JANUARY 2013

Volume 138 Number 8

AIP | The Journal of Chemical Physics

80th
Anniversary

jcp.aip.org

► **Cover image** from *Jinying Wang, Ruiqi Zhao, Mingmei Yang, Zhongfan Liu, and Zhirong Liu, J. Chem. Phys.* **138**, 084701 (2013).

COMMUNICATIONS

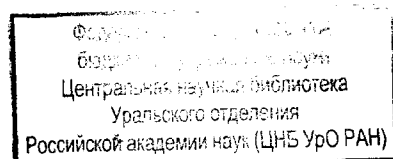

- Communication: Influence of graphene interlayers on the interaction between cobalt phthalocyanine and Ni(111)** (4 pages)
Johannes Uihlein, Heiko Peisert, Mathias Glaser, Małgorzata Polek, Hilmar Adler, Fotini Petraki, Ruslan Ovsyannikov, Maximilian Bauer, and Thomas Chassé 081101
- Communication: Simplified two-beam rotational CARS signal generation demonstrated in 1D** (4 pages)
Alexis Bohlin, Brian D. Patterson, and Christopher J. Kliewer 081102

ARTICLES

Theoretical Methods and Algorithms

- Multi-configuration time-dependent density-functional theory based on range separation** (14 pages)
Emmanuel Fromager, Stefan Knecht, and Hans Jørgen Aa. Jensen 084101
- Useful lower limits to polarization contributions to intermolecular interactions using a minimal basis of localized orthogonal orbitals: Theory and analysis of the water dimer** (14 pages)
R. Julian Azar, Paul Richard Horn, Eric Jon Sundstrom, and Martin Head-Gordon 084102
- Accuracy of a Markov state model generated by searching for basin escape pathways** (9 pages)
Vijesh J. Bhute and Abhijit Chatterjee 084103
- Multidimensional master equation and its Monte-Carlo simulation** (5 pages)
Juan Pang, Zhan-Wu Bai, and Jing-Dong Bao 084104
- Infinite swapping replica exchange molecular dynamics leads to a simple simulation patch using mixture potentials** (9 pages)
Jianfeng Lu and Eric Vanden-Eijnden 084105
- An effective method for computing the noise in biochemical networks** (16 pages)
Jiajun Zhang, Qing Nie, Miao He, and Tianshou Zhou 084106
- On the statistical equivalence of restrained-ensemble simulations with the maximum entropy method** (8 pages)
Benoît Roux and Jonathan Weare 084107
- Derivation of a true ($t \rightarrow 0$,) quantum transition-state theory. I. Uniqueness and equivalence to ring-polymer molecular dynamics transition-state-theory** (13 pages)
Timothy J. H. Hele and Stuart C. Althorpe 084108
- Minimum energy pathways via quantum Monte Carlo** (5 pages)
S. Saccani, C. Filippi, and S. Moroni 084109
- All-time dynamics of continuous-time random walks on complex networks** (7 pages)
Hamid Teimouri and Anatoly B. Kolomeisky 084110
- Dynamics of the sub-Ohmic spin-boson model: A time-dependent variational study** (7 pages)
Ning Wu, Liwei Duan, Xin Li, and Yang Zhao 084111

Atoms, Molecules, and Clusters

- Potential energy curves for the interaction of Ag(5s) and Ag(5p) with noble gas atoms (8 pages)**
 J. Loreau, H. R. Sadeghpour, and A. Dalgarno 084301
- Relaxation of rotational-vibrational energy and volume viscosity in H-H₂ mixtures (17 pages)**
 Domenico Bruno, Fabrizio Esposito, and Vincent Giovangigli 084302
- EXAFS Debye-Waller factors issued from Car-Parrinello molecular dynamics: Application to the fit of oxaliplatin and derivatives (10 pages)**
 K. Provost, E. C. Beret, D. Bouvet Muller, A. Michalowicz, and E. Sánchez Marcos 084303
- The toluene-Ar complex: S₀ and S₁ van der Waals modes, changes to methyl rotation, and torsion-van der Waals vibration coupling (11 pages)**
 Jason R. Gascooke and Warren D. Lawrance 084304
- Ab initio based potential energy surface and kinetics study of the OH + NH₃ hydrogen abstraction reaction (14 pages)**
 M. Monge-Palacios, C. Rangel, and J. Espinosa-Garcia 084305
- On the structures and bonding in boron-gold alloy clusters: B₆Au_n⁻ and B₆Au_n (n = 1–3) (8 pages)**
 Qiang Chen, Hua-Jin Zhai, Si-Dian Li, and Lai-Sheng Wang 084306
- A comprehensive experimental and theoretical study of H₂-CO spectra (23 pages)**
 Piotr Jankowski, L. A. Surin, A. Potapov, S. Schlemmer, A. R. W. McKellar,
 and Krzysztof Szalewicz 084307
- Dielectric controlled excited state relaxation pathways of a representative push-pull stilbene: A mechanistic study using femtosecond fluorescence up-conversion technique (10 pages)**
 Shahnawaz Rafiq and Pratik Sen 084308
- Calculation of the transport properties of a dilute gas consisting of Lennard-Jones chains (11 pages)**
 Robert Hellmann, Nicolas Riesco, and Velisa Vesovic 084309

