## Contents

### Asian Crystallization Technology Symposium-2012

Preface	1
Structure of supersaturated solution and crystal nucleation induced by diffusion H. Ooshima, K. Igarashi, H. Iwasa and R. Yamamoto	2
Population balance modeling of the solution mediated transformation of polymorphs: Limitations and future trends A.E. Flood and L. Wantha	7
High-throughput platform for design and screening of peptides as inhibitors of calcium oxalate monohydrate crystallization S. Farmanesh, J. Chung, D. Chandra, R.D. Sosa, P. Karande and J.D. Rimer	13
Effect of flow structure at the onset of instability on barium sulfate precipitation in Taylor–Couette crystallizers M.F. Aljishi, A.-C. Ruo, J.H. Park, B. Nasser, W.-S. Kim and Y.L. Joo	20
Taylor vortex effect on flocculation of hairy crystals of calcium lactate in anti-solvent crystallization S. Lee, C.-H. Lee and W.-S. Kim	32
SFO-solvent freeze out-technology for industrial proteins V.P. Diaz Borbon and J. Ulrich	38
Directional crystallization of dioxane in the presence of PVDF producing porous membranes B.S. Kim and J. Lee	45
Thermodynamic stability and crystallization behavior of molecular complexes with TEP host A. Fujiwara and M. Kitamura	50
A novel method for measurement of crystal growth rate D.Y. Kim and D.R. Yang	54
Structures and physical properties of the cocrystals of adefovir dipivoxil with dicarboxylic acids S. Jung, J. Lee and I.W. Kim	59
Molecular interaction of solvent with crystal surfaces in the crystallization of ammonium sulfate H.-M. Shim, J.-W. Kim and K.-K. Koo	64
Production of organic micro-crystals by using templated crystallization as nucleation trigger H. Yamamoto and H. Takiyama	69
Polymorph control of glycine by antisolvent crystallization using nitrogen minute-bubbles M. Matsumoto, Y. Wada, A. Oonaka and K. Onoe	73
Effect of polymorphism on the purity of L-glutamic acid G. Qian, Y. Wu, X. Yang, X. Duan and X. Zhou	78
Influence of salt additives on phase transformation of guanosine 5-monophosphate disodium in anti-solvent crystallization A.-T. Nguyen, J. Kang and W.-S. Kim	82

Purification of $\text{Al}(\text{OH})_3$ synthesized by Bayer process for preparation of high purity alumina as sapphire raw material N.-K. Park, H.-Y. Choi, D.-H. Kim, T.J. Lee, M. Kang, W.G. Lee, H.D. Kim and J.W. Park	88
Utilization of minute-bubble technique on crystallization: Application to antisolvent crystallization of sodium chloride Y. Wada, M. Matsumoto and K. Onoe	92
Enhanced biomimetic $\text{CO}_2$ sequestration and $\text{CaCO}_3$ crystallization using complex encapsulated metal organic framework P.C. Sahoo, Y.N. Jang and S.W. Lee	96
Melt crystallization for refinement of triolein and palmitic acid mixture as a model waste oil for biodiesel fuel production K. Fukui, K. Maeda and H. Kuramochi	102
Simulation of Taylor–Couette reactor for particle classification using CFD J.S. Kim, D.H. Kim, B. Gu, D.Y. Kim and D.R. Yang	106
Polyelectrolyte effects on the crystallization phenomena of the lithium carbonate H. Watamura, H. Marukawa and I. Hirasawa	111
$\text{CaCO}_3$ crystallization and morphology control by using purified soluble protein related to shell regeneration N.S. Sambudi, S.B. Park and S.-W. Lee	118
Kinetic crystallization separation process of the inositol isomers by controlling metastable zones K. Konuki and I. Hirasawa	123
Synthesis of hollow silica particles with tunable size, shell thickness, and morphology J. Kim, J. Lee, H. Chang, J.-W. Choi and H.D. Jang	128
Facile synthesis of chitosan-mediated gold nanoflowers as surface-enhanced Raman scattering (SERS) substrates T.T. Nhung, Y. Bu and S.-W. Lee	132
Novel charge/discharge method for lead acid battery by high-pressure crystallization N. Arakawa, K. Maeda, M. Moritoki, K. Fukui, H. Kuramochi and H. Miki	138
The influence of a small amount of maleic acid on crystal deposition phenomena of methacrylic acid in melt crystallization T. Hino, S. Kato and H. Takiyama	142
Molecular modeling of crystal morphology of ginsenoside compound K solvates and its crystal habit modification by solvent molecules H. Gu, R. Li, Y. Sun, S. Li, W. Dong and J. Gong	146
Role of kinetic process in the solvent effect on crystallization of BPT propyl ester polymorph M. Kitamura and K. Horimoto	151
