

TM  
E43/s

VOL. 161, NO. 8, 2014

**JOURNAL OF THE ELECTROCHEMICAL SOCIETY**

*Focus Issue on Mathematical Modeling of  
Electrochemical Systems at Multiple Scales*

## Table of Contents

---

### Commentary

---

#### Mathematical Modeling of Electrochemical Systems at Multiple Scales

*John W. Weidner, Perla B. Balbuena, Adam Z. Weber,  
Jeremy P. Meyers, Venkat Subramanian* ..... Y9

---

### Electrochemical Engineering

---

#### Numerical Scaling Studies of Kinetically-Limited Electrochemical Nucleation and Growth with Accelerated Stochastic Simulations

*Andri Bezzola, Benjamin B. Bales, Linda R. Petzold,  
Richard C. Alkire* ..... E3001

#### ReaxFF Reactive Force Field Simulations on the Influence of Teflon on Electrolyte Decomposition during Li/SWCNT Anode Discharge in Lithium-Sulfur Batteries

*Md Mahbulul Islam, Vyacheslav S. Bryantsev,  
Adri C. T. van Duin* ..... E3009

#### Water Structures at Metal Electrodes Studied by Ab Initio Molecular Dynamics Simulations

*Axel Groß, Florian Gossenberger, Xiaohang Lin,  
Maryam Naderian, Sung Sakong, Tanglaw Roman* ..... E3015

#### Numerical Analysis of Distribution and Evolution of Reaction Current Density in Discharge Process of Lithium-Ion Power Battery

*Yiwei Tang, Ming Jia, Jie Li, Yanqing Lai, Yun Cheng,  
Yexiang Liu* ..... E3021

#### Impact of the Cathode Microstructure on the Discharge Performance of Lithium Air Batteries: A Multiscale Model

*Kan-Hao Xue, Trong-Khoa Nguyen,  
Alejandro A. Franco* ..... E3028

#### Electrode Passivation by Phenolic Compounds: Modeling Analysis

*Xiaoyun Yang, Jeffrey Kirsch, Yuanyuan Zhang,  
Jeffrey Fergus, Aleksandr Simonian* ..... E3036

#### Solubility of Sodium in Sodium Chloride: A Density Functional Theory Molecular Dynamics Study

*Maoyuan Liu, Patrick Masset,  
Angus Gray-Weale* ..... E3042

#### Electrostatic Potential of Polyelectrolyte Molecules Grafted on Charged Surfaces: A Poisson-Boltzmann Model

*Y. Rakita, D. Golodnitsky, A. Natan* ..... E3049

#### Crystal Surface and State of Charge Dependencies of Electrolyte Decomposition on LiMn<sub>2</sub>O<sub>4</sub> Cathode

*Nitin Kumar, Kevin Leung, Donald J. Siegel* ..... E3059

#### Effective Transport Properties of Porous Electrochemical Materials — A Homogenization Approach

*A. Gully, H. Liu, S. Srinivasan, A. K. Sethurajan,  
S. Schougaard, B. Protas* ..... E3066

#### Analysis of the Steady State and Transient Currents for a Rotating Disk Electrode under Surface Diffusion Limitation

*Antonio M. Chaparro* ..... E3078

#### A Surrogate-Based Multi-Scale Model for Mass Transport and Electrochemical Kinetics in Lithium-Ion Battery Electrodes

*Wenbo Du, Nansi Xue, Wei Shyy,  
Joaquim R. R. A. Martins* ..... E3086

#### DFT Study of Reduction Mechanisms of Ethylene Carbonate and Fluoroethylene Carbonate on Li<sup>+</sup>-Adsorbed Si Clusters

*Yuguang Ma, Perla B. Balbuena* ..... E3097

#### Numerical Study on Water Distribution in Different Layers of Direct Methanol Fuel Cells

*Hosein Kalantari, Morteza Baghalha* ..... E3110

#### Understanding the Effect of Kinetic and Mass Transport Processes in Cathode Agglomerates

*M. Moore, P. Wardlaw, P. Dobson, J. J. Boisvert,  
A. Putz, R. J. Spiteri, M. Secor* ..... E3125

**Dynamic Simulation of Large Scale PEM Fuel Cell under Driving Cycle**

*Sirivatch Shimpalee* ..... E3138

**Efficient Simulation and Reformulation of Lithium-Ion Battery Models for Enabling Electric Transportation**

*Paul W. C. Northrop, Bharatkumar Suthar, Venkatasailanathan Ramadesigan, Shriram Santhanagopalan, Richard D. Braatz, Venkat R. Subramanian* ..... E3149

**Corrosion of Steel Embedded in Fly Ash Mortar Using a Transmission Line Model**

*S. Fajardo, A. Sánchez-Deza, M. Criado, A. La Iglesia, J. M. Bastidas* ..... E3158

