JOURNAL OF HETEROCYCLIC CHEMISTRY

wileyonlinelibrary.com/jhetchem

WILEY

Synthesis of Potential Bioactive Novel 7-[2-Hydroxy-3-(1,2,3-triazol-1-yl)propyloxy]-3-alkyl-4-methylcoumarins (pages 1–14)

Anu Arya, Vinod Kumar, Divya Mathur, Sukhdev Singh, Raju Brahma, Rajpal Singh, Seema Singh, G. L. Sharma, Virinder S. Parmar and Ashok K. Prasad

Chemistry of Phosphorus Ylides. Part 37. The Reaction of Phosphonium Ylides with Indoles and Naphthofurans. Synthesis of Phosphanylidenes, Pyrans, Cyclobutenes, and Pyridazine as Antitumor Agents (pages 15–23)

Soher S. Maigali, Marwa El-Hussieny and Fouad M. Soliman

Synthesis, Characterization and NO Synthase Inhibition Testing of 2-Aryl-5-aryloxy-3,4,5,6-tetrahydropyrimidinium Chlorides (pages 24–39)

Ullvi Bluhm, Jean-Luc Boucher, Bernd Clement, Ulrich Girreser, Dieter Heber, Booma Ramassamy and Ulrich Wolschendorf

Synthesis of Potentially Biologically Active 6-(1,3-Butadiynyl)purines (pages 40–47)

M. Křováček and D. Dvořák

A Divergent Synthesis of Spiropyrazole Derivatives Containing Iminolactone and/or Cyclic Imide Moiety (pages 48–53)

Eiichi Masumoto, Hiroshi Maruoka, Fumi Okabe, Toshihiro Fujioka and Kenji Yamagata

Synthesis of Indolines via a SmI_2 Promoted Domino Nitro Reduction–Intramolecular α -Michael Reaction (pages 54–58)

Josierika A. Ferreira Ramos, Carolina S. Araújo, Tanus J. Nagem and Jason G. Taylor

Convenient Synthesis of 2-Amino-4*H*-chromenes from Photochemically Generated α -Quinone Methides and Malononitrile (pages 59–66)

Makoto Fujiwara, Masanori Sakamoto, Kimihiro Komeyama, Hiroto Yoshida and Ken Takaki

Functionalized 2-Hydrazinobenzothiazole with Isatin and Some Carbohydrates under Conventional and Ultrasound Methods and Their Biological Activities (pages 67–74)

Khadija O. Badahdah, Hamida M. Abdel Hamid and Sawsan A. Nouredin

A Facile Approach for the Synthesis of Novel 1,2,4-Triazolo[4,3-*a*]Pyridine Derivatives in Single Step (pages 75–79)

G. Santhosh Kumar, C. Kurumurthy, P. Sambasiva Rao, B. Veeraswamy, P. Shanthan Rao and B. Narsaiah

Synthesis of 1-(α -Aminobenzyl)-2-naphthol Derivatives, their Structure in Crystal and in Solution (pages 80–85)

K. E. Metlushka, D. N. Sadkova, L. N. Shaimardanova, A. I. Tufatullin, V. F. Zheltukhin, O. N. Kataeva and V. A. Alfonsov

Site- and Regioselectivity of the Reaction of Hydrazonoyl Chlorides with Perimidine Ketene Amino. Antimicrobial Evaluation of the Products (pages 86–91)

Thoraya A. Farghaly and Huda K. Mahmoud

Microwave-Assisted Aqueous Reactions: An Efficient Route to Benzodiazepines (pages 92–96)

Xiao-Tong Zhu, Jia-Yan Liu, Bo Jiang and Shu-Jiang Tu

Synthesis and Cytotoxic Activity of Some Novel Dihydrobenzo[*h*]pyrano[3,2-*c*]chromene Derivatives (pages 97–104)

Nasim Esmati, Mahsa Foroughian, Mina Saeedi, Mohammad Mahdavi, Mehdi Khoshneviszadeh, Omidreza Firuzi, Nader Tanideh, Ramin Miri, Najmeh Edraki, Abbas Shafiee and Alireza Foroumadi

Nonsteroidal Anti-inflammatory Drug-based *N*-Allylidene Benzohydrazides and 1-Acyl-2-pyrazolines: Their Synthesis as Potential Cytotoxic Agents *In Vitro* (pages 105–113)