Liquids, Glasses, and Crystals

- Fast scanning calorimetry studies of the glass transition in doped amorphous solid water: Evidence for the existence of a unique vicinal phase (10 pages)**
 Stephanie A. McCartney and Vlad Sadtchenko 084501
- Phase transitions in four-dimensional binary hard hypersphere mixtures (8 pages)**
 Marvin Bishop and Paula A. Whitlock 084502
- Thermostats and thermostat strategies for molecular dynamics simulations of nanofluidics (10 pages)**
 Xin Yong and Lucy T. Zhang 084503
- Validation of density functionals for transition metals and intermetallics using data from quantitative electron diffraction (11 pages)**
 Xiahan Sang, Andreas Kulovits, Guofeng Wang, and Jörg Wiezorek 084504
- Anomalies in a waterlike model confined between plates (12 pages)**
 Leandro B. Krott and Marcia C. Barbosa 084505
- Fluid-solid equilibrium of carbon dioxide as obtained from computer simulations of several popular potential models: The role of the quadrupole (9 pages)**
 G. Pérez-Sánchez, D. González-Salgado, M. M. Piñeiro, and C. Vega 084506
- Sudden switchover between the polyamorphic phase separation and the glass-to-liquid transition in glassy LiCl aqueous solutions (9 pages)**
 Yoshiharu Suzuki and Osamu Mishima 084507

(Continued)

Homogeneous bubble nucleation in water at negative pressure: A Voronoi polyhedra analysis (11 pages) Jose L. F. Abascal, Miguel A. Gonzalez, Juan L. Aragonés, and C. Valeriani	084508
The force distribution probability function for simple fluids by density functional theory (7 pages) G. Rickayzen and D. M. Heyes	084509
Self-consistent phonon theory of the crystallization and elasticity of attractive hard spheres (13 pages) Homin Shin and Kenneth S. Schweizer	084510
Mathematical analysis of recent analytical approximations to the collapse of an empty spherical bubble (3 pages) Paolo Amore and Francisco M. Fernández	084511
Post-shock relaxation in crystalline nitromethane (8 pages) Luis A. Rivera-Rivera, Thomas D. Sewell, and Donald L. Thompson	084512

Surfaces, Interfaces, and Materials

Inverse relationship between carrier mobility and bandgap in graphene (5 pages) Jinying Wang, Ruiqi Zhao, Mingmei Yang, Zhongfan Liu, and Zhirong Liu	084701
Mechanisms for the near-UV photodissociation of CH₃I on D₂O/Cu(110) (10 pages) E. R. Miller, G. D. Muirhead, and E. T. Jensen	084702
Photodissociation of methyl iodide adsorbed on low-temperature amorphous ice surfaces (9 pages) Alice J. DeSimone, Babajide O. Olanrewaju, Gregory A. Grieves, and Thomas M. Orlando	084703
Full DFT-D description of a nanoporous supramolecular network on a silicon surface (8 pages) Khaoula Boukari, Eric Duverger, and Philippe Sonnet	084704
Adsorption of lactic acid on chiral Pt surfaces—A density functional theory study (7 pages) J.-H. Franke and D. S. Kosov	084705
Probing defect emissions in bulk, micro- and nano-sized α-Al₂O₃ via X-ray excited optical luminescence (7 pages) Zhiqiang Wang, Chunlei Li, Lijia Liu, and Tsun-Kong Sham	084706
The role of dimensionality in the decay of surface effects (10 pages) Matthew G. Reuter, Nicholas M. Boffi, Mark A. Ratner, and Tamar Seideman	084707
Thermal conductivity predictions of herringbone graphite nanofibers using molecular dynamics simulations (8 pages) Masoud H. Khadem and Aaron P. Wemhoff	084708
Determination of phase equilibria in confined systems by open pore cell Monte Carlo method (11 pages) Minoru T. Miyahara and Hideki Tanaka	084709

Polymers and Soft Matter

Solvation effects on like-charge attraction (6 pages) Shahzad Ghanbarian and Jörg Rottler	084901
Translocation of short and long polymers through an interacting pore (9 pages) F. Piguet and D. P. Foster	084902

Biological Molecules and Networks

Coarse-grained simulations of DNA overstretching (10 pages) Flavio Romano, Debayan Chakraborty, Jonathan P. K. Doye, Thomas E. Ouldridge, and Ard A. Louis	085101
---	--------

(Continued)

Molecular dynamics simulation indicating cold denaturation of β-hairpins (10 pages) Qiang Shao, Jiye Shi, and Weiliang Zhu	085102
Derivation and assessment of phase-shifted, disordered vector field models for frustrated solvent interactions (17 pages) Jeffrey K. Weber and Vijay S. Pande	085103
Separated topologies—A method for relative binding free energy calculations using orientational restraints (9 pages) Gabriel J. Rocklin, David L. Mobley, and Ken A. Dill	085104
