Geomagnetism and Paleomagnetism/Marine Geology and Geophysics

- 2543** *Thibaut Barreyre, Javier Escartín, Robert A. Sohn, Mathilde Cannat, Valérie Ballu, and Wayne C. Crawford*
Temporal variability and tidal modulation of hydrothermal exit-fluid temperatures at the Lucky Strike deep-sea vent field, Mid-Atlantic Ridge (doi 10.1002/2013JB010478)
- 2567** *Robert M. Negrini, Daniel T. McCuan, Robert A. Horton, James D. Lopez, William S. Cassata, James E. T. Channell, Kenneth L. Verosub, Jeffrey R. Knott, Robert S. Coe, Joseph C. Liddicoat, Steven P. Lund, Larry V. Benson, and Andrei M. Sarna-Wojcicki*
Nongeocentric axial dipole field behavior during the Mono Lake excursion (doi 10.1002/2013JB010846)
- 2582** *Özden Özdemir and David J. Dunlop*
Hysteresis and coercivity of hematite (doi 10.1002/2013JB010739)
- 2595** *Claire Bouligand, Jonathan M. G. Glen, and Richard J. Blakely*
Distribution of buried hydrothermal alteration deduced from high-resolution magnetic surveys in Yellowstone National Park (doi 10.1002/2013JB010802)
- 2631** *Hugh Daigle, Brittney Thomas, Harry Rowe, and Michael Nieto*
Nuclear magnetic resonance characterization of shallow marine sediments from the Nankai Trough, Integrated Ocean Drilling Program Expedition 333 (doi 10.1002/2013JB010784)
- 2651** *Stefan Schöbel and Helga de Wall*
AMS–NRM interferences in the Deccan basalts: Toward an improved understanding of magnetic fabrics in flood basalts (doi 10.1002/2013JB010660)
- 2679** *N. Sultan, G. Bohrmann, L. Ruffine, T. Pape, V. Riboulot, J.-L. Colliat, A. De Prunelé, B. Dennielou, S. Garziglia, T. Himmler, T. Marsset, C. A. Peters, A. Rabiou, and J. Wei*
Pockmark formation and evolution in deep water Nigeria: Rapid hydrate growth versus slow hydrate dissolution (doi 10.1002/2013JB010546)
- 2695** *Julien Baerenzung, Matthias Holschneider, and Vincent Lesur*
Bayesian inversion for the filtered flow at the Earth's core-mantle boundary (doi 10.1002/2013JB010358)
- 2721** *Min Xu, J. Pablo Canales, Suzanne M. Carbotte, Helene Carton, Mladen R. Nedimović, and John C. Mutter*
Variations in axial magma lens properties along the East Pacific Rise (9°30'N–10°00'N) from swath 3-D seismic imaging and 1-D waveform inversion (doi 10.1002/2013JB010730)

Chemistry and Physics of Minerals and Rocks/Volcanology

- 2745** *Amin Mehrabian and Younane N. Abousleiman*
Generalized Biot's theory and Mandel's problem of multiple-porosity and multiple-permeability poroelasticity (doi 10.1002/2013JB010602)
- 2764** *Jean Pierre Gratier, François Renard, and Benjamin Vial*
Postseismic pressure solution creep: Evidence and time-dependent change from dynamic indenting experiments (doi 10.1002/2013JB010768)
- 2780** *Davide Novella, Shantanu Keshav, Gudmundur H. Gudfinnsson, and Shaunak Ghosh*
Melting phase relations of model carbonated peridotite from 2 to 3 GPa in the system CaO–MgO–Al₂O₃–SiO₂–CO₂ and further indication of possible unmixing between carbonatite and silicate liquids (doi 10.1002/2013JB010913)
- 2801** *Kenji Kawai and Taku Tsuchiya*
P–V–T equation of state of cubic CaSiO₃ perovskite from first-principles computation (doi 10.1002/2013JB010905)
- 2810** *Rebecca A. Fischer, Andrew J. Campbell, Razvan Caracas, Daniel M. Reaman, Dion L. Heinz, Przemyslaw Dera, and Vitali B. Prakapenka*
Equations of state in the Fe–FeSi system at high pressures and temperatures (doi 10.1002/2013JB010898)