Kavitha Kankanala, V. Ranga Reddy, Yumnam Priyadarshini Devi, Lakshmi Narasu Mangamoori, D. Rambabu, K. Mukkanti and Sarbani Pal

5-Unsubstituted Pyrido[3,2,1-*jk*]carbazol-6-ones: Syntheses, Substitution, and Cyclization Reactions (pages 114–123)

Wolfgang Stadlbauer, Van Hoai Dang and Nikolaus Guttenberger

Synthesis, Characterization, and Antibacterial Activity of Novel (1*H*-Benzo[*d*]imidazole-2-yl)-6-(diethylamino)-3*H*-one-xanthene, Phenoxazine, and Oxazine (pages 124–129)

Vikas S. Patil, Vikas S. Padalkar, Kiran R. Phatangare, Prashant G. Umape, Bhushan N. Borase and N. Sekar

Synthesis of Novel 13a-(ω -Aminoalkyl)-8-oxoberbines by Means of Reaction of Homophthalic Anhydride with 1-Substituted 3,4-Dihydroisoquinolines. An Unexpected Formation of a Pyrrolo[3,4-*ij*]berbindione (pages 130–135)

Elena Stanoeva, Angelina Georgieva, Stanislava Avramova, Nikola Burdzhiev and László Lázár

Synthesis and Antitumor Activity of Heterocycles Related to Carbendazim (pages 136–141)

William A. Remers, Bhashyam S. Iyengar, Robert T. Dorr, Lee Wisner and Robert B. Bates

Synthesis and Pharmacological Evaluation of Novel Triazolo [4, 3-*a*] tetrahydrobenzo (*b*) thieno [3, 2-*e*] pyrimidine-5(4*H*)-ones (pages 142–149)

S. N. Thore, Sunil V. Gupta and Kamalkishor G. Baheti

The Use of Pinner Type Reaction for the Synthesis of New Indeno[2,1-*c*]pyridine-4-carbonitrile Derivatives (pages 150–155)

Prashant S. Nikam, Shivaraj P. Patil, Shrikant B. Kanawade, Sachin A. Gangurde, Meenakshi Rathi and Raghunath B. Toche

Synthesis of Dithiocarbamates Containing Disulfide Linkage Using Cyclic Trithiocarbonate and Amines under Solvent–Catalyst Free Condition (pages 156–162)

Nand Lal, Amit Sarswat, Lalit Kumar, Karthik Nandikonda, Santosh Jangir, Veenu Bala and Vishnu Lal Sharma

Synthesis of Some Novel Heterocyclic Xylidinyl Amines and Carboxamides (pages 163–168)

Fathy M. Abdelrazek, Mohamed S. Farghaly and Hussein E. Abdelrahman

Synthesis of New Macrocyclic Schiff Bases Containing Pyrazole and Triazole as Subcyclic Units (pages 169–172)

F. Chen and F-M. Liu

Synthesis and Biological Activity of 1-(Substituted phenoxyacetoxy)-1-(pyridin-2-yl or thien-2-yl)methylphosphonates (pages 173–179)

Tao Wang, Wei Wang, Hao Peng and Hongwu He

Synthesis of Asymmetric Monomethine Cyanine Dyes with Red-Shifted Optical Properties (pages 180–184)

Eduardo Soriano, Loretta Outler, Eric A. Owens and Maged Henary

Synthesis and Properties of Azoles and Their Derivatives: Part 70. Nitroallylic Systems in [2+3] Cycloaddition Reactions with Nitrones: A DFT Computational Study (pages 185–192)

Radomir Jasiński

A New Approach to the Synthesis of Poly-Functionalized Pyrano[2,3-*d*]Pyrimidines Derivatives via Microwave-Assisted Multi-Component Reactions without Catalyst(pages 193–196)

Runhong Jia, Juhua Peng, Bo Jiang, Junyong Zhang and Shu-Jiang Tu

Chemical and Electrochemical Syntheses of Benzo[*b*](1,4)-diazepine-7,8-diones(pages 197–200)

Davood Habibi, Davood Nematollahi, Hossein Mohammadkhani Pordanjani and Mohammad Reza Sadeghi

A Simple Synthetic Method of a 1,3,5-Triazine UV Absorbent CGL-479 and Its Characterization (pages 201–204)

Lei Li, You Mang, Di Jin and Li-gong Chen

Thermal Decomposition of Carbamoyl Meldrum's Acids: A Starting Point for the Preparation of 1,3-Oxazine Derivatives (pages 205–210)

