PERSPECTIVES

- Perspective: Stochastic algorithms for chemical kinetics (14 pages)**
Daniel T. Gillespie, Andreas Hellander, and Linda R. Petzold 170901

COMMUNICATIONS

- Communication: Certifying the potential energy landscape (4 pages)**
Dhagash Mehta, Jonathan D. Hauenstein, and David J. Wales 171101

ARTICLES

Theoretical Methods and Algorithms

- A general moment expansion method for stochastic kinetic models (12 pages)**
Angelique Ale, Paul Kirk, and Michael P. H. Stumpf 174101
- Robust and efficient configurational molecular sampling via Langevin dynamics (12 pages)**
Benedict Leimkuhler and Charles Matthews 174102
- Excitation energy transfer efficiency: Equivalence of transient and stationary setting and the absence of non-Markovian effects (10 pages)**
Simon Jesenko and Marko Žnidarič 174103
- A linear- and sublinear-scaling method for calculating NMR shieldings in atomic orbital-based second-order Møller-Plesset perturbation theory (15 pages)**
Marina Maurer and Christian Ochsenfeld 174104
- A nonempirical scaling correction approach for density functional methods involving substantial amount of Hartree–Fock exchange (7 pages)**
Xiao Zheng, Ting Zhou, and Weitao Yang 174105
- Hierarchical Nyström methods for constructing Markov state models for conformational dynamics (10 pages)**
Yuan Yao, Raymond Z. Cui, Gregory R. Bowman, Daniel-Adriano Silva, Jian Sun, and Xuhui Huang 174106
- A comparison model between density functional and wave function theories by means of the Löwdin partitioning technique (5 pages)**
Marc Caballero, Ibério de P. R. Moreira, and Josep Maria Bofill 174107
- Computational IR spectroscopy of water: OH stretch frequencies, transition dipoles, and intermolecular vibrational coupling constants (18 pages)**
Jun-Ho Choi and Minhaeng Cho 174108
- Three new branched chain equations of state based on Wertheim's perturbation theory (9 pages)**
Bennett D. Marshall and Walter G. Chapman 174109
- A simplified representation of anisotropic charge distributions within proteins (11 pages)**
Travis Hoppe 174110

Quantum transport with two interacting conduction channels (6 pages) Alexander J. White, Agostino Migliore, Michael Galperin, and Abraham Nitzan	174111
Monte Carlo simulation strategies to compute interfacial and bulk properties of binary fluid mixtures (14 pages) Vaibhaw Kumar and Jeffrey R. Errington	174112
Relativistic energy-consistent pseudopotentials for superheavy elements 119 and 120 including quantum electrodynamic effects (8 pages) Tim Hangele, Michael Dolg, and Peter Schwerdtfeger	174113
Mean field QM/MM method: Average position approximation (7 pages) Fengchao Cui and Hui Li	174114
Towards the blackbox computation of magnetic exchange coupling parameters in polynuclear transition-metal complexes: Theory, implementation, and application (16 pages) Jordan J. Phillips and Juan E. Peralta	174115
Delocalized Davydov D₁ Ansatz for the Holstein polaron (13 pages) Jin Sun, Liwei Duan, and Yang Zhao	174116
Quantum critical point of spin-boson model and infrared catastrophe in bosonic bath (4 pages) Hang Zheng and Zhiguo Lü	174117

Advanced Experimental Techniques

Vibrations of porphycene in the S₀ and S₁ electronic states: Single vibronic level dispersed fluorescence study in a supersonic jet (14 pages) Ephriem T. Mengesha, Jerzy Sepioł, Paweł Borowicz, and Jacek Waluk	174201
Measuring dipolar and J coupling between quadrupolar nuclei using double-rotation NMR (13 pages) Frédéric A. Perras and David L. Bryce	174202
Sideband separation experiments in NMR with phase incremented echo train acquisition (12 pages) Brennan J. Walder, Krishna K. Dey, Derrick C. Kaseman, Jay H. Baltisberger, and Philip J. Grandinetti	174203

Atoms, Molecules, and Clusters

Theoretical predictions of properties and gas-phase chromatography behaviour of carbonyl complexes of group-6 elements Cr, Mo, W, and element 106, Sg (6 pages) V. Pershina and J. Anton	174301
Infrared spectroscopy and tunneling dynamics of the vinyl radical in ⁴He nanodroplets (9 pages) Paul L. Raston, Tao Liang, and Gary E. Douberly	174302
Observation of linear to planar structural transition in sulfur-doped gold clusters: Au_xS⁻ (x = 2–5) (9 pages) Hui Wen, Yi-Rong Liu, Teng Huang, Kang-Ming Xu, Wei-Jun Zhang, Wei Huang, and Lai-Sheng Wang	174303
Low energy (e,2e) coincidence studies of NH₃: Results from experiment and theory (11 pages) Kate L. Nixon, Andrew James Murray, Hari Chaluvadi, Chuangang Ning, James Colgan, and Don H. Madison	174304
Time-dependent quantum wave packet study of the Ar+H₂⁺ → ArH⁺+H reaction on a new <i>ab initio</i> potential energy surface for the ground electronic state (1²A') (8 pages) Mei Hu, Wenwu Xu, Xinguo Liu, Ruishan Tan, and Hongzheng Li	174305