- 2828** *Stéphanie Vialle, Simon Contraires, Bernard Zinzner, Jean-Baptiste Clavaud, Karim Mahiouz, Pierpaolo Zuddas, and Maria Zamora*
Percolation of CO₂-rich fluids in a limestone sample: Evolution of hydraulic, electrical, chemical, and structural properties (doi 10.1002/2013JB010656)
- 2848** *Y. J. Masson and S. R. Pride*
On the correlation between material structure and seismic attenuation anisotropy in porous media (doi 10.1002/2013JB010798)
- 2871** *Mark H. Anders, David W. Rodgers, Sidney R. Hemming, Janet Saltzman, Victor J. DiVenere, Jonathan T. Hagstrum, Glenn F. Embree, and Robert C. Walter*
A fixed sublithospheric source for the late Neogene track of the Yellowstone hotspot: Implications of the Heise and Picabo volcanic fields (doi 10.1002/2013JB010483)
- 2907** *Ryan E. Frazer, Drew S. Coleman, and Ryan D. Mills*
Zircon U-Pb geochronology of the Mount Givens Granodiorite: Implications for the genesis of large volumes of eruptible magma (doi 10.1002/2013JB010716)
- 2925** *M. J. Heap, Y. Lavallée, L. Petrakova, P. Baud, T. Reuschlé, N. R. Varley, and D. B. Dingwell*
Microstructural controls on the physical and mechanical properties of edifice-forming andesites at Volcán de Colima, Mexico (doi 10.1002/2013JB010521)
- 2964** *F. Albino and F. Sigmundsson*
Stress transfer between magma bodies: Influence of intrusions prior to 2010 eruptions at Eyjafjallajökull volcano, Iceland (doi 10.1002/2013JB010510)
- 2976** *Mara M. Orescanin, David Prisco, Joanna M. Austin, and Susan W. Kieffer*
Flow of supersonic jets across flat plates: Implications for ground-level flow from volcanic blasts (doi 10.1002/2013JB010743)
- 2988** *G. Lacanna, M. Ichihara, M. Iwakuni, M. Takeo, M. Iguchi, and M. Ripepe*
Influence of atmospheric structure and topography on infrasonic wave propagation (doi 10.1002/2013JB010827)

Seismology

- 3006** *L. Auer, L. Boschi, T. W. Becker, T. Nissen-Meyer, and D. Giardini*
Savani: A variable resolution whole-mantle model of anisotropic shear velocity variations based on multiple data sets (doi 10.1002/2013JB010773)
- 3035** *Yu Chen, Lianxing Wen, and Chen Ji*
A cascading failure during the 24 May 2013 great Okhotsk deep earthquake (doi 10.1002/2013JB010926)
- 3050** *Natsumi Shintaku, Donald W. Forsyth, Christina J. Hajewski, and Dayanthie S. Weeraratne*
Pn anisotropy in Mesozoic western Pacific lithosphere (doi 10.1002/2013JB010534)
- 3064** *Anne Strader and David D. Jackson*
Near-prospective test of Coulomb stress triggering (doi 10.1002/2013JB010780)
- 3076** *Erica L. Emry, Douglas A. Wiens, and Daniel Garcia-Castellanos*
Faulting within the Pacific plate at the Mariana Trench: Implications for plate interface coupling and subduction of hydrous minerals (doi 10.1002/2013JB010718)
- 3096** *Huaiyu Yuan and Vadim Levin*
Stratified seismic anisotropy and the lithosphere-asthenosphere boundary beneath eastern North America (doi 10.1002/2013JB010785)
- 3115** *Ravishankar Menon, Peter Gerstoft, and William S. Hodgkiss*
On the apparent attenuation in the spatial coherence estimated from seismic arrays (doi 10.1002/2013JB010835)
- 3133** *Yihe Huang, Jean-Paul Ampuero, and Don V. Helmberger*
Earthquake ruptures modulated by waves in damaged fault zones (doi 10.1002/2013JB010724)
- 3155** *A. Obermann, B. Froment, M. Campillo, E. Larose, T. Planès, B. Valette, J. H. Chen, and Q. Y. Liu*
Seismic noise correlations to image structural and mechanical changes associated with the Mw 7.9 2008 Wenchuan earthquake (doi 10.1002/2013JB010932)
- 3169** *Atsuko Namiki, Tetsuo Yamaguchi, Ikuro Sumita, Takehito Suzuki, and Satoshi Ide*
Earthquake model experiments in a viscoelastic fluid: A scaling of decreasing magnitudes of earthquakes with depth (doi 10.1002/2014JB011135)
- 3182** *J. Chen and A. W. Rempel*
Progressive flash heating and the evolution of high-velocity rock friction (doi 10.1002/2013JB010631)
- 3201** *S. E. Minson, Jessica R. Murray, John O. Langbein, and Joan S. Gomberg*
Real-time inversions for finite fault slip models and rupture geometry based on high-rate GPS data (doi 10.1002/2013JB010622)

