JOURNAL OF

CRYSTAL GROWTH

EDITORS:

T.F. KUECH (Principal Editor),
University of Wisconsin-Madison

R.S. FEIGELSON, Stanford University

K. NAKAJIMA, Kyoto University

G.B. STRINGFELLOW,
University of Utah

FOUNDING EDITOR: M. SCHIEBER

CO-FOUNDERS: N. CABRERA, B. CHALMERS,
F.C. FRANK

FORMER ADVISOR: R.A. LAUDISE†

Available online at www.sciencedirect.com

ScienceDirect

Abstracted/Indexed in: Aluminium Industry Abstracts; Chemical Abstracts; Current Contents: Physical, Chemical and Earth Sciences; EI Compendex Plus; Engineered Materials Abstracts; Engineering Index; INSPEC; Metals Abstracts. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

CONTENTS

Classical semiconductors

The influence of growth temperature on Sb incorporation in InAsSb, and the temperature-dependent impact of Bi surfactants

W.L. Sarney, S.P. Svensson, E.M. Anderson, A.M. Lundquist, C. Pearson and J.M. Millunchick

Graphene mediated growth of polycrystalline indium phosphide nanowires and monocrystalline-core, polycrystalline-shell silicon nanowires on copper

K.J. Norris, M. Garrett, E. Coleman, G.S. Tompa, J. Zhang and N.P. Kobayashi

Effect of silicon delta-doping density on optical properties of type-II InAs/GaAsSb quantum dots

Y. Kim, K.-Y. Ban, D. Kuciauskas, P.C. Dippo and C.B. Honsberg

Single-crystalline Bi₂Te₃ nanosheets with uniform morphology via a simple, efficient, and high-yield microwave-assisted synthesis

Z. Li, R. Teng, S. Zheng, Y. Zhang, T. Huang and G. Lu

Crystallographic dependent in-situ CBr₄ selective nano-area etching and local regrowth of InP/InGaAs by MOVPE

N. Kuznetsova, I.V. Kulkova, E.S. Semenova, S. Kadhodazadeh, N.V. Kryzhanovskaya, A.E. Zhukov and K. Yvind

Electronic materials

Synthesis and characterization of indium monoselenide nanosheets: A proposed pseudo top-down mechanism

M.A. Airo, S. Gqoba, M.P. Kalenga, S. Govindraju, M.J. Moloto and N. Moloto

MBE growth of germanium nanowires along <110>

J. Schmidtbauer, R. Bansen, R. Heimbürger, T. Teubner and T. Bock

Defect structure of a free standing GaN wafer grown by the ammonothermal method

S. Sintonen, S. Suihkonen, H. Jussila, H. Lipsanen, T.O. Tuomi, E. Letts, S. Hoff and T. Hashimoto

Solution growth; industrial biological and molecular crystallization

Simple and rapid green synthesis of micrometer scale single crystalline gold nanoplates using chitosan as the reducing agent

S. Alex, K. Tian, S. Teng, G. Siegel and A. Tiwari

Exploration of crystal simulation potential by fluconazole isomorphism and its application in improvement of pharmaceutical properties

A. Thakur, D. Kumar, R. Thipparaboina and N.R. Shastri

8 Evaluation of the difficulty of crystallization of organic compounds using the critical supersaturation ratio (*S*^c)

D. Nagamatsu, Y. Ida and H. Takiyama

41 Thin interface analysis of a phase-field model for epitaxial growth with nucleation and Ehrlich–Schwoebel effects

X.L. Dong, H. Xing, C.L. Chen, B.C. Luo, Z. Chen, R.L. Zhang and K.X. Jin

68 Anisotropic solid–liquid interfacial energy measurement by grain boundary groove method

L. Wang, X. Lin, M. Wang and W. Huang

General subjects

104 Structural properties of ZnO nanowires directly grown on a carbon film in ZnCl₂ aqueous solution

H.W. Choi, N.D. Theodore, S. Das, A. Dhar and T.L. Alford

111 Crystal growth, optical and scintillation properties of Nd³⁺ doped GdTaO₄ single crystal

F. Peng, W. Liu, Q. Zhang, H. Yang, C. Shi, R. Mao, D. Sun, J. Luo and G. Sun

1 Numerical simulation of the gallium nitride thin film layer grown on 6-inch wafer by commercial multi-wafer hydride vapor phase epitaxy

X.-F. Han, M.-J. Hur, J.-H. Lee, Y.-j. Lee, C.-s. Oh and K.-W. Yi

36 Partitioning of ionic species during growth of impurity-doped lithium niobate by electric current injection

J. Nozawa, S. Iida, C. Koyama, K. Maeda, K. Fujiwara, H. Koizumi and S. Uda

72 Shape evolution of decahedral and icosahedral Ag flags and their intermediates from Ag nanorod seeds in DMF solution in the presence of polyvinylpyrrolidone

M. Tsuji, N. Nakamura, X. Tang, K. Uto and M. Matsunaga
