On the cover: Immunofluorescence staining of a section of human gastric mucosa from *Helicobacter pylori*-infected patients with chronic gastritis. Staining was performed with Abs specific for monocytes–macrophages (CD68 in green) and for BAFF (red), respectively. Nuclei were revealed with Hoechst 33342 stain (blue). The orange signal reveals the abundant production of cytokines by macrophages. Munari, F., M. Fassan, N. Capitani, G. Codolo, M. Vila-Caballer, M. Pizzi, M. Rugge, C. Della Bella, A. Troilo, S.