- 3232** *Kaiqing Yuan and Caroline Beghein*
Three-dimensional variations in Love and Rayleigh wave azimuthal anisotropy for the upper 800 km of the mantle (doi 10.1002/2013JB010853)
- 3256** *Aldo Zollo, Antonella Orefice, and Vincenzo Convertito*
Source parameter scaling and radiation efficiency of microearthquakes along the Irpinia fault zone in southern Apennines, Italy (doi 10.1002/2013JB010116)
- 3276** *J. Díaz, M. Ruiz, L. Crescentini, A. Amoroso, and J. Gallart*
Seismic monitoring of an Alpine mountain river (doi 10.1002/2014JB010955)
- 3290** *Brittany A. Erickson and Eric M. Dunham*
An efficient numerical method for earthquake cycles in heterogeneous media: Alternating subbasin and surface-rupturing events on faults crossing a sedimentary basin (doi 10.1002/2013JB010614)
- 3317** *James Traer and Peter Gerstoft*
A unified theory of microseisms and hum (doi 10.1002/2013JB010504)
- 3340** *Quan Gan and Derek Elsworth*
Analysis of fluid injection-induced fault reactivation and seismic slip in geothermal reservoirs (doi 10.1002/2013JB010679)
- 3354** *M.-A. Meier, M. J. Werner, J. Woessner, and S. Wiemer*
A search for evidence of secondary static stress triggering during the 1992 Mw7.3 Landers, California, earthquake sequence (doi 10.1002/2013JB010385)
- 3371** *Jianjun Wang, Caijun Xu, Jeffrey T. Freymueller, Zhenhong Li, and Wenbin Shen*
Sensitivity of Coulomb stress change to the parameters of the Coulomb failure model: A case study using the 2008 Mw 7.9 Wenchuan earthquake (doi 10.1002/2012JB009860)
- 3393** *Jacob Siegel, Daniel Lizarralde, Brandon Dugan, and Mark Person*
Glacially generated overpressure on the New England continental shelf: Integration of full-waveform inversion and overpressure modeling (doi 10.1002/2013JB010278)
- 3410** *Ryan Schultz, Virginia Stern, and Yu Jeffrey Gu*
An investigation of seismicity clustered near the Cordell Field, west central Alberta, and its relation to a nearby disposal well (doi 10.1002/2013JB010836)
- 3424** *Sara L. Dougherty and Robert W. Clayton*
Seismicity and structure in central Mexico: Evidence for a possible slab tear in the South Cocos plate (doi 10.1002/2013JB010883)
- 3448** *Catherine M. Booth, Donald W. Forsyth, and Dayanthie S. Weeraratne*
Upper mantle Q structure beneath old seafloor in the western Pacific (doi 10.1002/2013JB010589)
- 3462** *Guoqing Lin*
Three-dimensional compressional wave attenuation tomography for the crust and uppermost mantle of Northern and central California (doi 10.1002/2013JB010621)

Geodesy and Gravity/Tectonophysics

- 3478** *Marianne Negrini, Holger Stünitz, Pritam Nasipuri, Luca Menegon, and Luiz F. G. Morales*
Semibrittle deformation and partial melting of perthitic K-feldspar: An experimental study (doi 10.1002/2013JB010573)
- 3503** *Holly M. M. Rotman and Glenn A. Spinelli*
Remarkably consistent thermal state of the south central Chile subduction zone from 36°S to 45°S (doi 10.1002/2013JB010811)
- 3517** *M. Foroutan, B. Meyer, M. Sébrier, H. Nazari, A. S. Murray, K. Le Dortz, M. A. Shokri, M. Arnold, G. Aumaitre, D. Bourlès, K. Keddadouche, S. Solaymani Azad, and M. J. Bolourchi*
Late Pleistocene-Holocene right slip rate and paleoseismology of the Nayband fault, western margin of the Lut block, Iran (doi 10.1002/2013JB010746)
- 3561** *Edwin Nissen, James Jackson, Salman Jahani, and Mohammad Tatar*
Zagros "phantom earthquakes" reassessed—The interplay of seismicity and deep salt flow in the Simply Folded Belt? (doi 10.1002/2013JB010796)
- 3584** *E. Saria, E. Calais, D. S. Stamps, D. Delvaux, and C. J. H. Hartnady*
Present-day kinematics of the East African Rift (doi 10.1002/2013JB010901)
- 3601** *S.-K. Kufner, A. Hüpers, and A. J. Kopf*
Constraints on fluid flow processes in the Hellenic Accretionary Complex (eastern Mediterranean Sea) from numerical modeling (doi 10.1002/2013JB010405)
- 3627** *C. Cadio and J. Korenaga*
Resolving the fine-scale density structure of shallow oceanic mantle by Bayesian inversion of localized geoid anomalies (doi 10.1002/2013JB010840)