Fully quantal calculation of H₂ translation-rotation states in (H₂)₄@5¹²6⁴ clathrate sII inclusion compounds (11 pages) Peter M. Felker	174306
Electron collisions with the HCOOH··(H₂O)_n complexes (n = 1, 2) in liquid phase: The influence of microsolvation on the π* resonance of formic acid (10 pages) T. C. Freitas, K. Coutinho, M. T. do N. Varella, M. A. P. Lima, S. Canuto, and M. H. F. Bettega	174307
From light-scattering measurements to polarizability derivatives in vibrational Raman spectroscopy: The 2ν₅ overtone of SF₆ (9 pages) D. Kremer, F. Ratchet, and M. Chrysos	174308
Rovibronically selected and resolved two-color laser photoionization and photoelectron study of titanium monoxide cation (10 pages) Huang Huang, Zhihong Luo, Yih Chung Chang, Kai-Chung Lau, and C. Y. Ng	174309
Spectroscopic observation of gold-dicarbide: Photodetachment and velocity map imaging of the AuC₂ anion (10 pages) Bradley R. Visser, Matthew A. Addicoat, Jason R. Gascooke, Warren D. Lawrance, and Gregory F. Metha	174310

Liquids, Glasses, and Crystals

Nature of the anomalies in the supercooled liquid state of the mW model of water (10 pages) Vincent Holten, David T. Limmer, Valeria Molinero, and Mikhail A. Anisimov	174501
A polarizable reactive force field for water to enable molecular dynamics simulations of proton transport (13 pages) Abhishek Asthana and Dean R. Wheeler	174502
Free energy barriers for homogeneous crystal nucleation in a eutectic system of binary hard spheres (8 pages) Srinivasa Rao Ganagalla and Sudeep N. Punnathanam	174503
Determination of favorable inter-particle interactions for formation of substitutionally ordered solid phases from a binary mixture of oppositely charged colloidal suspensions (7 pages) Ganeshprasad Pavaskar and Sudeep N. Punnathanam	174504
The structure of liquid GeSe revisited: A first principles molecular dynamics study (8 pages) Sébastien Le Roux, Assil Bouzid, Mauro Boero, and Carlo Massobrio	174505
Temperature measurements and an improved equation of state for shocked liquid benzene (7 pages) D. Lacina and Y. M. Gupta	174506
Density dependence of dynamical heterogeneity in fluid methanol (6 pages) Louis Loubeyre, Muhtar Ahart, Stephen A. Gramsch, and Russell J. Hemley	174507
Thermodynamic anomaly of the sub-T_g relaxation in hyperquenched metallic glasses (8 pages) Lina Hu, Chao Zhou, Chunzhi Zhang, and Yuanzheng Yue	174508

Surfaces, Interfaces, and Materials

Pressure induced structural phase transition in solid oxidizer KClO₃: A first-principles study (8 pages) N. Yedukondalu, Vikas D. Ghule, and G. Vaitheeswaran	174701
Effect of local metal microstructure on adsorption on bimetallic surfaces: Atomic nitrogen on Ni/Pt(111) (8 pages) Wei Guo and Dionisios G. Vlachos	174702

Metal-organic frameworks with wine-rack motif: What determines their flexibility and elastic properties? (8 pages) Aurélie U. Ortiz, A. Boutin, Alain H. Fuchs, and François-Xavier Coudert	174703
Carbon monoxide adsorption on platinum-osmium and platinum-ruthenium-osmium mixed nanoparticles (11 pages) Nicholas Dimakis, Nestor E. Navarro, and Eugene S. Smotkin	174704
The dissociative chemisorption of methane on Ni(111): The effects of molecular vibration and lattice motion (11 pages) Bret Jackson and Sven Nave	174705
Adsorption induced transitions in soft porous crystals: An osmotic potential approach to multistability and intermediate structures (9 pages) David Bousquet, François-Xavier Coudert, Alexandre G. J. Fossati, Alexander V. Neimark, Alain H. Fuchs, and Anne Boutin	174706
Light-induced electronic non-equilibrium in plasmonic particles (9 pages) Mordechai Kornbluth, Abraham Nitzan, and Tamar Seideman	174707

Polymers and Soft Matter

The double-layer of penetrable ions: An alternative route to charge reversal (8 pages) Derek Frydel and Yan Levin	174901
Polymer translocation dynamics in the quasi-static limit (12 pages) James M. Polson and Anthony C. M. McCaffrey	174902
The Lowe-Andersen thermostat as an alternative to the dissipative particle dynamics in the mesoscopic simulation of entangled polymers (10 pages) Shaghayegh Khani, Mikio Yamanoi, and Joao Maia	174903
Brownian dynamics method for simulation of binding kinetics of patterned colloidal spheres with hydrodynamic interactions (10 pages) Jun Liu and Ronald G. Larson	174904
Homopolymer adsorption on periodically structured surfaces in systems with incommensurable lengths (11 pages) Hans Behringer and Patrick Gemünden	174905
Dynamics of exciton transfer in coupled polymer chains (6 pages) Y. L. Zhang, X. J. Liu, Z. Sun, and Z. An	174906
Probability of double-strand breaks in genome-sized DNA by γ-ray decreases markedly as the DNA concentration increases (5 pages) Shunsuke F. Shimobayashi, Takafumi Iwaki, Toshiaki Mori, and Kenichi Yoshikawa	174907
Kinetics of loop formation in worm-like chain polymers (5 pages) Reza Afra and Brian A. Todd	174908

Biological Molecules and Networks

On the role of thermal backbone fluctuations in myoglobin ligand gate dynamics (26 pages) Andrey Krokhotin, Antti J. Niemi, and Xubiao Peng	175101
Non-Markovianity during the quantum Zeno effect (11 pages) A. Thilagam	175102

LETTERS TO THE EDITOR

Errata

Publisher's Note: "An (e , $2e$ + ion) investigation of dissociative ionization of methane"
