymers and Soft Matter

Effects of rotational symmetry breaking in polymer-coated nanopores

D. Osmanović, M. Kerr-Winter, R. C. Eccleston, B. W. Hoogenboom and I. J. Ford

J. Chem. Phys. 142, 034901 (2015);

Theory of melt polyelectrolyte blends and block copolymers: Phase behavior, surface tension, and microphase periodicity

Charles E. Sing, Jos W. Zwanikken and Monica Olvera de la Cruz

J. Chem. Phys. 142, 034902 (2015)

DNA denaturation bubbles: Free-energy landscape and nucleation/closure rates

François Sicard, Nicolas Destainville and Manoel Manghi

J. Chem. Phys. 142, 034903 (2015);

Structure and osmotic pressure of ionic microgel dispersions

Mary M. Hedrick, Jun Kyung Chung and Alan R. Denton

J. Chem. Phys. 142, 034904 (2015);

Biological Molecules and Networks

Probing the folded state and mechanical unfolding pathways of T4 lysozyme using all-atom and coarse-grained molecular simulation

Wenjun Zheng and Paul Glenn

J. Chem. Phys. 142, 035101 (2015)