**Theoretical and Experimental Studies of Ethanol Decomposition and Electrooxidation over Pt-Modified Tungsten Carbide**

*Thomas G. Kelly, Alan L. Stottlemeyer, Xiaofang Yang, Jingguang G. Chen* ..... E3165

**Analytical Solutions for Polarization Curve and Impedance of the Cathode Catalyst Layer with Fast Oxygen Transport in a PEM Fuel Cell**

*A. A. Kulikovskiy* ..... E3171

**Contact Resistance of Screen Printed Ag-Contacts to Si Emitters: Mathematical Modeling and Microstructural Characterization**

*Ann Mari Svensson, Sara Olibet, Dominik Rudolph, Enrique Cabrera, Jesper Friis, Keith Butler, John Harding* ..... E3180

**Multi-Scale Modeling of the Initial Stages of Anodic Oxidation of Titanium**

*Mina Stancheva, Boubakar Diawara, François Lebreau, Martin Bojinov* ..... E3188

**Effect of the Variable Profile of Substrate Conductivity on the Dynamics of Metal Deposition on Resistive Disk**

*A. I. Masliy, N. P. Poddubny, A. Kh. Khabibullin* ..... E3196

**An Agglomerate Model for the Impedance of Secondary Particle in Lithium-Ion Battery Electrode**

*Jun Huang, Hao Ge, Zhe Li, Jianbo Zhang* ..... E3202

**Evaluation of the Maximum Pit Size Model on Stainless Steels under Thin Film Electrolyte Conditions**

*M. T. Woldemedhin, M. E. Shedd, R. G. Kelly* ..... E3216

**Finite Element Modeling of Continuous Flow Tubular Electrochemical Reactor for Industrial and Domestic Wastewater Treatment**

*Bahadır K. Körbahti* ..... E3225

**Development of a Full Layer Pore-Scale Model for the Simulation of Electro-Active Material Used in Power Sources**

*Akos Kriston, Andreas Pfrang, Branko N. Popov, L. Boon-Brett* ..... E3235

**Microstructure Evolution in Lithium-Ion Battery Electrode Processing**

*Zhixiao Liu, Partha P. Mukherjee* ..... E3248

**Modeling the Radiolytic Corrosion of Fractured Nuclear Fuel under Permanent Disposal Conditions**

*Linda Wu, Nazhen Liu, Zack Qin, David W. Shoemith* ..... E3259

**Mathematical Modeling of Hybrid Asymmetric Electrochemical Capacitors**

*John A. Staser, John W. Weidner* ..... E3267

**Numerical Simulation of a Batch Rotating Cylinder Electrode System for Bulk Electrolysis**

*Yung-Fu Wu, Chi-Hao Chen* ..... E3276

**Design of Membrane-Encapsulated Wireless Photoelectrochemical Cells for Hydrogen Production**

*Meenesh R. Singh, John C. Stevens, Adam Z. Weber* ..... E3283

**Modeling Volume Change due to Intercalation into Porous Electrodes**

*Taylor R. Garrick, Kumud Kanneganti, Xinyu Huang, John W. Weidner* ..... E3297

**A Multiscale Model of Electrochemical Double Layers in Energy Conversion and Storage Devices**

*Matias A. Quiroga, Kan-Hao Xue, Trong-Khoa Nguyen, Michal Tułodziecki, He Huang, Alejandro A. Franco* ..... E3302

**A Mechanistic Model for Pinhole Growth in Fuel-Cell Membranes during Cyclic Loads**

*Ahmet Kusoglu, Adam Z. Weber* ..... E3311

**Effective Macroscopic Equations for Species Transport and Reactions in Porous Catalyst Layers**

*M. Schmuck, Peter Berg* ..... E3323

**An Integrated 1-Dimensional Model of a Photoelectrochemical Cell for Water Splitting**

*Alan Berger, John Newman* ..... E3328

**Modeling the Growth of Nanowire Arrays in Porous Membrane Templates**

*S. Blanco, R. Vargas, J. Mostany, C. Borrás, B. R. Scharifker* ..... E3341

**Simulation and Analysis of Inhomogeneous Degradation in Large Format LiMn<sub>2</sub>O<sub>4</sub>/Carbon Cells**

*Yiling Dai, Long Cai, Ralph E. White* ..... E3348

**Liquid Water Scavenging of PEMFC Contaminants**

*Jean St-Pierre, Brian Wetton, Yunfeng Zhai,*

*Junjie Ge*.....E3357

**On the Deviation of Electro-Neutrality in Li-Ion Battery Electrolytes**

*T. J. Rademaker, G. R. A. Akkermans, D. L. Danilov,*

*P. H. L. Notten* ..... E3365