- 3646** *Christian Hirt and Michael Kuhn*
Band-limited topographic mass distribution generates full-spectrum gravity field: Gravity forward modeling in the spectral and spatial domains revisited (doi 10.1002/2013JB010900)
- 3662** *Lijuan He*
Numerical modeling of convective erosion and peridotite-melt interaction in big mantle wedge: Implications for the destruction of the North China Craton (doi 10.1002/2013JB010657)
- 3678** *Tadashi Yamasaki, Tim J. Wright, and Gregory A. Houseman*
Weak ductile shear zone beneath a major strike-slip fault: Inferences from earthquake cycle model constrained by geodetic observations of the western North Anatolian Fault Zone (doi 10.1002/2013JB010347)
- 3700** *Fei Wang, Qinchen Wang, Wei Lin, Lin Wu, Wenbei Shi, Huile Feng, and Rixiang Zhu*
⁴⁰Ar/³⁹Ar geochronology of the North China and Yangtze Cratons: New constraints on Mesozoic cooling and cratonic destruction under East Asia (doi 10.1002/2013JB010708)

Lateral variations in the long-term slip rate of the Chelungpu fault, Central Taiwan, from the analysis of deformed fluvial terraces (doi 10.1002/2013JB010057)
- 3767** *Yu Wang, Kerry Sieh, Soe Thura Tun, Kuang-Yin Lai, and Than Myint*
Active tectonics and earthquake potential of the Myanmar region (doi 10.1002/2013JB010762)
- 3823** *Manuel Hernández-Pajares, Àngela Aragón-Ángel, Pascale Defraigne, Nicolas Bergeot, Roberto Prieto-Cerdeira, and Alberto García-Rigo*
Distribution and mitigation of higher-order ionospheric effects on precise GNSS processing (doi 10.1002/2013JB010568)
- 3838** *Martin Wolstencroft, Zhixiong Shen, Torbjörn E. Törnqvist, Glenn A. Milne, and Mark Kulp*
Understanding subsidence in the Mississippi Delta region due to sediment, ice, and ocean loading: Insights from geophysical modeling (doi 10.1002/2013JB010928)
- 3857** *T. N. Blaikie, L. Ailleres, P. G. Betts, and R. A. F. Cas*
Interpreting subsurface volcanic structures using geologically constrained 3-D gravity inversions: Examples of maar-diatremes, Newer Volcanics Province, southeastern Australia (doi 10.1002/2013JB010751)
- 3879** *Shu-Chuan Lin*
Three-dimensional mantle circulations and lateral slab deformation in the southern Chilean subduction zone (doi 10.1002/2013JB010864)
- 3897** *B. Huet, P. Yamato, and B. Grasemann*
The Minimized Power Geometric model: An analytical mixing model for calculating polyphase rock viscosities consistent with experimental data (doi 10.1002/2013JB010453)
- 3925** *Guangyu Fu, Shanghua Gao, Jeffrey T. Freymueller, Guoqing Zhang, Yiqing Zhu, and Guangliang Yang*
Bouguer gravity anomaly and isostasy at western Sichuan Basin revealed by new gravity surveys (doi 10.1002/2014JB011033)

Cover. Static coseismic Coulomb stress change, resolved onto uniformly oriented receiver planes, following the 1999 Hector Mine earthquake. $M \geq 2.8$ earthquake locations during the (a) year before the Hector Mine earthquake and (b) year after the Hector Mine earthquake are displayed. See *Strader and Jackson*, pp. 3064–3075, doi 10.1002/2013JB010780.
