Journal of Fluid Mechanics

VOLUME 746

- 1 Ship waves and Kelvin
F. Dias
- 5 On the self-similar exact MHD jet solution
R. I. Mullyadzhanov & N. I. Yavorsky
- 31 Speeding up thermocapillary migration of a confined bubble by wall slip
Y.-C. Liao, Y.-C. Li, Y.-C. Chang, C.-Y. Huang & H.-H. Wei
- 53 Solving the Boltzmann equation deterministically by the fast spectral method: application to gas microflows
L. Wu, J. M. Reese & Y. Zhang
- 85 The temperature spectrum generated by frictional heating in isotropic turbulence
W. J. T. Bos
- 99 New scaling laws for turbulent Poiseuille flow with wall transpiration
V. Avsarkisov, M. Oberlack & S. Hoyas
- 123 Multiple finger propagation modes in Hele-Shaw channels of variable depth
A. B. Thompson, A. Juel & A. L. Hazel
- 165 Numerical study of acoustic radiation due to a supersonic turbulent boundary layer
L. Duan, M. M. Choudhari & M. Wu
- 193 Formation of particle clouds
B. Zhao, A. W. K. Law, E. E. Adams & J. W. Er
- 214 Motion and coalescence of sessile drops driven by substrate wetting gradient and external flow
M. Ahmadlouydarab & J. J. Feng
- 236 The opening of wind-driven polynyas
M. A. Morales Maqueda, A. J. Willmott & I. A. Walkington
- 273 Slender axisymmetric Stokesian swimmers
S. Toppaladoddi & N. J. Balmforth
- 300 On the damped oscillations of an elastic quasi-circular membrane in a two-dimensional incompressible fluid
M. Martins Afonso, S. Mendez & F. Nicoud
- 332 How strain and spin may make a star bi-polar
L. K. Forbes
- S 368 Resonance-driven oscillations in a flexible-channel flow with fixed upstream flux and a long downstream rigid segment
F. Xu, J. Billingham & O. E. Jensen
- 405 Steady turbulent density currents on a slope in a rotating fluid
G. E. Manucharyan, W. Moon, F. Sévellec, A. J. Wells, J.-Q. Zhong & J. S. Wettlaufer
- 437 A shallow-water sloshing model for wave breaking in rectangular tanks
M. Antuono, A. Bardazzi, C. Lugni & M. Brocchini
- 466 Analytical solutions of compacting flow past a sphere
J. F. Rudge
- 498 Entrainment and mixing in a laboratory model of oceanic overflow
P. Odier, J. Chen & R. E. Ecke
- 536 Turbulent drag reduction through oscillating discs
D. J. Wise & P. Ricco
- 565 The influence of non-polar lipids on tear film dynamics
M. Bruna & C. J. W. Beward
- 606 Fractional dynamics of tethered particles in oscillatory Stokes flows
E. A. Lim, M. H. Kobayashi & C. F. M. Coimbra

Contents continued on inside back cover.

JFM Rapids (online only)

R1 Amplitude modulation of all three velocity components in turbulent boundary layers
K. M. Talluru, R. Baidya, N. Hutchins & I. Marusic

R2 Non-existence of three-dimensional travelling water waves with constant non-zero vorticity
E. Wahlén

R3 Moffatt vortices induced by the motion of a contact line
E. Kirkinis & S. H. Davis

S R4 Tunable fall velocity of a dense ball in oscillatory cross-sheared concentrated suspensions
F. Blanc, E. Lemaire & F. Peters

S indicates supplementary data or movies available online.