Sławomir Makowiec, Ewelina Najda and Karolina Janikowska

Synthesis and Biological Activity Studies of Some Novel Mannich Bases of Benzotriazolyl Triazoles (pages 211–214)

Sonia George, Raja Chakraborty, Manojkumar Parameswaran, Anju Rajan and Thengungal Kochupaappy Ravi

Synthesis of 3-Acetyl-4-hydroxy-1-phenylpyridin-2(1*H*)-one Derivatives (pages 215–220)

B. P. Nikam and T. Kappe

Efficient Synthesis of 3,5-Dicarbamoyl-1,4-dihydropyridines from Pyridinium Salts: Key Molecules in Understanding NAD(P)⁺/NAD(P)H Pathways (pages 221–226)

Paolo Mellini, Daniela De Vita, Barbara Di Rienzo, Salvatore La Rosa, Alessandro Padova, Luigi Scipione, Silvano Tortorella and Laura Friggeri

Novel Rearrangement of 3-Acylaminofuro[2,3-*b*]pyridines into 3-(oxazol-4-yl)pyridin-2-ones (pages 227–234)

Tatyana A. Stroganova, Vladimir K. Vasilin, Polina S. Shestakova, Viktor M. Red'kin and Gennady D. Krapivin

Synthesis of Novel *N*-Triazolo Methyl Substituted Fluoroquinolones and Their Antimicrobial Activity (pages 235–242)

A Ravi Kumar, G. Sathaiah, A. Chandra Shekhar, K. Raju, P. Shanthan Rao, B. Narsaiah, Y. K. Raju and U. S. N. Murthy

Dihydroquinazolino[3,2-*a*][1,5]benzodiazepines: Synthesis and Computational Study of Reductive N-Heterocyclization of *N*-(2-Nitrobenzoyl)-1,5-benzodiazepin-2-ones(pages 243–250)

Regina Janciene, Gema Mikulskiene, Tomas Javorskis, Ausra Vektariene, Gytis Vektaris and Lidija Kosychova

Synthesis and Antimicrobial Activity of Some Novel Thiazoles, 1,3,4-Thiadiazines, 1,3,4-Thiadiazoles Incorporating Coumarin Moiety (pages 251–259)

Anhar Abdel-Aziem

Synthesis, Characterization, and Antimicrobial Studies of New Rigid Linker-Based Bispyrazolines (pages 260–266)

Mohamad Yusuf, Varsha Samdhian and Payal Jain

Polymer-Supported Tribromide as a New Solid Phase and Recyclable Catalyst for the Synthesis of 2-(*N*-Arylamino)benzothiazoles Under Solvent-Free Microwave Irradiation Conditions (pages 267–272)

Lokendrajit Nahakpam, Brajakishor S. Chingakham and Warjeet S. Laitonjam

Synthesis of Quinoline Derivatives by Multicomponent Reaction Using Niobium Pentachloride as Lewis Acid (pages 273–277)

Aloisio de Andrade, Giovanni Carvalho dos Santos and Luiz Carlos da Silva-Filho

Novel Synthesis of Some Imidazolyl-, Benzoxazinyl-, and Quinazolinyl-2,4-dioxothiazolidine Derivatives (pages 278–283)

Ali M. Youssef, Ahmed K. EL-Ziaty, Wael S. I. Abou-Elmagd and Sayed K. Ramadan

KOH-Oriented Ring Openings of *N*-Tosylaziridines with Carboxylic Acids in DMSO(pages 284–295)

F. Zhang, H. Chang and W. Wei

Synthesis, Characterization, and Anticancer Effect of Trifluoromethylated Aurone Derivatives (pages 296–301)

Xing Zheng, Hui Wang, Yun-Mei Liu, Xu Yao, Min Tong, Yu-Hong Wang and Duan-Fang Liao

Thermal Synthesis of 3-Bromothieno[3,2-*c*]pyridin-4-(5*H*)-one: A Telescoped Procedure with Tributylamine (pages 302–305)

Eric E. Boros and Istvan Kaldor

An Efficient, Multicomponent Synthesis of Pyrazolyl Triazolo Thiadiazinyl Chromen - 2 - Ones (pages 306–309)

Sreenu Pavurala and Rajeswar Rao Vedula

Synthesis of 3-Thiophenchromone by Stille Cross-coupling Palladium on Charcoal-Catalyzed Ligand-Free (pages 310–316)

Qian Yang, Zunting Zhang and Bo Liang
